DOCKETED	
Docket Number:	26-SPPE-03
Project Title:	Charcot Avenue Backup Generating Facility (CABGF)
TN #:	273216
Document Title:	Charcot Avenue Backup Generating Facility SPPE Application Appendix K Part 3 - Part XI of XII
Description:	N/A
Filer:	Scott Galati
Organization:	DayZenLLC
Submitter Role:	Applicant Representative
Submission Date:	10/26/2026 12:33:42 PM
Docketed Date:	10/26/2026

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *SANTA CLARA* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *SANTA CLARA* County

No Measures/Homes:	77
Geometric Mean:	0.7
Arithmetic Mean:	1.4
Median:	1
Standard Deviation:	1.9
Maximum:	9.2
% >4 pCi/L:	9
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

This list of drinking water violations and enforcement actions is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database, as part of the national download of Safe Drinking Water Act (SDWA) data. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program, including monitoring, enforcement, and violation data related to requirements established by the SWDA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

This national download of Safe Drinking Water Act (SDWA) data is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program related to requirements established by the Safe Drinking Water Act (SDWA). Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey's (USGS) National Water Information System (NWIS) is the nation's principal repository of water resources data. The data includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIS database information is obtained through the Water Quality Data Portal (WQP). The WQP

is a cooperative service sponsored by the USGS, the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC).

State Sources

Oil and Gas Wells **OGW**

The California Department of Conservation, Geologic Energy Management Division (CalGEM) provides this oil and gas wells dataset. CalGEM makes no warranties, whether expressed or implied, and the data is for informational purposes.

Periodic Groundwater Level Measurement Locations **MONITOR WELLS**

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

Well Completion Reports **WATER WELLS**

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

APPENDIX D: QUALIFICATIONS/INSURANCE

Education

BA, Environmental Studies, University of California at Santa Barbara
MBA, Finance and Marketing, Santa Clara University, Leavey School of Business, Santa Clara, CA

Registrations

AHERA Asbestos Building Inspection Certification, State of California

Highlights

24 years of experience in the environmental consulting/real estate due diligence industries
19 years performing Phase Environmental Site Assessments; Transaction Screen Assessments; Environmental Desktop Reports; Asbestos Surveys; HUD Phase I Environmental Site Assessments; Freddie Mac and Fannie Mae Phase I Environmental Site Assessments; and Radon Testing

Experience Summary

Beginning in the early 1990s, Mr. Olsen worked for various San Jose based environmental firms as a research analyst, gathering government agency, historical research and geologic information utilized in ESAs. In the late 1990s through early 2000s he managed the day-to-day operations of a team of research analyst and GIS related research and projects. From the early 2000s through the present, Mr. Olsen has been conducting and performing Phase I ESAs and subsurface investigations for various national environmental consulting firms.

Project Experience

Westfield Oakridge Shopping Mall. Mr. Olsen conducted a Phase I Environmental Site Assessments on a 1.2 million square foot Westfield Shoppingtown mall (Oakridge Mall, San Jose, California)

Humboldt Redwood Company. Mr. Olsen conducted a Phase I Environmental Site Assessments on a 660-acre Humboldt Redwood Company lumber mill, co-generation plant and maintenance facility, along with 207,000 acres of timberland (Scotia, California)

Talavera. Mr. Olsen conducted a Freddie Mac Phase I Environmental Site Assessments on a 350-unit multi-family residential apartment facility (Las Vegas, Nevada)

Automobile Dealership Portfolio. Mr. Olsen recently conducted seven (7) Phase I Environmental Site Assessments on automobile dealerships/service facilities (San Jose, Newark, Pleasanton, Colma and Hayward, California)

Greka Energy. Mr. Olsen conducted a Phase I Environmental Site Assessment on an asphalt and crude oil refinery (Santa Maria, California)

PARTNER

Margaret R. Thomas
Project Assessor

Education

Bachelor of Arts, Political Science, University of California, Irvine, CA
Diploma, Executive Assistant Business Program, Heald Business College, Hayward, CA

Registrations

California EPA Registered Environmental Assessor I – 07364
California OSHA Certified Site Surveillance Technician No. 97-2116

Training

40-Hour OSHA HAZWOPER Training
EPA-Certified AHERA Asbestos Building Inspector
EPA-Certified AHERA Contractor/Supervisor/Competent Person

Highlights

15 + years of experience in the environmental due diligence industry:

- Phase I Environmental Site Assessments
- Phase II Environmental Site Assessments
- Property Condition Assessments
- Asbestos Surveys
- Transaction Screen Assessments
- Environmental Desktop Reviews and Reports
- UST Removal
- Regulatory Work Plan Preparation for remediation of hazardous materials
- Business Development / Client Relations

Experience Summary

Ms. Thomas is a Project Assessor at Partner Engineering and Science, Inc. (Partner) and is located out of the Torrance, California office. She is responsible for conducting Phase I Environmental Site Assessments (ESA) including site reconnaissance, regulatory file review, historical research, interpretation of data and maps, and technical writing. Ms. Thomas has broad project experience from small privately owned properties to large portfolios of industrial sites in both the private and public sectors. This experience includes properties with impact to soil and groundwater from petroleum and solvent releases and required extensive regulatory file review. Ms. Thomas has received training in risk management and liability as it pertains to environmentally impacted properties.

Project Experience

Initial Site Assessment for Freeway Expansion, Los Angeles County, California. Performed an *Initial Site Assessment* for California Department of Transportation (Caltrans) for the Interstate 5 Freeway expansion project in Burbank, Glendale and Los Angeles, which included 10 miles of assessment area and many properties with hazardous materials, USTs and groundwater contamination issues.

Initial Study and Biological Survey, Madera, California. City of Madera, California: Performed an *Initial Study* for the City of Madera Wastewater Treatment Plant expansion project, which included a Biological Survey

and assessment for hazardous materials.

Phase I Environmental Site Assessment and Underground Storage Tank Removal, Beverly Hills, California. Project Manager for the removal of an old waste oil underground storage tank that was identified through due diligence research, which was subsequently removed and received case closure from the Los Angeles County Environmental Programs Division.

Phase II Environmental Site Assessment and Work Plan for Remedial Action, Garden Grove, California. Project Manager for site characterization of a former dry cleaner that included a soil gas survey, soil sampling and the installation of five groundwater monitoring wells. Ms. Thomas conducted the initial Phase II ESA, which identified soil and groundwater impact. Preparation of a Work Plan for site characterization was approved by the Santa Ana Regional Water Quality Control Board and implemented.

Phase II Environmental Site Assessment, Inglewood, California. Project Manager of a *Phase II ESA* on a former gas station property that was redeveloped in the early 1980s into a coin operated laundry mat. The client was a prospective buyer of the property. Limited information pertaining to the former gas station was identified at the local regulatory agencies; therefore, a Phase II scope of work was designed and implemented to best identify the former UST and piping locations. Significantly contaminated soil was identified.

Phase I Environmental Site Assessment, Downtown Los Angeles, California. Performed a *Phase I ESA* for the Los Angeles County Metropolitan Transportation Authority (MTA) for its Division One Bus Depot Expansion project on a site in downtown Los Angeles that was a former Texaco Super Truck Service Depot with former fueling, carwash and automotive services. Ms. Thomas has performed several Phase I ESA projects for the Los Angeles County MTA.

PARTNER

Wendy Moore
Director

Education

B.Sc. Honors, Geography and Environmental Management, University of Johannesburg, South Africa, 1999*
B.Sc. Earth Sciences, University of Johannesburg, South Africa, 1998*
*B.Sc. Geography and Environmental Science issued by the University of Toronto - Comparative Education Service, 2000

Registrations

EPA-Compliant Environmental Professional (40 CFR Part 312)

Training

OSHA 40 Hour HAZWOPER

Highlights

20 years' experience performing Phase I Environmental Site Assessments, Transaction Screen Assessments, and Environmental Desktop Reports
15 years' experience performing Phase II Environmental Site Assessments, subsurface investigations, and Indoor Air Surveys
5 years' experience performing remediation
12 years' experience performing limited asbestos and lead surveys

Experience Summary

Wendy Moore has over twenty years of experience providing a wide range of environmental services, environmental site assessments, and project coordination, including regulatory interaction and reporting throughout North America. Experience includes a variety of technical services, including environmental site assessments, environmental impact assessments, regulatory research, and computer database management. Services include Phase I and II Environmental Assessments; project work plans; limited asbestos, lead, and mold survey reports; Title V and RECLAIM reporting; CEQA Mitigated Negative Declarations; NEPA services and Health and Safety Plans.

Project Experience

Ms. Moore managed and completed over 2,000 Phase I Environmental Site Assessments (ESAs) for various industries and properties, including wireless telecommunications, hospitals, industrial, commercial, and landfills across North America (USA and Canada). Activities included site reconnaissance, review of historical documents, agency lists/files, report writing, and peer review. Knowledge and implementation of American Society for Testing and Materials (ASTM) Standard Practice E1527-13 (updated to E1527-13) and U.S. Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) in the United States and CAN/CSA-Z768-01 and Ontario Regulation 153/04 in Canada (Ontario) on these assessments.

Ms. Moore completed and assisted with numerous Phase II Investigations across North America.

Ms. Moore completed numerous National Environmental Policy Act (NEPA) Screening reports and Environmental Impact Assessment reports for the telecommunications industry (United States).

Ms. Moore completed numerous limited asbestos surveys and lead-based paint surveys for various facilities and properties. Activities included limited sampling and report writing.

Ms. Moore managed and trained staff in completing a variety of environmental service related tasks.

Managed numerous sub-consultants nationwide assisting with Phase I ESAs conducted nationwide.

Ms. Moore assisted with marketing and preparation of Phase I and Phase II ESA proposals for sites across the USA and Canada.

Ms. Moore aided in the preparation of Quarterly RECLAIM reports and Annual Emissions reports for clients such as American Airlines, Inc. and Kal Kan Foods, Inc.

Ms. Moore provided technical support on numerous major projects including the Charnock Initial Regional Response Activities on behalf of Shell Oil Company. Work on this and other projects involved data acquisition, processing as well as electronic conversion of boring logs.

Ms. Moore participated in major subsurface investigation at Vernon Steel, including quarterly groundwater monitoring.

Ms. Moore assisted with compilation of remediation team in New Orleans subsequent to hurricane Katrina.

Highlights

Over 20 years in the environmental and engineering consulting industry with institutional and private clients
Environmental Engineer
Extensive knowledge of real estate due diligence
Phase I and Phase II Environmental Site Assessments
Site Mitigation and Remediation

Experience Summary

Ms. Ponce is an environmental engineer with more than 20 years of experience in the environmental and engineering services industries. As a Principal and National Client Manager working within Partner's Investment Advisory Group, Ms. Ponce strives to provide the expected high level of client service for the Equity Asset Management industry. She is responsible for ensuring consistency, quality, and on-time delivery of due diligence and engineering services provided by Partner. Current day-to-day responsibilities include project oversight, staff supervision, report review, and client management.

Ms. Ponce has significant experience in the field of environmental due diligence, site assessment, remediation, and regulatory compliance. Ms. Ponce provides environmental support to clients nationwide during the acquisition, disposition, development, and on-going management and operation of commercial, industrial, and multifamily residential properties.

Ms. Ponce has considerable experience in Phase I and Phase II Environmental Site Assessments (ESAs) of commercial, agricultural, and industrial properties and projects involving water quality, soil quality, and regulatory compliance including hazardous and solid waste site characterization and remediation;

remediation system design installation, and operation; tank removals; asbestos surveys; lead-based paint surveys; radon studies; mold assessments; lead-in water sampling and analysis; and technical reporting.

Ms. Ponce has been involved with feasibility and treatability studies associated with several remediation projects including soil and groundwater treatment systems, UST/LUST closures, and management of construction soils generated during redevelopment of agricultural and industrial properties. Other equity and finance level services managed and directed by Ms. Ponce include management of Property Condition Assessments, ALTA Land Surveys, zoning reports, Seismic Risk Assessments (PML), Construction Risk Management, construction monitoring services, and construction document cost review analysis.

Real estate investors, financial institutions, insurance lenders, property managers, developers, and brokers have come to rely on her advice and judgment to help them with their real estate business decisions. Ms. Ponce is a dedicated professional who takes pride and pleasure in meeting her client's needs and spearheading and assembling the team with the expertise to handle any issue that may come up during the real estate transaction.

Project Experience

Ms. Ponce has conducted, managed, and directed thousands of ESAs, industrial hygiene, and engineering assessments throughout her career, nationally, and globally. The following select projects and client base provide a glimpse of her consulting experience and due diligence background:

Ford Leasing Development Company / Sunset Ford, Westminster, California. Conducted a Phase I and II ESA and remedial activities at a closing automobile dealership with 41 service bays containing active, decommissioned, or removed in-ground hydraulic vehicle lifts. The Phase II ESA identified petroleum hydrocarbon and VOC impacts in soil and groundwater in the immediate vicinity of the lifts. Based on the identified impacts, managed the removal of all lifts and contaminated soil under regulatory oversight and conducted a comprehensive site investigation, including well installation and soil, groundwater, and soil vapor sampling. Prepared and submitted final reports to the client and regulatory agencies and obtained regulatory site closure.

UBS Realty Investors, LLC, Vernon, California. Conducted a Phase I and Phase II ESA, hazardous materials building survey, and oversight of remedial actions on an approximately 6-acre industrial property in preparation of acquisition and redevelopment. The property was more recently used for large quantity storage and distribution of motor oil and lubricants. The facility was previously involved with blending and bottling motor oil products including a historical cooperage with drum and container cleaning as part of those operations. The business had occupied the subject property since 1936 with consistent operations throughout its history and only minor modifications to the original design, with tanks farms, rail operations, and USTs. The Phase I ESA included site reconnaissance, property inspection, site history review, database search, and final report preparation with recommendations for additional assessment. The Phase II subsurface investigation scope included a geophysical survey, the advancement of 43 soil borings, 24 soil vapor borings identifying petroleum hydrocarbon and VOC impacts across the site. Based on the identified impacts, provided oversight of the cleanup with the property obtaining regulatory site closure and being redeveloped.

Confidential Private Equity Firm, Twenty-nine Sites in Nine States. Provided project oversight and supervision of Property Condition Assessments (PCAs), Mechanical, Electrical, Plumbing & Fires Life Safety (MEPFLS) assessments, Energy Surveys, and equipment inventory at active/operating cold storage facilities.

USDA Forest Service, Mountain Center, California. Prepared a Soil Excavation and Groundwater Well Installation Workplan to assess a release that was discovered during the removal of two 1,000-gallon USTs. Elevated contaminant concentrations were detected in confirmation soil samples collected at that time. Installed one groundwater monitoring well into fractured bedrock and later abandoned the well due to planned excavation activities in the area. A groundwater sample collected prior to well abandonment contained elevated contaminant concentrations. Prepared a Site Investigation Summary Report summarizing site activities and investigations to date. Prepared a Groundwater Assessment Workplan to assess the extent of contaminant concentrations in groundwater. Site assessment work is pending.

American Golf Corporation, Eighteen Sites in Southern California. Managed underground storage tank removal and closure activities. Work included performing initial confirmation soil sampling and analysis and subsequent monitoring and soil and/or groundwater testing in association with the removal of the underground storage tanks, associated dispensers, and piping at sixteen sites located throughout Southern California. Prepared soil and/or groundwater investigation workplans as needed to address contamination issues at several of the sites and closure reports for the various State and local authorities. To date, regulatory closure has been obtained at most of the facilities. Currently managing ongoing monitoring and/or remediation is occurring at several of the facilities.

G.E. Capital, Tijuana, Mexico. Managed and conducted more than 30 Phase I and Phase II ESAs for active and proposed industrial developments within various areas of Tijuana, Mexico. Work included site reconnaissance, site history review, and final report preparation.

Signature Flight Support, Unites States, Canada, Europe. Provided due diligence support in connection with the acquisition of Landmark Aviation's 195 global locations including FBOs, MROs, and its charter management division. Managed the portfolio conducting Phase I and Phase II report peer views, Phase I ESAs, and PCAs.

