No data center in Inyokern or surrounding area

I am completely against the data center proposed by Robbie Barker for the Inyokern property that he apparently owns. Our water supply has been cited by the state of California as being in extreme overdraft. The Inyokern water district is barely able to keep itself working financially and itâ€™s not capable of providing more services
I understand data centers are extremely noisy and use a great amount of electricity. We already have some of the highest electrical bills in the United States. I do not want a higher electric bill.
