**Project Update and Schedule Change for the Corby Battery
Energy Storage Project (24-OPT-05)**

Dear Christine Seal:

This letter is to notify you that significant new information is being added to the Corby Battery Energy Storage System Project Staff Assessment based on public and applicant comments that will require recirculation under California Code of Regulations, title 14, section 15088.5.

To ensure meaningful opportunity to comment on discussions of new impacts and mitigation, updated sections of the Staff Assessment with significant new information will be recirculated for 60 days, as required under Public Resources Code section 25545.7.6(b), and notification and consultation will be provided according to Public Resources Code Section 21092.1.

The schedule will be adjusted accordingly, and the new timeline will be reflected in the CEC's Opt-In Certification Dashboard, available on the CEC's Opt-In Program Webpage, at <https://www.energy.ca.gov/programs-and-topics/topics/power-plants/opt-certification-program>. Dates for recirculation, the Updated Staff Assessment, and Business Meeting are currently identified as "to be determined" in the Dashboard and will be updated when future dates are identified consistent with Public Resources Code section 25545.4(e)(3).

If you have any questions about this letter, please email Eric Knight, Siting and Environmental Branch Manager, at eric.knight@energy.ca.gov.

Sincerely,

Christine Seal