EXECUTIVE SUMMARY

On behalf of Pacific Gas and Electric Company (PG&E or Client), Environmental Resources Management, Inc. (ERM) completed a Phase I Environmental Site Assessment (ESA) at the property, located at 2347 N 1st Street, San Jose, California in San Jose, California identified by a portion of Santa Clara County Assessor's Parcel Number (APN) 101-02-011 (the "Subject Property"). The parcel totals approximately 8.75 acres and is currently owned by Apple Inc. The environmental assessment was performed in anticipation of a financial transaction involving the Subject Property.

The Subject Property visit (the "Property Visit") was performed on 25 June 2026 by ERM assessor Nadja Quiroz. ERM was unaccompanied during the Site visit.

The subject property occupies the northeastern-most portion of a larger adjoining, vacant property that extends southeast (2351 N 1st St) and across Component Drive. These conjoined properties share the same APN and land use history. Historically, the Subject Property was developed as an orchard with a cluster of structures concentrated along the southeastern boundary from at least 1939 to 1968. Between 1968 and 1974, the orchard was replaced with row crops. All structures were demolished sometime between 1974 and 1982; potentially 1980 according to a demolition permit on record with the County of Santa Clara's Department of Planning and Development. Row crops continued to be farmed until at least 1998. The property remains undeveloped through the present day.

ERM identified the following findings for the Subject Property:

Summary of Identified Issues
ASTM E1527-21 Findings
Recognized Environmental Conditions (RECs)[1]
• No RECs were identified in connection with the Subject Property.
Controlled Recognized Environmental Conditions (CREC)[2]
• A recorded *Agreement Containing Covenants Running with the Land* was identified for the Subject Property. According to remedial documents available on GeoTracker, the covenant was recorded on February 13, 2001, and prohibits residential use of the Subject Property. The restriction constitutes an activity and use limitation for the Subject Property and, therefore, is considered a Controlled Recognized Environmental Condition (CREC).
Historical Recognized Environmental Conditions (HRECs)[2]
• Historical arsenic impacts associated with former orchard operations at the Subject Property were identified during environmental investigations conducted by Apple, Inc. in 2015 and 2016 as part of due diligence and redevelopment planning for the larger 2347 and 2351 North 1st Street property assemblage, which includes the Subject Property. Arsenic impacts were investigated, delineated, and remediated under oversight of the Santa Clara County Department of Environmental Health (DEH). Apple, Inc. completed excavation and off-site disposal of approximately 15,100 cubic yards of impacted soil as part of redevelopment of the larger 2347 and 2351 North 1st Street properties in 2016. Following confirmation that remaining arsenic concentrations in residual site soils met the approved remedial goal of 17 milligrams per kilogram, the Santa Clara County DEH issued a No

[1] Key ASTM definitions, including REC, CREC, HREC, and de minimis condition, are provided in Section 8.

Summary of Identified Issues
Further Action determination on March 21, 2017. Accordingly, the former arsenic soil impacts are considered a Historical Recognized Envionrmental Condition (HREC).
***De minimis* conditions**
• No de minimis conditions were identified.
Other Potential Issues
• No other potential issues were identified.

1. INTRODUCTION AND BACKGROUND

1.1 PURPOSE AND AUDITORS

On behalf of Pacific Gas and Electric Company (PG&E or Client), Environmental Resources Management, Inc. (ERM) completed a Phase I Environmental Site Assessment (ESA) at the property located at 2347 N 1st Street, San Jose, California in San Jose, California identified by a portion of Santa Clara County Assessor's Parcel Number (APN) 101-02-011 (the "Subject Property"). The parcel totals approximately 8.75 acres and is currently owned by Apple Inc. The environmental assessment was performed in anticipation of a financial transaction involving the Subject Property.

The Subject Property visit (the "Property Visit") was performed on 25 June 2026 by ERM assessor Nadja Quiroz. ERM was unaccompanied during the Site visit.

The "User" of this Phase I ESA report, as prescribed under ASTM International (ASTM) Standard E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527-21) is defined as PG&E.

1.2 SCOPE OF WORK

This environmental assessment was conducted in conformance with ERM's Blanket Purchase Order Number 8200277, and with the requirements of ASTM E1527-21. A proposal for this Phase I ESA Report was approved by PG&E on 11 June 2026. Exceptions to or deletions from E1527-21 are described in Section 1.3.4 of this report.

ERM's Phase I ESA sought to gather information regarding: (1) current and past property uses and occupancies; (2) current and past use of hazardous substances and petroleum products; (3) waste management and disposal activities that could have caused a release or threatened release of hazardous substances; (4) current and past corrective actions and response activities to address past and ongoing releases of hazardous substances at the Subject Property; and (5) properties adjoining or near the Subject Property that have environmental conditions that could have resulted in conditions indicative of releases or threatened releases of hazardous substances to the Subject Property.

The scope of this Phase I ESA included:

- A visit to evaluate current conditions and identify areas of potential concern at the Subject Property
- A review of the history of the Subject Property and its vicinity through interviews and a review of various historical sources
- Observation of adjoining properties and properties in the local area to evaluate the potential for adverse environmental impact to the Subject Property
- Interviews/research of local city/county, tribal, state, and federal records, including contracting of Environmental Data Resources, Inc. (EDR) to identify regulatory listings for the Subject Property and regulatory-listed facilities in the vicinity of the Subject Property, as required in the regulatory records review section of ASTM E1527-21

- Interviews and/or requests for information from the User and Subject Property owner, as deemed appropriate by the Environmental Professional

1.3 LIMITING AND SPECIAL CONDITIONS

1.3.1 LIMITING CONDITIONS DURING THE SUBJECT PROPERTY VISIT

No limiting conditions were encountered during the Subject Property visit.

1.3.2 DATA GAPS

The following table summarizes the data gaps identified during the Assessment.

TABLE 1-1 DATA GAP SUMMARY

Data Gap / Failure	Sources Consulted to Address Data Gap	Significance*
A Chain-of-Title, including a search for environmental liens, was not provided for review by the User.	Review of environmental questionnaire completed by personnel familiar with the Subject Property's history, in addition to review of historical maps, photographs, and regulatory information.	Non-significant
ERM was not able to review previous Phase I and Phase II reports, as the Property representative was not able to provide copies.	Review of environmental questionnaire completed by personnel familiar with the Subject Property's history, in addition to review of historical maps, photographs, and regulatory information.	Non-significant

* "Significance" provides a qualitative indication of the implication of the identified data gap relative to the Environmental Professional's ability to identify conditions indicative of releases or threatened releases to the subject property. "Non-significant" indicates that additional information to fill the data gaps is not likely to have a negative impact on ERM's conclusions presented in this report. "Significant" indicates that it is ERM's opinion that additional diligence or investigation (such as additional data review or physical sampling of environmental media) is required to address the data gap.

1.3.3 SIGNIFICANT ASSUMPTIONS

No significant assumptions have been made.

1.3.4 EXCEPTIONS TO AND DELETIONS FROM E1527-21

ERM has not identified any exceptions to or deletions from E1527-21.

2. PHYSICAL SETTING

TABLE 2-1 PHYSICAL SETTING

Subject Property Setting	
Location	The Subject Property is located at 2347 N 1st Street, San Jose, California, south of the intersection of North 1st Street and Component Drive in San Jose, California. The general location of the Subject Property and the physiographic features of the surrounding area are shown on Figure 1, developed from the United States Geological Survey (USGS) 7.5-minute quadrangle for Milpitas, California, dated 2021.
Topography and Hydrology	
Topographic Gradient	Based on a review of the EDR Radius Map, the Subject Property is at an elevation of approximately 34 feet above mean sea level (AMSL). The Subject Property topography slopes to the general northwest.
Nearest Surface Waterbody	Guadalupe River is located approximately one mile southwest of the Subject Property.
Wetlands	According to flood zone and National Wetland Inventory (NWI) data presented in the EDR® Radius Map™ reviewed by ERM, the Subject Property's westernmost corner (approximately 20% of the site) lies within the 500-year flood plains. No National or State wetlands are located within the Subject Property's boundary.
Geology and Hydrogeology	
Geology	According to the United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Web Soil Survey, Subject Property soils are described as Botella clay loam, which is categorized as moderately well and well drained soils with moderate infiltration rates and moderately coarse textures. The soils are not hydric.
Depth to Water	The Subject Property is located within the Santa Clara Valley groundwater basin. Site-specific hydrogeological data was not available in the EDR Radius Report for the Subject Property, however, a 2016 *Remedial Action Work Plan* obtained on the State Water Resources Control Board GeoTracker database prepared by Erler & Kalinowski, Inc. for the Subject Property noted on-site groundwater at approximately 15 feet below ground surface.
Onsite Wells	According to the EDR Radius Report, no water wells are registered at the Subject Property. Additionally, there are no state or federal wells identified within a one-mile radius of the Subject Property. Four monitoring wells were identified within a one-mile radius of the Subject Property: Watkins-Johnson Company (~0.10 mile), 2480 N 1st St (~0.12 mile), M.E. Fox & Company (~ 0.2 mile), and one groundwater extraction well used for remediation purposes in association with a Univar/Vopak site (0.64 mile).
Presumed Groundwater Flow Direction	According to GeoTracker records for the Subject Property, groundwater flow is confirmed to be northwest toward Guadalupe River. It should be noted that groundwater flow direction can be influenced locally and regionally by subsurface topography, recharge and discharge areas, horizontal or vertical inconsistencies in the types and location of subsurface soil and bedrock, and proximity to water pumping wells. A detailed evaluation of the groundwater flow direction at the Subject Property was not a part of the scope of this assessment.

3. SUBJECT PROPERTY DESCRIPTION, OPERATIONS, AND HISTORY

3.1 GENERAL SUBJECT PROPERTY DESCRIPTION

TABLE 3-1 SUBJECT PROPERTY LAYOUT AND USE

Subject	Description
Facility Name	N/A
Parcel Identification	Santa Clara County: a portion of APN 101-02-011
Owner/Lessor	Pacific Gas and Electric Company
Subject Property Size	8.75 acre
Number of Buildings and Square Footage	N/A
Interior Features	N/A
Exterior Features	There is a black steel fence surrounding the Subject Property.
Operations	The Subject Property is undeveloped with no active operations.
Utility Providers	The Subject Property falls within PG&E and the City of San Jose's water and sewage service areas; however, no evidence of active service was observed at the Subject Property.

A Subject Property Location Map and Subject Property and Vicinity Map are provided as Figures 1 and 2. Photographs of the Subject Property are included as Appendix A.

3.2 SUBJECT PROPERTY HISTORY

To determine past uses of the Subject Property and surrounding properties, ERM reviewed historical sources of information as outlined in the References section of this report (Section 7). ERM reviewed aerial photographs, topographic maps, city directories, and database findings provided by EDR. Historical sources are included in Appendix B. Copies of pertinent historical sources are also in Appendix C, if available.

TABLE 3-2 HISTORICAL TIMELINE

Timeframe	Discussion
1939-1968	Historical aerial imagery depicts the Subject Property as agricultural land (orchard). Two structures, presumed to be residential based on their size, configuration, and associated features, are visible near the eastern boundary of the Subject Property. Approximately seven additional structures, potentially commercial in nature based on their size, configuration, and development pattern, are depicted along the southeastern boundary of the Subject Property.
1974	Historical aerial imagery depicts the Subject Property as undeveloped. Previously observed structures appear to have been removed, and the property appears fallow. Areas of pavement associated with former vehicle access pathways, remnants of

Timeframe	Discussion
	structural foundations, and a single tree located near the site of the former residential structures remain visible.
1982 - 1998	Historical aerial imagery depicts the Subject Property as undeveloped. No visible evidence of former vehicle access pathways or structural foundations is apparent.
2006 – 2024	Subject Property remains undeveloped.
Present	Current conditions as observed at the time of ERM's Subject Property inspection are discussed throughout this report.

3.2.1 DISCUSSION OF HISTORICAL ENVIRONMENTAL ISSUES/ ASSESSMENTS/ INVESTIGATIONS

ERM consulted with local agencies for relevant records for the Subject Property. The Subject Property contains a closed Cleanup Program Site case in the EDR Radius Map per the California State Water Resources Control Board's GeoTracker database (Global ID T10000008928). Information related to this Cleanup Program case are included below.

According to the *Remedial Action Work Plan – Removal of Arsenic-Containing Soils* (May 2016) and *Completion Report – Removal of Arsenic-Containing Soils* (October 2016) prepared by Erler & Kalinowski, Inc. for Apple, Inc., environmental investigations conducted in 2015 and 2016 identified arsenic, lead, and organochlorine pesticides in shallow soil within the Subject Property at 2347 North 1st Street and the adjoining property at 2351 North 1st Street. The investigations were initially conducted as part of pre-acquisition environmental due diligence and, following acquisition of both properties as part of Apple's planned North First Street campus redevelopment, Apple Inc. performed additional characterization to delineate the extent of impacts across the redevelopment area. The impacts were extensively delineated through approximately 195 discrete soil samples collected between 2015 and 2016. Arsenic was the only constituent identified at concentrations exceeding the approved background concentration of 17 milligrams per kilogram (mg/kg), with concentrations ranging from 11.5 mg/kg to a maximum of 40.9 mg/kg. The arsenic impacts were largely confined to the former orchard area southeast of Component Drive (within the Subject Property boundary) and were attributed to historical orchard operations, including the likely use of lead-arsenate pesticides. Groundwater investigations did not identify pesticide-related impacts.

Following acquisition of the redevelopment properties, Apple Inc. entered into the Santa Clara County Department of Environmental Health (DEH) Voluntary Cleanup Program and implemented remedial actions of arsenic-impacted soil within the project area encompassing both 2347 and 2351 North 1st Street. Remedial activities conducted in 2016 included excavation and off-site disposal of approximately 15,100 cubic yards of impacted soil. The approved remedial objective was to reduce arsenic concentrations to the approved background level of 17 mg/kg. Post-remedial evaluation demonstrated that remaining arsenic concentrations within the project area were at or below the approved remedial goal. Based on the completed remedial activities, the DEH issued a No Further Action determination on March 21, 2017, concluding that the site investigation and corrective action satisfied the approved cleanup requirements and that no further action related to the release was required.

.

According to the Owner/Operator Environmental Questionnaire completed by Elizabeth Schmidt of Apple, Inc., the Owner is aware of existing land use restrictions affecting the Subject Property pursuant to an *Agreement Containing Covenants Running with the Land* dated February 13, 2001; however, additional details regarding the covenant were not provided in the questionnaire. Review of remedial documents available on GeoTracker indicates that the recorded covenant applies to the Subject Property parcel (APN 101-02-011) and prohibits residential use of the Subject Property and adjoining properties encompassed within that parcel. Because this activity and use limitation remains in effect and governs future use of the property, the condition is considered a Controlled Recognized Environmental Condition (CREC).

No other cleanup cases or hazardous releases were identified for the Subject Property.

3.2.2 HISTORICAL AGENCY INFORMATION

TABLE 3-3 HISTORICAL AGENCY INFORMATION

Date	Source	Discussion
Historical Tax and Deed Records		
31 July 2015	Grant Deed (County of Santa Clara Office of the Assessor)	Apple Inc. purchased the Subject Property.
Building Department Records		
8 December 1980	Building permits (City of San Jose)	Permits issued for demolition of a single-story residence and installation of plumbing and/or pipe fixtures. Owner stated as Hewlett-Packard.
20 November 2001	Building permits (City of San Jose)	Approval of Planned Development Permit for initial BEA Systems campus (approximately 561,541 SF office/R&D development and parking structures). Owner is listed as BEA Systems. This record includes a reference to a 1993 office/research and development (R&D) entitlement to Hewlett-Packard.
2002	Building permits (City of San Jose)	Approval of Planned Development Permit for an expansion of the proposed BEA Systems campus to 859,891 SF office/R&D development and parking structures
15 June 2004	Building permits (City of San Jose)	Approval of General Development Plan increasing proposed BEA System campus to 2.8 million SF office/R&D.
22 October 2004	Building permits (City of San Jose)	Final approval for master grading and construction implementation of the 2.8 million SF BEA headquarters campus.
Zoning Records		
20 November 2001	Building permits (City of San Jose)	Planned Development Rezoning increased allowable building height from 90 feet to 105 feet.

