## **PG&E rates missing from the CEC's MIDAS database since about September 1, 2026**

I am a residential electric customer in San Francisco on rate schedule EV2-A, with generation service from CleanPowerSF.

PG&E's time-dependent rates for my schedule are no longer available in the California Energy Commission's MIDAS rate database. The Rate Identification Number for my delivery service, USCA-PGXX-0400-0000, has returned no active tariffs since approximately September 1, 2026. Other customers report the same for this RIN and for USCA-PGPG-0100-0000. CleanPowerSF's RIN for the same schedule is still working.

I rely on this data to automate EV charging and track energy costs, which is the use the CEC's Load Management Standards are meant to support.

Please:

1. Confirm whether PG&E's rates are currently uploaded to MIDAS and, if not, when they will be restored.
2. Tell me whether the RIN for EV2-A delivery-only service has changed, and what the current RIN is.
3. Route this to the team responsible for PG&E's Load Management Standards compliance and MIDAS uploads.

I have also reported this to the CEC's MIDAS team.

Thank you,  
Paul
