Support for RB Inyokern Data Center

I am writing as a Kern County community member to express my support for the RB Inyokern Data Center, CEC Docket No. 26-SPPE-01. I support opportunities that can provide steady local employment and long-term work for skilled tradespeople and families in our community. Projects that create local job opportunities can help workers continue building their careers close to home while contributing to the local economy. I appreciate the opportunity to provide my comments and support for this project.