Date	Source	Discussion
15 June 2004	Building permits (City of San Jose)	Planned Development Rezoning increased allowable development square footage.
Other Public Property Search Results		
1 February 1971	Property Search Results (City of San Jose)	Entry titled “Annexation Date” with associated name “Orchard No_46”. No associated permit recorded.
26 April 1977	Property Search Results (City of San Jose)	Entry titled “Annexation Date” with associated name “Orchard No_69”. No associated permit recorded.

The building permit records indicate that multiple office/research & design (R&D) campus development concepts and associated entitlements were approved for the Subject Property between 1993 and 2004; however, available records reviewed, aerial photography, and the Property Visit do not indicate that these developments were implemented.

No other relevant historical agency records were reviewed.

3.3 ENVIRONMENTAL DATABASE RECORDS REVIEW

The database report (Appendix D) indicates that the Subject Property is listed on several databases, as listed in Table 3-4.

TABLE 3-4 RADIUS REPORT LISTINGS

Entity	Regulatory Database	Details
Apple Inc.	California Hazardous Waste Tracking System (HWTS), California Hazardous Waste Information System (HAZNET), California State Water Resources Control Board (SWRCB/GeoTracker), SWRCB Cleanup Program Site (CPS), SWRCB Spills, Leaks, Investigations and Cleanup Program (SLIC), California Integrated Water Quality System Project (CIWQS), National Pollutant Discharge Elimination System (NPDES), Department of Toxic Substances Control (DTSC/EnviroStor), Resource Conservation and Recovery Act Information System (RCRAInfo), and EPA Enforcement and Compliance History Information (ECHO)	Available records indicate that soil samples obtained from the Subject Property and adjoining property at 2351 N 1st St had detections of lead, arsenic, and organochlorine pesticides likely linked to historical agricultural uses. This prompted a soil remediation program that was completed under oversight of Santa Clara County LOP and which Apple Inc. voluntarily agreed to enter on 21 April 2016. The cleanup program targeted arsenic-impacted soil on the Subject Property and adjoining vacant properties. Approximately 1,370 tons of contaminated soil were excavated and removed from the Subject Property and 2351 N St Street. The waste was managed under disposal method H132, indicating disposal at a landfill or similarly regulated surface impoundment, potentially following treatment and/or stabilization prior to disposal. The cleanup case was formally closed on 21 March 2017. As of May 2017, remaining concentrations of

Entity	Regulatory Database	Details
		arsenic in shallow soils are at or below the approved remedial goal of 17 mg/kg.

4. ENVIRONMENTAL OPERATIONS

TABLE 4-1 ENVIRONMENTAL OPERATIONS

Subject	Description	Discussion of Environmental Conditions
Storage and Use of Hazardous Materials	Historically present levels of arsenic in shallow soils within the Subject Property and 2351 N 1st Street were found to be above typical background concentration. Soils were remediated to below the remedial target of 17 mg/kg thereby closing the Voluntary Cleanup Program under Santa Clara County's LOP on 21 March 2017.	Historical Remediated Environmental Concern (HREC)
Drums, Totes, and Intermediate Bulk Containers (IBCs)	No drums, totes, or IBCs were observed during the Property visit.	No Environmental Conditions Identified
Bulk Storage (ASTs and USTs)	Yes: ☐ No: ☒ No evidence of current USTs or ASTs was observed on the Subject Property during the Subject Property visit.	No Environmental Conditions Identified
Hazardous Substances and Petroleum Product Containers Not in Connection with Identified Uses	ERM did not observe containers of hazardous substances or petroleum products at the Subject Property.	No Environmental Conditions Identified
Unidentified Substance Containers	ERM did not observe any unidentified substance containers at the Subject Property.	No Environmental Conditions Identified
Stains or Corrosion on Floors, Walls, or Ceilings	N/A	No Environmental Conditions Identified
Stained Soil or Pavement	There was no evidence of stained soil or pavement at the Subject Property.	No Environmental Conditions Identified
Strong, Pungent, or Noxious Odors	There was no evidence of strong, pungent, or noxious odors observed at the Subject Property.	No Environmental Conditions Identified
Water Supply, Use, and Management	No evidence of water wells was observed on the Subject Property. No evidence of spills or leaks were identified. No evidence of active water service was observed.	No Environmental Conditions Identified
Wastewater	*Sanitary*: No evidence of septic systems was observed at the Subject Property. No sanitary wastewater discharging sources were observed. *Stormwater*: Stormwater infiltrates the ground directly onsite. *Process Water*: Based on observations made by ERM during the Subject Property visit, no process	No Environmental Conditions Identified

Subject	Description	Discussion of Environmental Conditions
	wastewater is currently produced at the Subject Property.	
Waste Disposal	*Hazardous Waste*: No hazardous wastes are currently generated or shipped from the Subject Property. *Non-Hazardous Waste*: No municipal waste containers were observed at the Subject Property. Occasional food-related litter was observed adjacent to road frontages. *Other Regulated Waste*: No battery, electronic or other waste was observed at the Subject Property Visit.	No Environmental Conditions Identified
Solid Waste Disposal	ERM did not observe evidence of solid waste disposal on the Subject Property.	No Environmental Conditions Identified
Septic Systems or Cesspools	There are no current or historical septic systems or cesspools identified in connection with the Subject Property.	No Environmental Conditions Identified
Polychlorinated Biphenyls (PCBs)	No PCBs were observed during the Subject Property Visit. Based on historical operations as a commercial orchard, PCBs are not expected to represent a significant environmental concern.	No Environmental Conditions Identified
Stained Soils, Stressed Vegetation, and Odors	No stained soils, distressed vegetation, or odors were noted during the Subject Property visit.	No Environmental Conditions Identified
Drains and Sumps	There are no current or historical drains or sumps identified in connection with the Subject Property.	No Environmental Conditions Identified
Pits, Ponds, or Lagoons	There are no current or historical pits, ponds, or lagoons identified in connection with the Subject Property.	No Environmental Conditions Identified
Asbestos-Containing Material (ACM)	Asbestos was banned in most friable building materials (spray-applied surfacing materials and thermal system insulation) in 1978, but the Occupational Safety and Health Administration (OSHA) deems spray-applied surfacing materials, thermal system insulation materials, and vinyl flooring materials as “presumed asbestos-containing materials” (PACMs) if they are present in pre-1981 buildings (Title 29 of the Code of Federal Regulations (CFR), Parts 1910.1001 and 1926.1101). Based on the lack of any buildings remaining on the Subject Property, it is unlikely that ACMs are present.	No Environmental Conditions Identified
Ozone-Depleting Substances (ODS)	ERM did not observe any equipment containing ODS at the Subject Property.	No Environmental Conditions Identified
Lead-Based Paint (LBP)	In 1978, LBP was banned by the United States government for use on residences or other buildings where consumers could be exposed.	No Environmental Conditions Identified

Subject	Description	Discussion of Environmental Conditions
	Based on the lack of any remaining buildings on the Subject Property, it is unlikely that LBP is present.	
Mold	No mold/significant water was damage observed	No Environmental Conditions Identified
Per- and Polyfluoroalkyl Substances (PFAS)	Based on ERM's review of the sources identified in Section 7, neither current nor historical Subject Property operations appear to include the use of PFAS. Known or potential sources of PFAS associated with adjacent or surrounding properties, if identified, are discussed in Section 5.	No Environmental Conditions Identified

5. ADJOINING AND SURROUNDING PROPERTIES

5.1 ADJOINING PROPERTIES

Land use in the area of the Subject Property consists of commercial/industrial uses. The adjoining properties and nearby land use, as observed by ERM at the time of the Subject Property inspection, are shown in Table 5-1.

TABLE 5-1 SURROUNDING PROPERTIES

Direction	Discussion	Historical
North	The Subject Property is bound to the northeast by Google Inc (2460 N First Street), Paramit Corporation (2450 N 1st ST Unit A), KNTV Television LLC (2450 N 1st St), and AT&T California - N12TY (2450 N 1st St)	Historical aerial imagery from 1939 through 1974 depicts the area northeast of the Subject Property as predominantly agricultural, with a residential building cluster consisting of approximately eight structures. By 1982, the area appears to have transitioned to commercial/industrial use, although the northwestern portion remained undeveloped. Aerial imagery from 1993 depicts a complete transition to commercial/industrial development. Subsequent aerial photographs through 2024 depict a development pattern generally consistent with that observed in 1993.
East	The Subject Property is bound to the southeast by Sobrato (2345 N 1st St) and Marvell Technologies Group (2315 N 1st St)	Historical aerial imagery from 1939 through 1993 depicts the area southeast of the Subject Property as agricultural land, initially developed as an orchard and containing a cluster of structures interpreted as residential and/or agricultural buildings adjacent to the Subject Property boundary. Agricultural use appears to have continued during this period, transitioning from orchard cultivation to row crop production between 1982 and 1993. By 1998, the area appears to have been redeveloped for commercial/light industrial use. Subsequent aerial photographs through 2024 depict a development pattern generally consistent with that observed in 1998.
South	The Subject Property is bound to the southwest by a portion of the parcel with the same APN as the Subject Property.	Historical aerial imagery from 1939 through 1998 depicts the adjoining property southwest of the Subject Property (2351 N 1st Street) as agricultural land utilized for orchard and row crop production. By 2006, two irregularly shaped depressions are visible and remain apparent through 2024. The area appears to have remained undeveloped throughout the period of review and as observed during the Property Visit.
West	The Subject Property is bound to the northwest by a PG&E substation and KT North First OW LLC (2515 N 1st St)	Historical aerial imagery from 1939 depicts the area northwest of the Subject Property as agricultural land containing a complex of warehouse-sized structures and associated vehicle access pathways. Similar development is visible in subsequent aerial imagery from the 1950s, with evidence of increased site utilization and the addition of several smaller structures, some of which appear consistent with residential use. Between 1974 and 1982, the area appears to have been redeveloped for commercial/light industrial use. Features include a substation along Component Drive, a large parking lot, and a what appears to be a single large

Direction	Discussion	Historical
		commercial/industrial building. In 1998, the area west of the building is redeveloped into what appears to be a commercial complex or campus. By 2006, the original commercial building has been redeveloped into four buildings similar in character to the adjacent complex with a circular parking lot and interconnected driveway.

5.2 ADJOINING DATABASE LISTINGS

The adjacent properties, as observed by ERM at the time of the Property Visit, are summarized in the table below.

Marvell Technologies Group (2315 N 1st St) is located approximately 375 feet southeast and upgradient of the Subject Property. This entity is classified in the EPA's Air Emissions Inventory (EIS) as an "unknown" manufacturer of electronic components and within the ECHO database as a producer of PFAS (PFAS ECHO). No records of releases or violations exist but due to the site's upgradient proximity to the Subject Property, the presence of PFAS generation is worth noting.

No obvious environmental concerns associated with surrounding properties were observed during ERM's Property Visit or review of historical sources.

Additional information regarding regulatory database entries associated with adjoining properties is presented in Table 5-2 below.

Based on ERM's review, the properties adjoining the Subject Property do not represent an environmental property contamination concern for the Subject Property.

TABLE 5-2 ADJOINING PROPERTIES DISCUSSION

Direction	Regulatory Database Listing(s)	Discussion
North	HWTS, HAZNET, HAZMAT, RCRA NonGen	The northeastern adjoining property is occupied by Google Inc (2460 N 1st Street). Google Inc. is listed as a small quantity generator of the following hazardous wastes: off-specification, aged or surplus organics; off-specification, aged or surplus inorganics; alkaline solutions; ignitable waste; and corrosive waste. No violations have been reported. This generator is listed as inactive as of 30 June 2019 and does not pose significant concern.
North	CPS-SLIC, Brownfields, CERS, HWTS, HAZNET, HAZMAT	North of Google Inc. in the northeastern adjoining property is occupied by Equity Office at 2480 N 1st St. A hydraulic elevator jack failed in 1985 releasing approximately 40 gallons of hydraulic fluid into the ground beneath the building. Remediation efforts targeted groundwater extraction and treatment. As of 2007, no petroleum hydrocarbons have been detected in any monitoring wells. This case has been closed as of 29 September 2008. This generator does not pose significant concern.
North	CERS TANKS, HAZMAT, CERS,	The northeastern adjoining property is also occupied by KNTV Television LLC (2450 N 1st St). This entity is listed as controlling 4,000 gallons of aboveground petroleum storage. Between 2016

Direction	Regulatory Database Listing(s)	Discussion
	RCRA-SQG, RCRA NonGen	and 2022, the following violations were reported: failure to obtain a hazardous waste storage identification number, failure to provide initial petroleum handling and spill prevention training, failure to complete and electronically submit a site map, emergency response plan, and a hazardous material business plan (HMBP), failure to have appropriate certification for the Spill Prevention Control and Countermeasure (SPCC) Plan, failure to provide training materials to inspector, failure to test or inspect each container for integrity per the established SPCC Plan, failure to ensure a professional engineer makes all required attestations in the SPCC plan, failure to include contacts and procedural information for reporting on discharges within the SPCC plan, failure to conduct an annual spill prevention briefing, failure to properly label hazardous waste accumulation containers, and failure to comply with containment requirements for universal waste aerosol cans. Additional violations include accumulation of universal waste. The entity returned to compliance for all violations on or prior to 17 November 2022. Given that all violations came back into compliance, this adjoining property does not pose a significant concern to the Subject Property.
East	CERS TANKS, EMI, HAZMAT	The southeastern adjoining property is occupied by Marvell Technologies Group (2315 N 1st St). This entity is listed as controlling aboveground petroleum storage in an amount up to 3000 gallons. Between the years 2019 and 2024, up to six violations occurred pertaining to missing or inadequate SPCC plans, lack of or inadequate secondary containment, and failure to conduct routine tests and inspections. The entity returned to compliance on or before 9 January 2024. Given that all violations came back into compliance, this adjoining property does not pose a significant concern to the Subject Property.
West	HIST UST, RCRA-SQG, SWEEPS UST, CPS-SLIC, CERS	The northwestern adjoining property was historically occupied by Watkins-Johnson and contained a UST with a nearly 12,000 gallon capacity which, according to records, was empty when inspected in 1988. According to samples collected on site in the 1990s, it appears very low VOCs have been historically present in two of eight shallow groundwater wells at concentrations slightly above the maximum allowable amounts for drinking water. It was determined the release was small and localized, thus no further action by the San Francisco Bay Regional Water Quality Control Board was recommended. Given the closed nature of the listing, this property does not pose a significant concern to the Subject Property.

5.3 SURROUNDING PROPERTIES DATABASE LISTINGS

The following other listed surrounding facilities are worthy of note and further discussion:

Symmetricom Inc. (2300 Orchard Parkway) is located approximately 500 feet due south and upgradient of the Subject Property. This entity has been identified as a large quantity generator (LQG) of a variety of hazardous wastes, including, but potentially not limited to: ignitable waste (D001), corrosive waste (D002), spent nonhalogenated solvents (F003), and lead (D008). Additionally, BSREP II 2300 Orchard Parkway LLC is located within the same property and is

classified in the EPA's Air Emissions Inventory (EIS) as an "unknown" manufacturer of semiconductors and related devices and within the ECHO database as a producer of PFAS (PFAS ECHO). Due to a lack of documented releases or violations, neither of the facilities at 2300 Orchard Parkway are expected to pose a significant concern to the Subject Property. However, the presence of PFAS generation is worth noting.

Atmel Corporation (2325 Orchard Parkway) is located approximately 1,000 feet south-southwest of the Subject Property. It's listed in the EPA's Air Emissions Inventory (EIS) as a semiconductor and related device manufacturer and within the ECHO database as a producer of PFAS (PFAS ECHO). No records of releases or violations exist but due to the site's upgradient proximity to the Subject Property, the presence of PFAS generation is worth noting.

