Docket Number: 24-OPT-05

no on Corby

Corby and other energy companies are reigning terror on the people of Vacaville and the people throughout the State of California. Why is the CEC aiding in this process? These energy storage sites belong far away from us and in industrial areas, not in the middle of our cities, or next to our homes, schools, hospitals and grocery stores. Corby and the CEC claim that it is safe, but there are two lawsuits currently pending in Suffolk County New York and Moss Landing with respect to water contamination due to these battery fires. I'm pretty sure their EIR's also indicated that their projects were safe with no reason to be concerned. Once soil, water and lung contamination occurs there's no turning back. Why is the CEC so willing to put the lives of 103,000 human beings (including thousands of children and seniors) at risk? If you can put a ban on tires, why aren't you putting a ban on lithium ion battery sites? Many energy companies are currently producing energy with non-flammable batteries which reduces all of the risk associated with lithium ion. If you approve this project, you are issuing Corby a license to kill and a 20 year plus death sentence to the people of Vacaville and all over our state for generations to come. Please deny Corby's application. Save our lives our farm land and our water sources from destruction. Please read the story of Brian and Angie Roeder, and Kim and Louis Solano.
