Regarding Seahawk Battery Energy Storage System

Hello,

The Pajaro Valley, Santa Cruz County, and Watsonville are important farming and ecologically sensitive areas. A Battery system in this county is of grave concern to me and other residents and agricultural communities. Much of our state and nations fresh food supply come from Santa Cruz County and surrounding areas so the risk of lithium battery storage is unwise and a great risk. This has already been proven by the battery fires at Moss Landing. A huge question is how can technology be implemented that has no recourse for accidents other than letting the fires burn out, which causes toxic fumes and particles going into the land and air. Please protect our precious resources.

Best regards,
Patricia Stokke