Additionally, approximately 250 feet due east of the site, 2380 N 1st St. has been historically occupied by Mike S Chevron Service and Toth S Chevron service from 1966-1970. No additional records exist pertaining to these sites; however this does not rule out the potential presence of abandoned underground storage tanks (USTs). The site is upgradient from the subject property but is not expected to pose a significant concern.

Vander-Bend Manufacturing LLC (119 Component Drive) is located approximately 1,00 feet north-northeast cross-gradient to the Subject Property. The site is classified as a metal coatings manufacturer within the Integrated Compliance Information System's National Pollutant Discharge Elimination System (ICIS-NPDES) and within the ECHO database as a producer of PFAS (PFAS ECHO). Additionally, this facility is listed within the CERS as a chemical storage facility and has numerous associated violations since 2019, all of which have returned to compliance. Due to the lack of documented releases and cross-gradient proximity to the Subject Property, this site is not expected to pose a significant concern to the Subject Property.

M.E. Fox and Company (128 Component Dr) is located approximately 1,000 feet northeast cross-gradient of the Subject Property. The site is listed as a case-closed Leaking Underground Storage Tank (LUST) Cleanup Site. Clean up efforts were overseen by the Santa Clara Valley Water Department. Groundwater data at time of closure on 20 November 2013 reports 33 parts per billion (ppb) of methyl tert butyl ether (MTBE) and 150 ppm of total petroleum hydrocarbons (TPH). Due to the site's cross-gradient relationship and distance to the Subject Property, this site is not expected to pose a significant concern.

6. CONCLUSIONS

ERM has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527 of the Subject Property (as defined in Section 1 of this report). Exceptions to or deletions from this practice are described in Section 1.3.4 of this report. As summarized below, no issues were identified in connection with the Subject Property in this Phase I ESA.

Summary of Identified Issues
ASTM E1527-21 Findings
Recognized Environmental Conditions (RECs)[2]
• No RECs were identified in connection with the Subject Property.
Controlled Recognized Environmental Conditions (CREC)[2]
• A recorded *Agreement Containing Covenants Running with the Land* was identified for the Subject Property. According to remedial documents available on GeoTracker, the covenant was recorded on February 13, 2001, and prohibits residential use of the Subject Property. The restriction constitutes an activity and use limitation that remains applicable to the Subject Property and, therefore, is considered a CREC.
Historical Recognized Environmental Conditions (HRECs)[2]
• Historical arsenic impacts associated with former orchard operations at the Subject Property were identified during environmental investigations conducted by Apple, Inc. in 2015 and 2016 as part of due diligence and redevelopment planning for the larger 2347 and 2351 North 1st Street property assemblage, which includes the Subject Property. Arsenic impacts were investigated, delineated, and remediated under oversight of the Santa Clara County DEH. Apple, Inc. completed excavation and off-site disposal of approximately 15,100 cubic yards of impacted soil as part of redevelopment of the larger 2347 and 2351 North 1st Street properties in 2016. Following confirmation that remaining arsenic concentrations in residual site soils met the approved remedial goal of 17 mg/kg, the Santa Clara County DEH issued a No Further Action determination on March 21, 2017. Accordingly, the former arsenic soil impacts are considered an HREC.
***De minimis* conditions**
• No de minimis conditions were identified.
Other Potential Issues
• No other potential issues were identified.

6.1 OPINION ON ADDITIONAL ASSESSMENT

The Environmental Professionals for this project are of the opinion that additional assessment is not recommended in connection with the Subject Property.

[2] Key ASTM definitions, including REC, CREC, HREC, and de minimis condition, are provided in Section 8.

7. REFERENCES

The following sources were used in conducting the Phase I ESA detailed in this report. Where information obtained from these sources was determined to be useful by the Environmental Professional, it is summarized in the body of this report. Copies of prior environmental reports and other pertinent documents are appended.

8. LIMITATIONS AND OTHER CONSIDERATIONS

8.1 GENERAL LIMITATIONS

A number of exclusions and limitations are associated with this assessment. These are briefly outlined below:

- This report has been prepared by ERM exclusively for Client and any of its affiliates associated with the contemplated transaction and may not be relied upon by any other recipient, person, or entity (together, henceforth, "Other Recipient") without ERM's express, written permission. ERM makes no warranties or representations to any Other Recipient, has no obligation to advise any Other Recipient regarding changes to this report or changes in applicable laws and regulations subsequent to the date of this report, and NOTWITHSTANDING DELIVERY OF THIS REPORT BY ERM OR CLIENT to such Other Recipient party(ies) is provided for informational purposes only, without the right to rely. In receiving this report, any Other Recipient agrees that (a) it will make no claim against ERM that relates in any way to this report, or the Other Recipient's access to this report, and (b) to the fullest extent permitted by applicable law, Other Recipient hereby releases ERM from, and will defend and hold harmless ERM from and against, any claim, action, suit, damage, loss, award, liability, expense, cost, or fees including attorneys' fees arising from or relating to any use or disclosure of the report or any portion thereof by Other Recipient or any third party to whom Other Recipient discloses the Report. Notwithstanding the foregoing, if requested, ERM will issue reliance letters allowing lenders or other interested parties to rely on the contents of this report, in accordance with ERM's terms and conditions, for financing or other purposes.
- ERM is a sustainability consulting firm, and as such we make no representations regarding questions of legal or accounting interpretation. Consultation with an attorney and/or certified accountant should be made with respect to any legal or accounting matters, or items that require such interpretation, under any law, regulation, or contract.
- The conclusions presented in this report represent ERM's professional judgment based on the information made available to us during the course of this assessment and are true and correct to the best of ERM's knowledge as of the date of this report.
- ERM did not independently verify all the information provided by Client, information on publicly available databases, or information obtained from applicable regulatory agencies. Therefore, our findings are accurate and complete only to the extent that information provided to ERM was itself accurate and complete.
- No sampling or testing of soils, waters, or other materials was included in the assessment. However, reference has been made to previous testing and sampling, as appropriate.
- Unless otherwise stated, the compliance review did not consider annual costs associated with maintaining compliance in the normal course of business, such as costs associated with ongoing operation of existing pollution control equipment, permit renewals, and required record keeping and agency submittals.

- Unless specifically stated, our evaluation of potentially significant issues excluded costs associated with third-party actions in the event that contamination causes harm to property, the environment, or human health.
- Unless specifically stated, our evaluation of potentially significant issues did not take into account mitigating factors such as legal indemnities, insurance coverage, or third-party responsibility. In addition, ERM's evaluation of potentially significant issues did not include fines, penalties, or expenses associated with legal claims.
- Our assessment did not consider potential business interruption costs caused by sustainability issues at the Subject Property or in association with any Client operations.
- Unless otherwise stated, our assessment did not consider closure scenarios for the Subject Property. We have assumed that the Subject Property will continue to be used for its current purposes and that no major construction, renovation, or addition projects will be conducted.
- Unless otherwise stated, review of state-specific requirements related to property transfer (or ownership changes) was not included in ERM's assessment.
- Our evaluation of environmental impact issues is based on ERM's professional experience of the likely scale of investigation and remediation efforts. ERM has taken into account the environmental settings of the Subject Property, known/potential soil and groundwater issues, the vulnerability/sensitivity of known receptors, and the presence or otherwise of current regulatory triggers for investigation and/or remediation of soil and/or groundwater.

8.2 ASTM LIMITATIONS

The innocent landowner, contiguous owner, and prospective purchaser defenses to liability under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) require that a person acquiring property conduct an all appropriate inquiry with respect to the Subject Property. ERM has conducted this environmental assessment in accordance with the standards for conducting an all appropriate inquiry set forth at 40 CFR 312. Those standards require the application of scientific principles and professional judgment to certain facts with resultant subjective interpretations and exercise of discretion. Professional judgments expressed herein are based on the facts currently available within the limits of the existing data, and data gaps identified herein, scope of work, budget, and schedule. Those standards also require that the User undertake certain additional inquiries. In addition, the liability defenses under CERCLA require, among several other things, that the User after the acquisition stop any continuing releases, prevent any future threatened releases and prevent or limit human, environmental or natural resource exposure to any hazardous substance released at the Subject Property. Therefore, ERM makes no warranties, express or implied, including, without limitation, warranties as to merchantability or fitness for a particular purpose, including any warranty that this Phase I assessment will in fact qualify User for the innocent landowner, contiguous property owner, or prospective purchaser defense to liability under CERCLA. ERM's assessment is limited strictly to identifying recognized environmental conditions associated with the Subject Property. Results of this assessment are based upon the visual inspection of readily accessible areas of the Subject Property conducted by ERM personnel, information from interviews with knowledgeable persons regarding the Subject Property, information reviewed regarding historical uses, information

provided by contacted regulatory agencies, and review of publicly available and practically reviewable information identifying current and historical uses of the property and surrounding properties. All conclusions and recommendations regarding the Subject Property represent the professional opinions of the ERM personnel involved with the project, and the results of this report should not be considered a legal interpretation of existing environmental regulations. ERM assumes no responsibility or liability for errors in the public data utilized, statements from sources outside of ERM, or developments resulting from situations outside the scope of this project. We make no warranties, express or implied, including, without limitation, warranties as to merchantability or fitness for a particular purpose.

8.3 REPORT VIABILITY

The components of this report are valid for 180 days following their date of occurrence. The 180-day date is calculated from the earliest of the dates below.

TABLE 8-1 REPORT VIABILITY

Component	Date	End of 180-Day Window
Interviews with owner(s), operator(s), and occupant(s)	24 June 2026	21 December 2026
Review of federal, tribal, state, and local government records	03 July 2026	30 December 2026
Visual inspection of Subject Property and adjoining properties	26 June 2026	23 December 2026
Declaration by the Environmental Professional responsible for the assessment	17 August 2023	13 February 2024

8.4 OTHER CONSIDERATIONS

8.4.1 ENVIRONMENTAL DATABASE SEARCH

ERM contracted EDR to conduct a database search for agency records. The appended database report defines and summarizes the ASTM databases reviewed in the EDR report and notes if any listed facilities (including the Subject Property) were identified in the specified radius. The locations of the listed facilities identified in the EDR report were evaluated to determine which listed facilities were located within the ASTM specified search distance from the Subject Property boundary. Only those listed facilities worthy of further discussion are discussed within the applicable sections of this report and data on additional listed facilities is included in the appended EDR database report.

It should be noted that the computerized geocoding technology used in the database search is based on available census data and is only accurate to ±300 feet. The EDR report provides a list of unmapped facilities for which inadequate location information was provided. ERM has reviewed the list of “unmapped” listed facilities to determine if these listed facilities are within the study

radius. If the “unmapped” listed facilities appeared likely to be within the search radius for a specific database, they are discussed in the applicable sections of this report.

Listed facilities identified within the study radii were evaluated to determine if they are likely to have adversely impacted the Subject Property. The criteria used to evaluate the potential for adverse impact to the Subject Property include:

- Distance from the Subject Property
- Expected depth and direction of groundwater and surface water flow
- Geology and physical ground conditions
- Expected storm water flow direction
- The presence/absence of documented contaminant releases at the identified sites that have not been remedied to the satisfaction of regulators
- The current regulatory status of the listing

The identification of a listed facility as potentially upgradient or downgradient is based on the expected direction of groundwater flow referenced in Section 2.3.

8.4.2 USER-PROVIDED INFORMATION

ERM contacted the User with respect to the following information:

- An evaluation of the presence of Environmental Cleanup Liens for the Subject Property
- Activity and Use Limitations such as engineering controls (e.g., slurry walls, caps) and land use restrictions or institutional controls (e.g., deed restrictions, covenants) that may be in place for the Subject Property
- Specialized Knowledge that includes personal knowledge or experience related to the Subject Property or nearby properties based on professional experience or knowledge of the Subject Property
- Fair Market Value to evaluate whether a purchase price is significantly below Fair Market Value
- Obvious Indicators that involve past or present spills, stains, releases, cleanups on or near the Subject Property
- Common Knowledge about specific chemicals, possible contamination, or past use of the Subject Property and surrounding area

Relevant information provided by the User is summarized under the appropriate headings of this report, and in the following table:

TABLE 8-2 USER-PROVIDED INFORMATION

User Request	Response
Environmental Cleanup Liens	User is not aware of an Environmental Cleanup Liens for the Subject Property.
Activity and Use Limitations (AULs) and land use restrictions or institutional controls	User is aware of land use restrictions or institutional controls for the Subject Property. The user cited a document dated 13 February 2001

User Request	Response
	entitled, *Agreement Containing Covenants Running with the Land,* but did not provide details as to the nature of this covenant. However, separate GeoTracker records indicate the covenant prohibits residential land use of the Subject Property and adjoining properties.
Specialized Knowledge	The user provided the following information: "In 2016, shallow soils across the Site containing concentrations of arsenic above environmental screening levels, as well as soils containing DDT compounds, were excavated and removed offSite in accordance with a Work Plan prepared by EKI, dated 21 May 2016, that was approved by Santa Clara County DEH. The soil remedial action was documented in a Completion Report, prepared by EKI, dated October 12, 2016. The EKI Completion Report was approved by Santa Clara County DEH with no further action in a letter, dated 21 March 2017 (see SCCDEH Case No. 2016-20s; Geotracker Global ID: T10000008928)."
Obvious Indicators that involve past or present spills, stains, releases, or cleanups	The user provided the information above in response to this request.
Common Knowledge about specific chemicals, possible contamination, or past use	The user provided the following information: "Agricultural chemicals, e.g., arsenic, pesticides, e.g., DDT, applied during past use."

8.5 KEY ASTM DEFINITIONS

ASTM E1527-21 prescribes the following definitions:

Recognized environmental condition (REC): "the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment...."

Controlled REC (CREC): "…recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)…."

Historical REC: "…a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition...."

De minimis condition: "…a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition…."

Data gap: "…a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the Property visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.)…."

Significant Data Gap: "…a data gap that affects the ability of the environmental professional to identify a recognized environmental condition…."

Data failure: "…a failure to achieve the historical research objectives…even after reviewing the standard historical sources…that are reasonably ascertainable and likely to be useful…."

User: "…the party seeking to use Practice E1527 to complete an Environmental Site Assessment of the subject property. User may include, without limitation, a potential purchaser of subject property, a potential tenant of subject property, an owner of the subject property, a lender, or a property manager. A User seeking to qualify for an LLP to CERCLA liability, or a User that is an EPA Brownfield Assessment and Characterization grantee, has specific responsibilities for completing a successful application of this practice…."

9. ENVIRONMENTAL PROFESSIONAL CERTIFICATION

This Phase I ESA was conducted by N. Quiroz of ERM. Ms. Debbie Lind reviewed the contents of this report. The professional qualifications for Ms. Lind are appended to this report. Ms. Lind meets the definition of Environmental Professional as defined in 40 CFR 312.10 and have prepared the following declaration and signed in accordance below.

- I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR 312.10.
- I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ERM - West, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Mr. Michael Steiger (msteiger@apple.com)
Apple Inc.

Subject: **Voluntary Cleanup Program Case Closure: Apple N1 Campus**
2347-2351 North First Street, San Jose, CA
Case No: 2016-20s GeoTracker Global ID: T10000008928

Dear Mr. Steiger:

This letter confirms the completion of site investigation and corrective action activities for the release of waste located at the above-described location (Site). Thank you for your cooperation throughout this investigation and corrective action. Your willingness and promptness in responding to our inquiries concerning the release of waste are greatly appreciated.

Based on information in the above-referenced file, and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at the above-referenced site satisfies the cleanup goal requirements of the remedial action agreement between the responsible party and the Department of Environmental Health (DEH) as outlined in Section 101480 of the Health and Safety Code, and that no further action related to the release of waste at the site is required at this time. It should be noted that any additional or previously unidentified contamination at this site may require further investigation or cleanup.

Current Site status: The remaining concentrations of Arsenic in shallow soil are at or below the approved remedial goal of 17 parts per million (ppm). The Site is currently a vacant lot that has been fenced and seeded to allow for native vegetation and dust suppression.

