Subject: Prop 39 Guidelines: 13-CCEJA-01

California Energy Commission

DOCKETED

13-CCEJA-01

TN 73903

OCT 27 2014

> Please consider the following comments shared at the Oct 23rd meeting for Prop 39.

>

> 1. Useful life of solar equipment extended to match warranty. This will help with the SIR and also provide a more accurate projected life since we have a warranty to match with a fixed cost. We have done projects where we have had equipment match the warranty of the panels to help with customers that are looking to fix their project costs.

>

> 2. Allow for exceptions to large projects for LEA's with many small schools so that they can participate without having to spend 50% on projects over \$250k. We are having issues creating projects for these LEA's that got funded over \$1M and have already done their lighting retrofits to do projects that meet the \$250k minimum as well as the SIR.
