Seahawks Battery Storage System

I'm concerned about public safety in air quality, and water quality. What studies have been done by the appropriate agencies in the area to protect public safety? This project is proposed in close proximity to a very populated area in the county. It's also near agriculture areas where crops could become contaminated. The community needs to hear more about what safety plans and measures are in place and if other sites not as close to the city of Watsonville, or any city, could be considered. Thank you. Please do not publicize my contact info.