The reports and/or technical documents the DEH relied on to evaluate case closure can be located on GeoTracker and are titled:

1. *Remedial Action Work Plan – Removal of Arsenic-Containing Soils*, dated May 12, 2016.
2. *Completion Report – Removal of Arsenic-Containing Soils,* dated October 12, 2016.

Site Management Requirements: Residual contamination remains at the Site. The DEH has determined that the levels of contamination remaining pose a low risk to human health and the environment under current land and Site use conditions; however the residual contamination could pose an unacceptable risk under certain site development activities such as changes in land use. The DEH understands that the Site is planned for redevelopment. The appropriate precautions should be taken, including a notification to site workers, while working in the areas of residual contamination to protect human health and the environment.

Board of Supervisors: Cindy Chavez, Mike Wasserman, Dave Cortese, Ken Yeager, S. Joseph Simitian
County Executive: Jeffrey V. Smith

The DEH shall be notified if water wells are planned on the property and if any unexpected contamination or hazardous material is encountered in the subsurface during property redevelopment.

This notice is issued pursuant to subdivision (e) of Section 101480 of the Health and Safety Code. Please contact our office if you have any questions regarding this matter.

Sincerely,

Michael Balliet
Interim Director
Department of Environmental Health

1555 Berger Drive #300
San Jose, California 95112

Dear Mr. Costa:

On behalf of its client, Apple Inc. ("Apple"), Erler & Kalinowski, Inc. ("EKI") is pleased to present to the Santa Clara County Department of Environmental Health ("SCCDEH") this *Remedial Action Work Plan* for the removal of arsenic-containing soils at the property located at 2347-2351 North First Street in San Jose, California ("Site"). This *Remedial Action Work Plan* describes the nature and extent of contamination within the proposed Project Area of the Site, the remedial action objectives and Site-specific cleanup goals for the Site to meet the objectives, and planned remedial action approach.

This work will be performed under the Voluntary Cleanup Program ("VCP") with the SCCDEH Hazardous Materials Compliance Division.

Please let us know if you have any questions regarding this *Remedial Action Work Plan*.

Very truly yours,

ERLER & KALINOWSKI, INC.

Appendix A Copies of Analytical Laboratory Data Reports for 2016 Soil Sampling

1 INTRODUCTION

On behalf of Apple Inc., ("Apple"), Erler & Kalinowski, Inc. ("EKI") is pleased to submit to the Santa Clara County Department of Environmental Health ("SCCDEH") this *Remedial Action Work Plan* for a portion of the site located at 2347-2351 North First Street in San Jose, California ("Site") (Figure 1). This work is being performed under the Voluntary Cleanup Program ("VCP") with the SCCDEH Hazardous Materials Compliance Division. The Site is approximately 43 acres in size and is currently vacant and vegetated. No structures or improvements exist on the Site, with the exception of Component Drive, which is a private roadway easement that bisects the Site, connecting North First Street with Orchard Parkway. The Subject Property is located in a mixed office and light industrial area of north San Jose.

Apple recently acquired the Site for eventual commercial development. No residential development of the Site is proposed. A Deed Restriction for the Site is currently in place (*Agreement Containing Covenants Running with the Land*, recorded with Santa Clara County on 13 February 2001) that prohibits residential land use of the Site.

The objective of this *Remedial Action Work Plan* is to remove soils containing arsenic that are present in the eastern, former orchard, portion of the Site. Based on soil sample data collected by EKI on the Site in 2015 and 2016, certain organochlorine pesticides ("OCPs"), arsenic, and lead are present in shallow soil, presumably from past application of agricultural chemicals during former agricultural use of the Site. Only arsenic is present in shallow soil at concentrations above its typical background concentration and potential screening level for commercial land use, and only in the eastern portion of the Site, i.e., southeast of Component Drive. In the western, non-former orchard, portion of the Site, northwest of Component Drive, arsenic is not present in soil at concentrations above its typical background concentration and potential screening level for commercial land use; thus, these areas of the Site do not require remedial actions. The intent of the proposed remedial action described herein is to reduce concentrations of arsenic in soil in the eastern portion of the Site (referred to herein as the "Project Area") to concentrations at or below its typical background concentration through excavation and off-site disposal of the affected soils. Once the remedial action is completed and the remedial action objective achieved, no long-term land use controls or operations and maintenance ("O&M") plan will be required or needed within the Project Area. A post-remedial action Completion Report will be prepared and submitted to SCCDEH for its approval.

2 BACKGROUND

This section of the *Remedial Action Work Plan* provides a Site background overview.

2.1 Current Site Setting

The Site consists of approximately 43 acres of vacant property located at the intersection of North First Street and Component Drive in San Jose, California (see Figure 1). The Assessor's Parcel Number for the Site is 101-02-011, and the street address is listed as 2347-2351 North First Street. No structures or improvements exist on the Site, with the exception of Component Drive, which is a private roadway easement that bisects the Site, connecting North First Street with Orchard Parkway. The Site is located in a mixed office and light industrial area of north San Jose. The Site is currently vacant and is unused.

A buried jet fuel conveyance pipeline and associated easement traverses the northwestern boundary of the Project Area in a northeast to southwest orientation and roughly parallels Component Drive along its southeast side (see Figure 3). The approximately 8-inch diameter metal pipeline, which was installed through the Site around 2010, is owned and managed by Wickland Pipelines, LLC.

According to the 1980 U.S.G.S. topographic map for the Site and vicinity (Milpitas Quadrangle), the ground surface elevation of the Site is approximately 30 feet above mean sea level, and slopes gently downward to the north-northwest toward San Francisco Bay.

Based on soil cuttings observed during subsurface sampling activities conducted on the Site by EKI in June 2015, shallow soils consist primarily of clays with narrow lenses of inter-bedded sands and silts to the total depth explored of approximately 20 feet below ground surface.

The depth to first-encountered groundwater at the Site was observed in 2015 to be approximately 15 feet below ground surface. The direction of shallow groundwater flow at the Site is not known, but is inferred to flow generally to the northwest.

2.2 Site Use History

The eastern portion of the Site, i.e., the area southeast of Component Drive between North First Street and Orchard Parkway, was used as orchards from the 1940s through the 1970s. This area was converted into row crops during the 1980s and 1990s. Since around 2000, the Site has remained vacant and vegetated with native grasses. The Site has never been developed other than small farm-related buildings located in the extreme eastern portion of the Site near North First Street, and construction of Component Drive through the Site around 2002.

As discussed below in Section 3, concentrations of lead and arsenic above typical background concentrations have been identified in soil in the eastern portion of the Site. As shown on Figure 2 (1968 aerial photograph), the lead and arsenic concentrations appear to be associated with a particular tree orchard that existed on the Site near North First Street. Note the darker tree coloration on Figure 2 which corresponds to the area of soil containing lead and arsenic at concentrations above typical background concentrations. This suggests that, in the past, the pesticide lead-arsenate may have been applied to this particular orchard or tree variety present on the Site at the time. The proposed soil excavation area (discussed later in this *Work Plan*) roughly corresponds to the area of darker tree coloration in the 1968 aerial photograph.

3 SUMMARY OF PRIOR SUBSURFACE SAMPLING INVESTIGATIONS

In June and July 2015, as part of pre-acquisition environmental due diligence conducted by EKI on behalf of Apple, EKI performed soil and groundwater sampling at the Site, a summary of the results of which, specific to the Project Area, is presented in Section 3.1, below. In March 2016, following acquisition of the Site by Apple, EKI performed additional soil sampling in the Project Area where, in 2015, arsenic was identified in soil at concentrations above typical background concentrations. The objective of the additional soil sampling conducted in 2016, discussed in Section 3.2 below, was to further characterize the lateral and vertical extents of arsenic concentrations in soil in the Project Area in order to develop a remedial action plan for excavation and off-Site disposal of the arsenic-containing soils.

3.1 Summary of 2015 Soil and Groundwater Investigations

In June 2015, EKI collected shallow soil samples on the Site to screen for the presence of agricultural chemicals in soil from former agricultural use of the property. A summary of the soil sample results from the Project Area is discussed below. As shown on Figure 3 and in the table below, EKI divided the Project Area into three distinct areas for sampling.

Composite Sample Area	Area Description	No. of Boreholes/ Samples per Borehole
A	Former farmstead area.	8 boreholes/3 soil samples.
B	Former orchard, northern portion.	6 boreholes/3 soil samples.
C	Former orchard, southern portion.	6 boreholes/3 soil samples.

As shown in Tables 1 and 2 of this *Work Plan*, soil samples from Areas A, B and C were collected at approximately 0.5-1 feet below ground surface ("bgs") and 2-2.5 feet bgs. The discrete soil samples collected from each borehole were composited at the laboratory to form two composite samples representing each of Areas A through C. For example, the eight shallower discrete soil samples collected from Area A boreholes were composited to form one shallow composite soil sample to represent Area A. The next deeper discrete samples collected from Area A boreholes were composited with each other to form one composite sample representing the next deeper soil zone in Area A. Thus, a total of 6 composite soil samples representing Areas A through C were analyzed initially.

The composite soil samples were analyzed for the following compounds:

- Organochlorine pesticides using U.S. EPA Method 8081;
- Title 22 metals using U.S. EPA Method 6020A; and
- Percent moisture (for comparison of sample results to published screening values which are presented in dry weight).

The two composite soil samples from Area A (former farmstead area) were also analyzed for petroleum hydrocarbons in the diesel and motor oil ranges using U.S. EPA Method 8015m.

Following receipt and review of the composite soil sample analytical results, EKI instructed the analytical laboratory to analyze the shallow (0.5-1 foot bgs) discrete soil samples collected from Areas A through C (total of 21 discrete soil samples), as the deeper composite samples at 2-2.5 feet bgs were found not to be significantly impacted by chemicals of concern.

The analytical results for the composite and discrete soil samples from Areas A through C are shown in Tables 1 and 2 of this *Work Plan*, and are compared to current (February 2016 as revised in April 2016) California Regional Water Quality Control Board ("RWQCB") Environmental Screening Levels ("ESLs") for commercial land use (see footnotes b and c in Tables 1 and 2, respectively). A discussion of the analytical results is presented below.

3.1.1 Summary of Soil Sample Analytical Results for Pesticides

As shown in Table 1, the pesticides DDE, DDD, and DDT were detected in discrete soil samples collected from Areas A through C at concentrations up to 0.807 mg/kg, 0.887 mg/kg, and 0.373 mg/kg, respectively. These maximum reported concentrations of DDE, DDD, DDT are below their respective current RWQCB commercial direct contact ESL values of 8.5 mg/kg, 12 mg/kg, and 8.5 mg/kg (RWQCB, 2016).

The OCPs dieldrin, chlordane, and toxaphene were also detected in discrete soil samples at concentrations up to 0.107 mg/kg, 0.0266 mg/kg, and 0.117 mg/kg, respectively. These reported maximum concentrations of dieldrin, chlordane, and toxaphene are below their respective current RWQCB commercial direct contact ESL values of 0.17 mg/kg, 2.2 mg/kg, and 2.2 mg/kg, respectively (see Table 1).

No other OCPs were detected above their respective laboratory reporting limits in the composite or discrete soil samples submitted for analysis.

3.1.2 Summary of Soil Sample Analytical Results for Petroleum Hydrocarbons

Petroleum hydrocarbons in the diesel fuel and motor oil ranges were not detected above their respective laboratory reporting limits in the composite soil samples submitted for analysis collected from Area A.

3.1.3 Summary of Soil Sample Analytical Results for Metals

As shown in Table 2, metals concentrations in the composite soil samples from Areas A through C were generally below their respective RWQCB commercial direct contact ESLs and/or within typical background concentrations in South Bay Area soils. The shallow soil samples collected from Areas A and B, however, contained arsenic at concentrations above its typical background concentration of 17 mg/kg (see Section 4.2, below), with arsenic concentrations in soil up to 40.9 mg/kg. Concentrations of lead in shallow soil samples were also higher than typical background concentrations and ranged up to 154 mg/kg. However, the maximum reported concentration of lead in soil samples was below the current RWQCB commercial direct contact ESL for lead of 160 mg/kg (RWQCB, 2016).

The soil data collected from 2015 suggested that arsenic was the primary chemical of potential concern in soil in the Project Area, specifically within sample areas A and B. Sample Area C of the Project Area did not appear to be significantly impacted by arsenic (see sample IDs SS-C1 through SS-C6 in Table 2).

3.1.4 Grab Groundwater Sample Collection and Analysis

In July 2015, EKI collected grab samples of shallow groundwater from five (5) boreholes advanced on the Site (GGW-1 through GGW-5; see Figure 4). Two groundwater samples (GGW-3 and GGW-4) were collected within the proposed Project Area.

Each of the five grab ground samples was analyzed for the following chemical constituents:

- Organochlorine pesticides using U.S. EPA Method 8081A;
- Ethylene dibromide ("EDB") and dibromochloropropane ("DBCP") using U.S. EPA Method 8260;
- Dinoseb using U.S. EPA Method 8151; and
- Petroleum hydrocarbons ("TPH") as jet fuel (given the presence of the buried jet fuel pipeline on-Site) using U.S. EPA Method 8015m.

The analytical results for the grab groundwater samples collected in 2015 are presented in Table 3 of this *Work Plan*, and are compared to current California Maximum Contaminant

Levels ("MCLs") and current RWQCB drinking water and aquatic habitat protection ESLs (RWQCB, 2016).

According to the analytical results, OCPs (including DDT, DDD, DDE, chlordane and dieldrin), EDB, DBCP, and dinoseb were not detected in any of the grab groundwater samples collected by EKI at concentrations above their laboratory reporting limits. It should be noted, however, that the laboratory reporting limits for certain samples and constituents were above some of the regulatory screening levels shown in the table.

Petroleum hydrocarbons as jet fuel (gasoline and diesel range hydrocarbons) were not detected in any of the grab groundwater samples collected by EKI above their respective laboratory reporting limits.

3.2 Additional Soil Characterization (March 2016)

In March and May 2016, EKI collected additional samples of shallow soil within the 2015 sample Areas A, B, and C. The purpose for the additional soil sampling was to further characterize the lateral and vertical extents of arsenic in soil within these areas, for purposes of designing and implementing a soil remediation plan.

As shown on Figure 5, Areas A and B, and the northern portion of Area C, were divided into forty-two (42) 100x100-foot grids, labeled A1 through F7. The grid locations were surveyed and laid out by MacLeod & Associates, a licensed land surveyor, and tied to a local benchmark. A hand auger borehole was advanced near the center of each grid. Soil samples were collected from each borehole at the following depth intervals below ground surface:

- Surface-0.5 feet
- 0.5 feet-1 foot
- 1 foot-1.5 feet
- 1.5 feet-2 feet
- 2 feet-2.5 feet
- 2.5 feet-3 feet

The four discrete soil samples collected from each borehole from the surface to 2 feet bgs were submitted to K-Prime, Inc. analytical laboratory in Santa Rosa, California, for analysis for arsenic. The two deeper discrete soil samples collected from each borehole were placed on hold at the laboratory pending results from the shallower samples. A total of 168 discrete soil samples from the grids were analyzed by K-Prime for arsenic and percent moisture.

In addition to collecting soil samples from the 42 grids, EKI also collect surface soil samples from the public utility/Wickland pipeline easements along Component Drive (see SS-01 through SS-07 on Figure 5), as well as the northern portion of sample Area C (see SS-08 through SS-13 on Figure 5), to provide additional surface soil characterization data along the western and southern perimeters of the grid, respectively. These 13 surface soil samples were analyzed by K-Prime for OCPs, arsenic, and lead.

The analytical results for the soil samples collected by EKI in March 2016 are presented in Tables 4 and 5 of this *Work Plan*. A summary of the results is presented below.

3.2.1 Arsenic

As shown in Table 4, arsenic was detected within the 42 grid locations at concentrations up to 39 mg/kg. The highest concentrations of arsenic were generally in the upper one foot of soil (arsenic concentrations ranging from 11.5 mg/kg to 39 mg/kg), and concentrations generally decreased with depth in the soil column. At 1.5 to 2 feet bgs, the concentrations of arsenic were generally lower and ranged from 8.12 mg/kg to 19.7 mg/kg.

