NO TO Data Centers

Inyokern is an underserved community that will suffer from the data center. California already lacks water! We donâ€™t need a data center in the place that is suffering enough. We need to protect fellow Californians from noise pollution, water pollution, and climate disruption. AI data centers are destroying what little we have of the earth. At the end of the day, if you donâ€™t care about the changes to the earth, care about what this will do to the people. Residents of InyoKern deserve better. The residents deserve an environment uninterrupted by major construction, constant noise and pollution. Take into consideration the health and wellness of the community before money. Do NOT build this data center.
