Vacaville Northeast Growth Area

As a Vacaville City Councilmember since 2020, I have watched this project and considered the very real impacts to Vacaville. The area slated for this project is in the Northeast Growth area we have identified for future use for economic growth. Allowing this BESS project opens the door for others to follow and ruins the plans we have considered for that area. Listening to the people who live there and in most of Vacaville, this isn't a project that would benefit our residents or our city revenues. The Council worked hard on an ordinance to set up appropriate parameters for battery storage, but we do not want lithium ion technology or the proposed location. I attended the public meeting last week in Vacaville and agree with statements made by the Mayor and Councilmembers Silva and Stockton.