The northern and western perimeter surface soil samples (SS-01 through SS-13) contained arsenic at concentrations ranging from 3.13 mg/kg to 17.8 mg/kg, with one sample (SS-05) containing arsenic at 23.9 mg/kg (see Table 5). On 5 May 2016, EKI returned to the Site to collect deeper soil samples at grid locations SS-02 and SS-05 in order to determine the planned soil excavation depths in those particular grids. As shown on Table 4, arsenic concentrations in soil decreased to 17.1 mg/kg and 13.7 mg/kg at 2 to 2.5 feet bgs in grids SS-02 and SS-05, respectively.

Concentrations of arsenic in 2016 soil samples collected from the 2015 sample Area C ranged from 8.12 mg/kg to 16.9 mg/kg; all concentrations generally at or below typical background concentrations for arsenic. Thus, based on the 2015 and 2016 soil sample data, soil containing concentrations of arsenic above typical background concentrations appears to be limited to Areas A and B on the Site, and does not extend southwest through Area C.

Following receipt of the arsenic results for the shallower soil samples on the 42 grids, EKI elected to analyze the deeper discrete soil samples (samples collected at 2-2.5 feet and 2.5-3 feet bgs) at grids A2, A3, A6, C1, C2, and E6 for arsenic, in order to determine the planned soil excavation depths within those particular grids. The concentrations of arsenic in soil at 2 to 3 feet bgs ranged from 9.93 mg/kg to 16.6 mg/kg, generally within typical background concentrations (see Table 4).

3.2.2 Lead

As shown in Table 5, the northern and western perimeter surface soil samples contained lead at concentrations ranging from 8.04 mg/kg to 71.4 mg/kg. These reported concentrations in soil samples are all below the current RWQCB commercial direct contact ESL for lead of 160 mg/kg (RWQCB 2016). No soil samples collected during the 2015 or 2016 investigations contained lead at concentrations above its current RWQCB commercial direct contact ESL. Thus, lead is not considered to be a primary chemical of potential concern within the Project Area. Moreover, since the lead is generally collocated with arsenic in soil (likely due to the past application of lead-arsenate), any remedial actions to address arsenic will also result in the removal of elevated lead concentrations in soil.

3.2.3 Organochlorine Pesticides

As shown in Table 5, the pesticides DDE, DDD, DDT, and dieldrin were detected above their respective laboratory reporting limits in the perimeter surface soil samples, but at concentrations below their respective RWQCB commercial direct contact ESLs. As shown in Tables 1 and 5, no soil samples collected within the Project Area during the 2015 and 2016 investigations contained organochlorine pesticides at concentrations above their respective RWQCB commercial direct contact ESLs. Thus, OCPs are not considered to be primary chemicals of potential concern within the Project Area. As above, the proposed remedial actions to address arsenic will also result in significant removal of OCPs in shallow soil even though OCP concentrations in soil are less than their respective current direct contact ESLs.

4 PROPOSED REMEDIAL ACTION

4.1 Objective of the Remedial Action

The objective of the proposed remedial action is to reduce concentrations of arsenic in soil within the Project Area to a concentration at or below 17 mg/kg (the "remedial goal") through excavation of the affected soils and off-Site disposal to an appropriately-permitted facility. Once the remedial action is completed and the remedial goal is achieved, no long-term land use controls or operations and maintenance ("O&M") plan will be required because the Project Area will be remediated to background levels, and residual lead and OCP concentrations are less than commercial direct contact ESLs. A Deed Restriction is currently in place at the Site that restricts residential land use. A post-remedial action Completion Report will be prepared and submitted to SCCDEH for its approval.

4.2 Soil Remedial Action Goal for Arsenic

The proposed remedial goal for arsenic in soil as part of this planned removal action is 17 mg/kg. The current RWQCB commercial direct contact ESL for arsenic is 0.31 mg/kg (RWQCB, 2016; Table S-1), which is lower than naturally-occurring background concentrations of arsenic in soil in the South Bay. Thus, it is not possible to remediate arsenic soils to levels below typical background concentrations. Therefore, the proposed remedial goal for soil in the Project Area is 17 mg/kg. A remedial goal for arsenic of 17 mg/kg has been approved by the California EPA Department of Toxic Substances Control ("DTSC") on a number of soil remediation and redevelopment sites in the South Bay, as presented below.

4.2.1 Example Projects with Arsenic Background Approved at 17 mg/kg

Below is a listing of recent remediation and redevelopment sites in Santa Clara County, California, where the DTSC, as lead regulatory agency, has approved 17 mg/kg arsenic as the background concentration and remedial goal for commercial land use. The project sites listed below are located within 3 to 5 miles from the Site, and have similar past orchard use. Each of the documents referenced below is available on the DTSC Envirostor online database.

Example Project No. 1

Project Site: Morse Park, 1010-1024 Morse Avenue, Sunnyvale, California.
Envirostor ID: 60001425
Final Removal Action Work Plan (RAP): Dated 18 January 2012, prepared by EKI.
RAP proposed to use the Site-specific background concentration of arsenic in soil of 17 mg/kg as the Site-specific clean-up goal for arsenic. The background concentration of 17 mg/kg was calculated as the 95% upper tolerance limit of the 95th percentile of the background arsenic population. As such, this value represents an upper threshold for

naturally-occurring arsenic in the area, although statistically, background levels of arsenic in some individual samples may be somewhat higher than 17 mg/kg.
DTSC Approval: DTSC approved the RAP in a letter dated 19 January 2012.

Example Project No. 2
Project Site: Santa Clara Technology Campus 1, Santa Clara, California.
Envirostor ID: 60001922
Final Response Plan: Dated 16 January 2014, prepared by EKI.
Response Plan proposed a remedial goal for arsenic of 17 mg/kg, based on the background concentration.
DTSC Approval: DTSC approved the Response Plan in a letter dated 16 January 2014.

Example Project No. 3
Project Site: Santa Clara Square Retail, Santa Clara, California.
Envirostor ID: 60001968
Final Response Plan: Dated 24 July 2014, prepared by EKI.
Response Plan proposed a remedial goal for arsenic of 17 mg/kg, based on the background concentration.
DTSC Approval: DTSC approved the Response Plan in a letter dated 25 July 2014.

Example Project No. 4
Project Site: Santa Clara Square Office, Phases II and III, Santa Clara, California.
Envirostor ID: 60002133
Final Response Plan: Dated June 2015, prepared by Roux Associates, Inc.
Response Plan proposed a remedial goal for arsenic of 17 mg/kg, based on the background concentration.
DTSC Approval: DTSC approved the Response Plan in a letter dated 17 June 2015.

Thus, based on the above, an arsenic concentration of 17 mg/kg was an appropriate remedial goal for arsenic in soil at a neighborhood park and planned commercial redevelopment sites, and is an appropriate remedial goal for the Site, as proposed herein.

4.3 Description of Planned Soil Removal Action

This *Remedial Action Work Plan* proposes the excavation of approximately 19,000 cubic yards of arsenic-containing soil from within the Project Area and off-Site disposal of the affected soil at an appropriately-permitted disposal facility.

The planned soil excavation areas and excavation depths are shown on Figure 6. Based on the soil data discussed above in Section 3, and proposed remedial goal, soil will be excavated to depths ranging between 1 foot and 2 feet bgs within the majority of the grids.

As shown on Figure 6, soil within grids A7, B7, C7, D7, E7, F1 and F3, as well as the perimeter, i.e., "SS" grids, (with the exception of grids SS-02 and SS-05) will not be excavated, as arsenic concentrations in soil in these areas to the depth sampled of 2 feet bgs do not exceed the proposed remedial goal of 17 mg/kg. Soil within perimeter grids SS-02 and SS-05 will be excavated to a depth of 2 feet bgs to remove soil containing arsenic above the remedial goal.

Figure 7 depicts the arsenic concentrations in soil that are representative of the bottom of the planned excavation. For example, at grid A1, soil will be excavated to a depth of 1.5 feet bgs, so the soil sample from 1.5 to 2 feet bgs (see Table 4) represents the bottom of the excavation with an arsenic concentration of 14.5 mg/kg. As discussed further in Section 4.5.7, these pre-excavation samples are proposed as post-excavation bottom confirmation samples.

4.4 Pre-Soil Removal Activities

This section describes the activities that will be performed prior to soil excavation activities.

4.4.1 Regulatory Approvals, Contractor Selection, and Permitting

The main tasks to be performed following approval of this *Work Plan* by SCCDEH and prior to commencement of Site remedial actions are summarized below.

- Completion of Contract Documents for procurement of a Contractor to perform the soil remedial action.
- Contractor procurement of necessary permits, and utility clearances prior to the commencement of excavation activities at the Site.

To comply with the Construction Activities Storm Water General Permit (State Water Resources Control Board ("SWRCB") Order No. 2009-0009-DWQ), the Contractor shall prepare a Storm Water Pollution Prevention Plan ("SWPPP") and submit a Notice of Intent ("NOI") to the SWRCB.

The Contractor will also comply with all applicable provisions of the *Revised Mitigation Monitoring and Reporting Program, Conforming PD Rezoning, Development Agreement Amendment, and Tentative Map for the Orchard Parkway Properties, NFS Land,* prepared by City of San Jose, dated January 2016 ("MMRP"). Specific provisions are provided for in the following MMRP sections:

- MM AQ-2 (dust control)
- MM CUL-1.1 (cultural resources monitoring)
- MM GEO-1 (erosion control)
- MM HAZ-1 (Site health & safety)
- MM HYD-1 through HYD-4 (storm water controls)

Although not specifically required by the MMRP, a survey for burrowing owls will be performed prior to the commencement of excavation activities by the Contractor, e.g., prior to mobilization to the Site and ground disturbance.

4.4.2 Utility Clearance

The Contractor will notify Underground Services Alert to clear excavation areas of utilities at least two working days in advance of initiating earth work activities.

4.4.3 Initial Site Preparation

Prior to initiation of earth work activities, the Contractor's field crew will conduct initial mobilization activities that are non-invasive. The activities include setting up a temporary field office trailer (if necessary), constructing "rumble pads" at two Site entrances designed to prevent tracking of soil onto streets, marking the excavation areas, and other pre-excavation activities, as necessary.

4.4.4 Preparation of Plans

The project civil engineering firm (BKF Engineers) will prepare the following plans and applications and will submit these to the City of San Jose and/or SCCDEH, as appropriate:

- Grading and Drainage Application and Plans
- Storm Water Pollution Prevention Plan (SWPPP)
- Haul Route Application and Haul Route Map

Copies of these plans, as appropriate, will be retained on-Site during soil excavation activities.

4.5 Soil Removal Activities

4.5.1 Excavation Equipment and Methods

The specific equipment and means that will be utilized to implement the soil excavation work will be at the discretion of the Contractor. It is anticipated that the soil excavation project can be accomplished with standard excavation equipment. The equipment expected to be used at

the Site includes track-mounted hydraulic excavators, backhoes, water trucks, end dump trucks, bulldozers, and compactors.

Excavated soils will be direct-loaded into trucks for off-Site removal and disposed at an appropriately-permitted disposal facility. No temporary stockpiling of soil on-Site is proposed. EKI has collected representative soil samples from within the planned excavation area for disposal characterization, although the analytical results have not yet been received. These results will be provided to the proposed receiving facility for profiling and waste acceptance. EKI will also forward the results of the disposal characterization samples to SCCDEH, as well as the name of the proposed receiving facility, when selected.

Dewatering of groundwater is not anticipated to be conducted during excavation activities given the depth to groundwater of approximately 12 to 15 feet below ground surface.

4.5.2 Soil Management Protocols for Stained or Odorous Soil

Although not anticipated, if visibly stained or odorous soil is encountered during soil excavation activities, the protocols summarized below will be followed:

- All earth work will stop in the immediate vicinity of the visibly-impacted soils. Apple or EKI will notify SCCDEH and representative evaluation samples will be collected and analyzed to evaluate the type of chemical and concentrations in the visibly-impacted soil. Chemical analyses of soil samples will include organochlorine pesticides, petroleum hydrocarbons, polycyclic aromatic hydrocarbons ("PAHs"), VOCs, and Title 22 metals. If the list of chemical analyses for the evaluation samples differs from those listed here, the SCCDEH will be consulted.

- The visibly-impacted soil will be segregated from the soil being removed from the Site until analytical results are available and SCCDEH is consulted.

- If chemical concentrations in the evaluation soil samples exceed published screening criteria for commercial land use (such as RWQCB direct contact ESLs), the SCCDEH will be informed and EKI will discuss potential options with SCCDEH for addressing the affected soil.

4.5.3 Management of Unknown Underground Structures Uncovered During Remediation Activities

In the event an unknown underground container or structure (e.g., underground storage tank, sump, drum or pipe) that could have contained potentially hazardous materials is discovered during soil excavation activities, all work in the immediate vicinity of the underground

container or structure will cease and Apple and SCCDEH will be notified. Such containers and structures, if any, and all associated piping or other appurtenances will be removed in accordance with applicable laws and regulations, the requirements in this *Work Plan*, and the management protocols described below:

- The Contractor will notify Apple and EKI if a below-grade structure is discovered. Apple or EKI will be responsible for notifying SCCDEH.

- If the structure is a former petroleum-containing underground storage tank ("UST"), Apple or EKI will notify the SCCDEH and the City of San Jose Fire Department ("SJFD"). The UST will be removed in accordance with SJFD and/or SCCDEH requirements. A UST removal work plan will be prepared prior to tank removal, investigation, and closure.

- Residual liquid or sludge, if present in the encountered below-grade structure or pipeline, will be removed, placed in sealed storage containers, characterized as required by laws and regulations and as otherwise required by the permitted disposal facility, and appropriately disposed.

- The below-grade structure will be removed. Any visibly contaminated or odorous soil surrounding the below-grade structure or pipe will be managed according to the protocols described in Section 4.5 of this *Work Plan*.

- If the structure is a pipe, it may not be necessary to remove all of a discovered pipe, beyond what may be necessary to complete construction, if the pipe does not contain contaminated, hazardous, flammable, or explosive liquid, sludge, or gas. Under these conditions, the pipe may be cut, removed, and the ends capped. The removed pipe will be disposed in accordance with applicable laws and regulations. If the pipe material contains asbestos, then the material will be handled in accordance with applicable air quality and hazardous waste management laws and regulations and appropriate protocols for handling asbestos materials. As indicated above, if the pipe contains potentially hazardous materials, the materials will be removed, contained, and appropriately disposed of. The pipe will be removed and underlying soil inspected for visible contamination or odors.

- If an historical agricultural well is encountered, Apple will have the well destroyed in accordance with Santa Clara Valley Water District requirements.

The above requirements do not apply to an encountered pipe if it is an active or abandoned utility, such as sanitary sewer, water, gas, or steam lines, because they are not anticipated to have contained potentially hazardous materials.

4.5.4 Post-Excavation Depth Confirmation

Following completion of excavation activities and prior to finished grading, EKI will utilize the services of a California licensed land surveyor, to obtain the elevation of the bottom of the excavation at each grid to verify the planned excavation depths had been achieved. The lateral extents of the excavation area will also be surveyed.

4.5.5 Post-Excavation Grading and Re-Vegetation

Given the shallow depth of the excavation and lateral dimensions, no backfilling of the excavation following the soil remedial actions is proposed. Following completion of the soil excavation activities, as described above and as shown on Figure 6, and following verification that the proposed excavation depths in each of the grids has been achieved, the Contractor will grade the excavation area such that ground surfaces are smoothed and gently sloped toward a low point for storm water drainage purposes. The finished grade will slope gently downward to a storm drain catch basin that will be installed in the western portion of the Project Area. The catch basin will be connected to the storm drain system under Component Drive. The Project Area will be re-seeded with grasses native to the area. Future re-grading will ultimately be performed as development of the Site approaches. No import soil is expected to be brought onto the Site.

4.5.6 Verification of Attainment of Remedial Goal

Given the extent of pre-excavation characterization soil sampling performed, e.g., numbers of boreholes advanced over the Project Area and multiple, continuous-core soil samples collected at depth, no post-excavation confirmation soil sampling is proposed. As shown on Figure 7, based on soil data collected to date, following completion of excavation activities and verification that the planned excavation depths have been achieved through the survey, the remaining concentrations of arsenic in soil at the bottom of excavation and at the surface around the perimeter of the excavation will be at or below the remedial goal of 17 mg/kg.

5 POST-SOIL REMEDIATION ACTIVITIES

5.1 Completion Report

Following completion of the soil removal actions described above, a Remedial Action Completion Report will be prepared and submitted to SCCDEH. The Completion Report will provide a description of the work completed and will include documentation of the final survey of the excavation depth and extent, as well as soil disposal information. It is anticipated that following review and acceptance of the Completion Report, the SCCDEH will issue to Apple a Certificate of Completion or equivalent, e.g., no further action letter, for the soil remediation project.

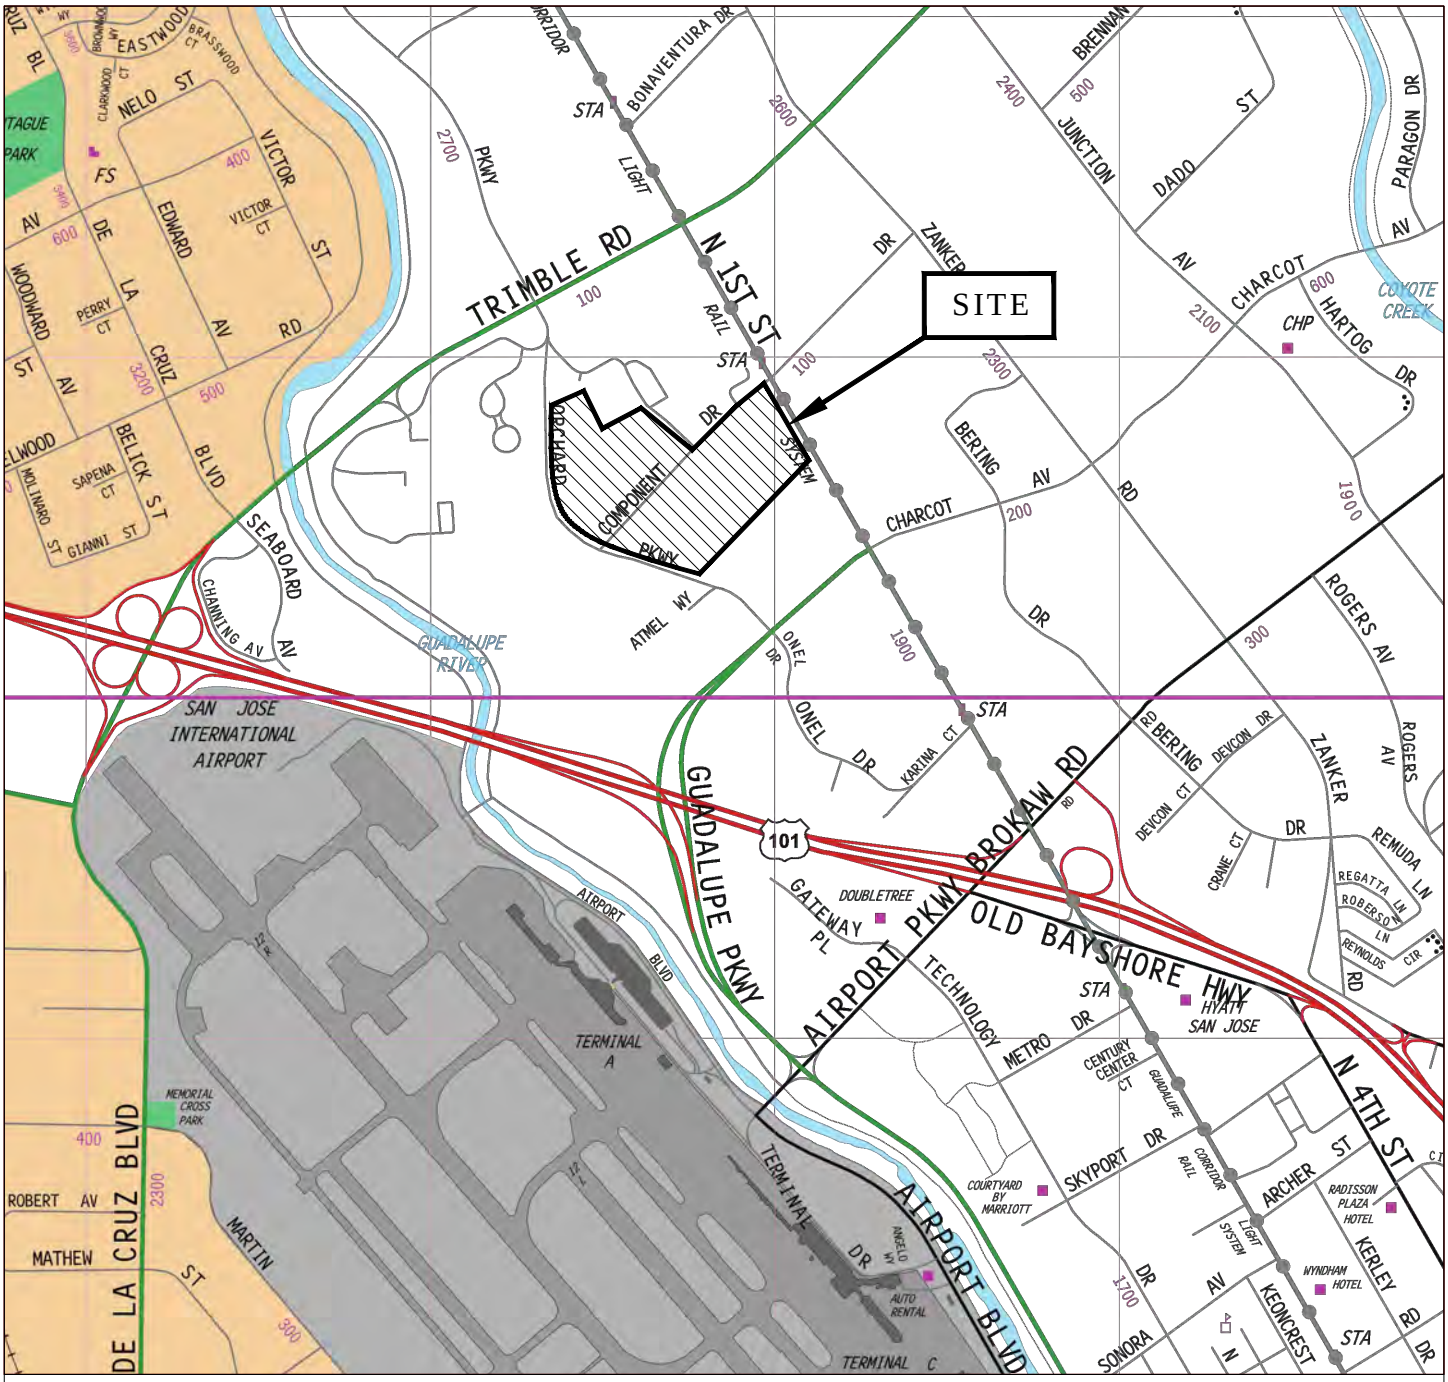

5.2 Long-Term Operations and Maintenance

The Site, including the Project Area, currently has a Deed Restriction in place that prohibits residential land use. Given that arsenic concentrations in soil within the Project Area will be reduced to at or below the remedial goal of 17 mg/kg following implementation of the soil remedial actions described herein, no long-term O&M, e.g., cap maintenance, is expected to be performed or will be needed or required. The Project Area will be re-vegetated, e.g., hydroseeded, following excavation and grading activities to reduce the potential for soil erosion. The Site will be managed as it is present-day until future Site development occurs.

COMP - Composite soil sample

Notes:

(a) Samples analyzed by K-Prime, Inc. of Santa Rosa, California. Composite results presented in Dry Weight; Discrete results in Wet Weight. Metals analyzed using EPA Method 6020A.
(b) Only those metals that were detected in the soil samples are shown on the table. Antimony, beryllium, cadmium, molybdenum, selenium, silver, and thallium were not detected.
(c) Screening levels are the RWQCB direct contact ESLs for shallow soil (commercial/industrial land use) (ESL Table S-1) (RWQCB, 22 February 2016) (Revision 2, April 2016).
(d) The current arsenic commercial direct contact ESL is 0.31 mg/kg, which is less than the background concentration of 17 mg/kg which has been accepted by the California EPA DTSC as the background concentration and remedial goal on nearby commercial redevelopment sites.

GRO - gasoline range organics
DRO - diesel range organics (C12-C23) with silica gel cleanup
EDB - ethylene dibromide or 1,2-dibromoethane
RWQCB ESLs - California Regional Water Quality Control Board, San Francisco Bay Region, Environmental Screening Levels (February 2016).
mg/L - milligrams per Liter
ug/L - micrograms per Liter
na - not applicable
ND - compound not detected above laboratory reporting limit

Notes:

(a) Samples were analyzed by K-Prime, Inc., of Santa Rosa, California.
TPH analyzed using US EPA Method 8015B (with silica gel cleanup). Pesticides using US EPA Method 3510/8081.
EDB and DBCP using US EPA Method 5030/8260. Dinoseb using US EPA Method 8151A.
(b) RWQCB ESLs Table GW-1 (February 2016; Revision 2).
(c) RWQCB ESLs Table GW-2 (Fresh Water Ecotox) (February 2016; Revision 2).

TABLE 4
Discrete Soil Sample Analytical Results for Arsenic
Project Area
2347-2351 North First Street, San Jose, CA

Abbreviations:
ft bgs - feet below ground surface
mg/kg - milligrams per kilogram

Notes:
Bold: Soil sample concentration for arsenic exceeds the Remedial Goal.
(a) Samples analyzed by K-Prime, Inc. of Santa Rosa, California.
Analytical results presented in Dry Weight.
Soil samples analyzed for arsenic using U.S. EPA Method 6020A.
(b) The current arsenic commercial direct contact ESL is 0.31 mg/kg, which is less than 17 mg/kg, which has been accepted by the California EPA DTSC as the remedial goal on nearby commercial redevelopment sites.

Environmental Screening Levels (b)			*17 (c)*	*160*	*8.5*	*12*	*8.5*	*0.17*	*2.2*	*2.2*	*na*

Abbreviations:

< - compound not detected at or above indicated laboratory reporting limit
ft bgs - feet below ground surface
mg/kg - milligrams per kilogram
ND - not detected at concentrations above laboratory reporting limits.
-- = sample not analyzed for stated compound.

Notes:

Bold = sample concentration exceeds respective environmental screening level.
(a) Samples analyzed by K-Prime, Inc. of Santa Rosa, California. Analytical results presented in Dry Weight.
Soil samples analyzed for arsenic and lead using U.S. EPA Method 3050B/6020A, and organochlorine pesticides using U.S. EPA Method 3550/8081.
(b) Screening levels are Direct Contact Soil Environmental Screening Levels for the Commercial/Industrial Worker Scenario (ESL Table S-1) (RWQCB, 2016)
(c) The current arsenic commercial direct contact ESL is 0.31 mg/kg, which is less than the background concentration of 17 mg/kg which has been accepted by the California EPA DTSC as the background concentration and remedial goal on nearby commercial redevelopment sites.

RAK hm dr 4/25/2016

SUBJECT: LABORATORY RESULTS FOR YOUR PROJECT B62001.17

Enclosed please find K Prime's laboratory reports for the following samples:

SAMPLE ID	TYPE	DATE	TIME	KPI LAB #
A2-2-2.5	SOIL	3/28/2016	10:19	141388
A2-2.5-3	SOIL	3/28/2016	10:20	141389
A3-2-2.5	SOIL	3/28/2016	10:30	141390
A3-2.5-3	SOIL	3/28/2016	10:32	141391
A6-2-2.5	SOIL	3/28/2016	11:18	141396
A6-2.5-3	SOIL	3/28/2016	11:20	141397

The above listed sample group was received on 3/28/2016 and tested as requested on the chain of custody document.

Please call me if you have any questions or need further information.
Thank you for this opportunity to be of service.

ACCT: 9115
PROJ: B62001.14

FROM: Richard A. Kagel, Ph.D.
Laboratory Director RAK 5/5/2016

SUBJECT: LABORATORY RESULTS FOR YOUR PROJECT B62001.14

Enclosed please find K Prime's laboratory reports for the following samples:

SAMPLE ID	TYPE	DATE	TIME	KPI LAB #
SS02-1-1.5	SOIL	5/4/2016	09:14	142783
SS02-2-2.5	SOIL	5/4/2016	09:20	142784
SS05-1-1.5	SOIL	5/4/2016	09:35	142785
SS05-2-2.5	SOIL	5/4/2016	09:40	142786

The above listed sample group was received on 5/4/2016 and tested as requested on the chain of custody document.

Please call me if you have any questions or need further information.
Thank you for this opportunity to be of service.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/26/2026 has revealed that there

are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/07/2026 has revealed that there are 4 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/07/2026 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/07/2026 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/07/2026 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/16/2026 has revealed that there are 35 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 10 CA LUST sites within approximately 0.5 miles of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 10 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/07/2026 has revealed that there are 24 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 37 CA CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

CA Enviroscreen 3 Score:	51-55%
CA Enviroscreen 4 Score:	35-40%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Data collected from the site reports lead, arsenic, and organochlorine pesticides thought to be used during former agricultural (orchard) land use. A remedial excavation was performed and removed soils containing lead, arsenic, and organochlorine pesticides in select project areas of the site. The accepted clean-up goal for arsenic is 17 parts per million (ppm). As of May 1, 2017, the remaining concentrations of Arsenic in shallow soil are at or below the approved remedial goal of 17 parts per million (ppm). The Site is currently a vacant lot that has been fenced and seeded to allow for native vegetation and dust suppression.

APPLE INC. (Continued) **1027131333**

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Program: HMRRP
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-31-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: I was on site at Component Drive to conduct the 2017 Hazardous Materials Business Plan Inspection David Hendricks was on site to allow facility access and records review. This report is to be emailed to David Hendricks at d5hm@pge.com by the end of today. Emergency Response Equipment is on board all service trucks. Training, OK Inventory Statement, OK Site Map and Vicinity Map, OK The CERS submittal was Submitted for CERS ID 10148441 on 6/30/2016 12:20PM by Megan Silva of PG&E (San Ramon, CA) This submittal is Under Review on 1/31/2017 by Andrew Dyer for Santa Clara County Environmental Health. See the CERS system for detail and status change to Accepted.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Aboveground Petroleum Storage

Violations:
Site ID: 424438
Site Name: 2315 N First - Sobrato
Violation Date: 04-11-2019
Citation: HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1
Violation Description: Failure to notify property owner in writing that the business is subject to the business plan program and has complied with its provisions.
Violation Notes: Returned to compliance on 04/27/2023. Facility has not notified the landlord in writing of their compliance with the hazardous materials business plan. A template letter was provided to the facility at the time of inspection.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP

MARVELL TECHNOLOGIES GROUP (Continued) **S121781829**

Violation Source:	CERS,
Site ID:	424438
Site Name:	2315 N First - Sobrato
Violation Date:	07-13-2023
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to prepare an SPCC Plan that meets all applicable requirements.
Violation Notes:	Returned to compliance on 01/09/2024. Table G-10 of the SPCC plan template was not completed correctly. Facility marked all requirements for onshore facilities as "N/A." This is incorrect as many provisions of this section apply. The required sections were reviewed with the facility at the time of inspection.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	APSA
Violation Source:	CERS,
Site ID:	424438
Site Name:	2315 N First - Sobrato
Violation Date:	04-11-2019
Citation:	HSC 6.11 25404.1 - California Health and Safety Code, Chapter 6.11, Section(s) 25404.1
Violation Description:	Failure to maintain a valid permit.
Violation Notes:	Returned to compliance on 04/27/2023. Facility does not currently have an APSA permit. Follow corrective actions written below (ONLY FOR CAVIUM BUILDING 1) to apply for this permit. Pay fees once invoice is received. NOTES: Facility must make changes to the business activities page in CERS to mark "yes" to indicate that facility stores greater than 1320 gallons of petroleum products. ONLY mark yes to this question for building 1, since this single permit will cover activities at all three sites. Marking yes to this question for all sites would result in duplicate permits that are not required. Contact inspector if you have questions about this submittal.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	APSA
Violation Source:	CERS,
Site ID:	424438
Site Name:	2315 N First - Sobrato
Violation Date:	07-13-2023
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to discuss in the SPCC Plan procedures to test or inspect each aboveground container for integrity in accordance with industry standards: 1. On a regular schedule. 2. After material repairs are made. 3. By qualified personnel. 4. The frequency and type of testing and inspections based on container size, configuration, and design.
Violation Notes:	Returned to compliance on 01/09/2024. - The provided inspection logs do not meet all the monthly and annual inspection requirements of any accepted industry standard. - Additionally, table G-5 in the SPCC plan template does not adequately describe integrity testing procedures and does not reference any accepted industry standard. During inspection, facility stated they will adopt the STI SP001 industry standard for monthly and annual inspection templates going forward.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	APSA

Violation Date:	04-11-2019
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to prepare a Spill Prevention, Control, and Countermeasures (SPCC) Plan.
Violation Notes:	Returned to compliance on 04/27/2023. Facility has not created or implemented an SPCC plan for this site. Facility must complete the Tier 1 Federal SPCC template. Template was sent to facility via email at the time of inspection.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	APSA
Violation Source:	CERS,
Site ID:	424438
Site Name:	2315 N First - Sobrato
Violation Date:	07-13-2023
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to include in the SPCC Plan a prediction of direction and total quantity of oil potentially discharged from the facility as a result of each type of major equipment failure.
Violation Notes:	Returned to compliance on 01/09/2024. Table G-4 of the SPCC plan template was missing information in the direction of flow for uncontained releases column. Determine the flow directions for the most likely release scenarios and include it in the SPCC plan.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	APSA
Violation Source:	CERS,
Site ID:	424438
Site Name:	2315 N First - Sobrato
Violation Date:	07-13-2023
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to provide appropriate secondary containment and/or diversionary structures or equipment for the following: bulk storage containers, mobile or portable containers, oil-filled equipment, piping and related appurtenances, mobile refuelers or non-transportation-related tank cars, and transfer areas, equipment and activities and ensure that the entire containment system, including walls and floor, are capable of containing oil and constructed so that any discharge will not escape the containment system before cleanup occurs.
Violation Notes:	Returned to compliance on 01/09/2024. There are two rooms in each building that contain hydraulic reservoirs for elevator systems. Neither building's elevator rooms had adequate general containment. These rooms are inside the facility on level ground but were not equipped with spill kits to respond to leaks or spills.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	APSA
Violation Source:	CERS,
Site ID:	424438

MARVELL TECHNOLOGIES GROUP (Continued) **S121781829**

Site Name: 2315 N First - Sobrato
Violation Date: 07-13-2023
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to provide systems or follow procedures to prevent overfills as described in the SPCC Plan, and/or failure to routinely test to ensure proper operation.
Violation Notes: Returned to compliance on 01/09/2024. It is not clear whether the 600 gallon diesel tanks have overfill prevention methods. Verify which methods are featured on each tank, if any, and include that information in the plan. Otherwise, develop and implement adequate overfill prevention methods for each tank and provide this information in the plan.
Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS,

Site ID: 424438
Site Name: 2315 N First - Sobrato
Violation Date: 07-13-2023
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to describe in the SPCC Plan facility security measures including: 1. How access to the oil handling, processing, and storage areas is secured and controlled. 2. How master flow and drain valves are secured. 3. How unauthorized access to starter controls on oil pumps is prevented. 4. How out-of-service and loading/unloading connections of oil pipelines is secured. 5. The appropriateness of security lighting to both prevent acts of vandalism and assist in the discovery of oil discharges.
Violation Notes: Returned to compliance on 01/09/2024. Table G-6 in the SPCC plan template failed to address lighting as a security measure. Facility also did not distinguish how controlled access differs for hydraulic reservoirs within the building and generator belly tanks outside.
Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS,

Site ID: 424438
Site Name: 2315 N First - Sobrato
Violation Date: 07-13-2023
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to organize the SPCC Plan so that portions describing procedures to be used when a discharge occurs will be readily usable in an emergency, unless facility submitted a Facility Response Plan.
Violation Notes: Returned to compliance on 01/09/2024. Table G-7 of the SPCC plan template does not adequately describe emergency response procedures and notifications. This section must include information on how the facility responds to spills and leaks including stopping discharges, cleaning up spills, and internal and external notifications.
Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS,

Evaluation:
Eval General Type: Other/Unknown

MARVELL TECHNOLOGIES GROUP (Continued) **S121781829**

Eval Date: 04-11-2019
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Facility is a campus of three buildings that share a main parking area. Facility has above 1320 gallons of petroleum products on-site and appears to be subject to the Aboveground Petroleum Storage Act. Paperwork will be submitted to apply for this permit and facility must resubmit on CERS to notify that they are subject to this program. Facility has the following bulk storage containers: estimated 1620 gallons in elevator lift pump tanks in buildings 1, 2 and 3 2x600 gallon diesel fuel generators outside buildings 1 and 2 140 gallon diesel fuel generator outside building 3 Estimated total storage capacity: 2960 gallons If you would like more information about the requirements of this program, please contact your inspector to schedule an appointment.
Eval Division: Santa Clara County Environmental Health
Eval Program: APSA
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-11-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility last submitted their hazardous materials plan via CERS ID 10740298 on 10/8/18. No employees work at the site and buildings are currently vacated. Facility has the following reportable hazardous materials: 600 gallons of diesel fuel Estimated 81 gallons of battery acid NOTE TO FACILITY: While the estimated 780 gallons of hydraulic oil in elevator rooms is not reportable according to this program, it is regulated as a petroleum product under the Aboveground Petroleum Strorage Act.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-13-2023
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site on 7/12/2023 to perform a routine above ground petroleum storage act inspection. Also present for inspection is fellow HMCD inspector, Rob Ward. Inspection is concluded with issuance of this report. Facility is a set of two buildings that are currently vacant. Environmental programs are currently managed by the property owner. Facility stores petroleum as diesel fuel for back up generators and hydraulic oil in elevator lift systems. The facility has 1800 gallons of aggregate petroleum storage and is a Tier I Qualified Facility. Facility created a SPCC template that was last certified on 4/25/2023. There is one 600 gallon diesel generator tank and three one hundred gallon elevator hydraulic oil reservoirs associated with each building. SPCC Plan was provided Lisa Kellog prior to inspection via email. The annual tank statement was last certified by the facility on 4/25/2023 via a CERS submittal to CERS ID# 10740298. There are no TIUGAs at this [Truncated]

MARVELL TECHNOLOGIES GROUP (Continued) **S121781829**

Eval General Type: Other/Unknown
Eval Date: 11-04-2022
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: The Sobrato Organization owns two adjacent buildings (2315 and 2345 North First St.). At present, the amount of petroleum storage subject to the APSA program is undetermined. Although the two facilities have a combined total of 1,200 gallons of diesel, the capacity of hydraulic oil tanks in the elevator rooms has not been determined. Each tank 55 gallons or greater must be included. If the total petroleum storage is greater than 1,320 gallons, then the two buildings, which constitute a campus, would be subject to APSA and development of a federal Spill Prevention, Control, and Countermeasure (SPCC) Plan. Following further details regarding the hydraulic oil, the APSA permit will either be inactivated, or a future routine inspection will be scheduled to review the facility's SPCC Plan and its implementation.
Eval Division: Santa Clara County Environmental Health
Eval Program: APSA
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 09-15-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site to conduct a Hazardous Materials Business Plan permit investigation for Cavium due to CERS submittal. Cavium designs, tests, and sells semiconductors. Cavium is composed of three buildings, one of which is currently under construction and will be finished and occupied by the 4th quarter of 2017. Building 1, located at 2315 N First St. is the site's headquarters & is primarily offices with a few labs. A walk through of this building was conducted with Christian Martinez, the Facilities Technician. The following hazardous chemicals above HMBP thresholds were reported and observed: 1.400 gallons of diesel in generator 2. 81 gallons of electrolytes in lead acid batteries (in electrical room UPS and lab UPS) The following hazardous chemicals were reported and observed below HMBP thresholds: 1. 780 gallon of elevator hydraulic fluid 2. 50 pounds of K-BROM T Water Treatment Biocide Tablets 3. 5 gallons of SKASOL 4201 Scale and Corrosion Inhibitor 4. 81 [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-04-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Onsite 11/3/22 to conduct a routine inspection of this facility with Lisa Darrow, Property Manager for The Sobrato Organization. Previous tenant, Cavium (later bought out by Marvell), vacated the premises on October 5. On the same date, responsibilities for hazardous materials storage at this site fell to the property owner. This inspection concluded 11/4/22 with the issuance of this report. Facility currently stores two types of hazardous materials: Diesel (600 gallons in a generator belly tank) Hydraulic oil (unknown capacity in three elevator pump reservoir tanks) The size of each elevator tank was undetermined. All tanks equal to or greater than 55 gallons are

MARVELL TECHNOLOGIES GROUP (Continued) **S121781829**

reportable for the purposes of the Aboveground Petroleum Storage Act (APSA). If the tanks are determined to be less than 55 gallons each, then they are not applicable for APSA, and thus are also exempt from HMBP reporting per HSC 25507(b)(4)(a). The Sobrato Organization has not yet submitted an [Truncated]

KNTV TELEVISION LLC (Continued) **S109932550**

CERS ID: 10350307
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 128226
Site Name: KNTV TELEVISION LLC
Violation Date: 10-19-2022
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas.
Violation Notes: Returned to compliance on 11/17/2022. The SPCC Plan states that STI's SP001 industry standard is being used for inspections. However, the monthly checklist being used does not fully meet SP001 requirements. For example, the facility's checklist does not include checking for the presence of water in the primary tank, nor does it involve confirming that interstitial monitoring equipment is in good working condition. Similarly, the SPCC Plan's annual inspection checklist does not fully meet SP001 requirements. For example, the facility's checklist does not include checking for standing water on tank roofs.
Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS,

Site ID: 128226
Site Name: KNTV TELEVISION LLC
Violation Date: 10-19-2022
Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
Violation Description: Failure of the owner or operator to ensure a professional engineer makes all required attestations in the SPCC Plan.
Violation Notes: Returned to compliance on 11/17/2022. The PE's attestations failed to include that procedures for inspections and testing have been established, and that the SPCC Plan is adequate for the facility per 40CFR 112.3(d)(iv-v).
Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS,

Site ID: 128226
Site Name: KNTV TELEVISION LLC
Violation Date: 10-19-2022
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to include in the SPCC Plan: 1. A contact list and phone numbers for the facility response coordinator, National Response Center, cleanup contractors with an agreement for response, and all Federal, State, and local agencies who must be contacted in case of a discharge 2. Information and procedures that would enable a person reporting an oil discharge to relate all information as described in 40 CFR 112.7(a)(4), unless facility submitted a Facility Response Plan.
Violation Notes: Returned to compliance on 11/17/2022. Facility's SPCC Plan has general spill reporting procedures, but lacks details on the type of

KNTV TELEVISION LLC (Continued) **S109932550**

information that must be reported. This information includes: exact address or location; phone number of facility; date and time of discharge; type of materials discharged; estimates of total quantity discharged; estimates of the quantity discharged as described in 40 CFR 112.1(b); source of discharge; description of all affected media; cause of discharge; any damages or injuries caused by discharge; actions being used to stop, remove, or mitigate effects of discharge; whether an evacuation may be needed; names of individuals and/or organizations who have been contacted

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to comply with one or more of the following requirements: 1. Have record of inspections and tests, including integrity tests, signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and tests, including integrity tests, for at least three years. 3. Keep comparison records.
Violation Notes:	Returned to compliance on 11/21/2022. Facility's tank inspections consist of monthly visual inspections which involves filling out two forms: 1) "Diesel Tank Storage System Visual Inspection Log (Monthly)", and 2) "KNTV Studio San Jose AST Monthly Inspection Checklist (per STI SP001)". Per Mr. Sandico, monthly inspections have been occurring, and this was corroborated by the monthly log. However, the checklist was not filled out for August or September of this year. In addition, no previous records of annual tank inspections were available. Per Mr. Sandico, prior to the most recent revision of the SPCC Plan (July 2021), it did not include annual inspections. Nonetheless, no proof of an annual inspection since then has been provided.

Federal Waste Generator Description: Small Quantity Generator
State District Owner: Not reported
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Receive Date: 20051010
Handler Name: SYMMETRICOM
Federal Waste Generator Description: Large Quantity Generator
State District Owner: Not reported
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: Yes
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

List of NAICS Codes and Descriptions:
NAICS Code: 334519
NAICS Description: Other Measuring And Controlling Device Manufacturing

Facility Has Received Notices of Violations:
Violations: No Violations Found

Evaluation Action Summary:

SYMMETRICOM INC (Continued) **1004675441**

Evaluations: No Evaluations Found

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Construction of the building at the site was completed in 1985 as a

2480 NORTH 1ST STREET (Continued) **S108418408**

two storey slab-on-grade tilt up structure which included an elevator. The hydraulic jack of the elevator apparently failed sometime before September 2005. A review of the maintenance records for the elevator indicates that approximately 40 gallons of hydraulic fluid were released during the hydraulic jack failure. The failed hydraulic jack and oil impacted sand were removed using a portable floor-mounted in-elevator drilling rig. The failed hydraulic jack and PVC casing were replaced in September and October 2005. In December 2005, groundwater samples were collected at locations downgradient of the failed hydraulic jack and from within the PVC casing to assess the extent of contamination in groundwater. Based on these results, the groundwater impacted by the failed hydraulic jack appears to be in the immediate vicinity of the building. An extraction well was installed in the elevator pit in October 2006. Contaminated groundwater was extracted from the elevator shaft and was treated using granulated carbon and discharged to the sanitary sewer under a permit issued by the City of San Jose. Approximately 3,800 gallons of water were extracted. Groundwater underlying the site was evaluated by installing a total of four on-site groundwater monitoring wells in August 2007. The wells were monitored and sampled on a quarterly basis until June 2008. With the exception of well MW3 during September 2007, no petroleum hydrocarbons were detected in any of the wells. Well MW3 is located cross gradient to the failed hydraulic jack, and well MW2 is located approximately between the failed hydraulic jack and well MW3. Conclusion: The site does not pose a significant risk to human health or the environment based on the concentrations of chemicals remaining at the site. The Water Board staff recommends this case for closure.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D022
Waste Description:	Chloroform
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	D038
Waste Description:	Pyridine
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003

TAKARA BIO USA INC (Continued) **1014387967**

Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS:
Name: QUEST DIAGNOSTICS-SAN JOSE RRL,
Address: 2369 BERING DR
City,State,Zip: SAN JOSE, CA 95131
Site ID: 562185
CERS ID: 10350133
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 562185
Site Name: Quest Diagnostics-San Jose RRL,
Violation Date: 05-26-2022
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: The site map is missing the following required elements: north orientation, storm and sewer drains, internal roads, adjacent streets, and emergency shutoffs (e.g., gas, water, electric).
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 562185
Site Name: Quest Diagnostics-San Jose RRL,
Violation Date: 07-02-2013
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 07/02/2013. ENSURE TO HAVE SPILL EQUIPMENT READILY AVAILABLE.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 562185
Site Name: Quest Diagnostics-San Jose RRL,
Violation Date: 09-24-2019
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 10/22/2021. Observed that facility is disposing of expired reagents and non-empty vials into medical waste container. Nora Lising stated that facility is currently working with Clean Harbors to collect reagents into separate container. Determine what reagents are hazardous waste before continuing to dispose of raegents.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 10/22/2021. Facility failed to submit a Hazardous Materials Business Plan while handling hazardous materials greater than state thresholds.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,

Site ID:	562185
Site Name:	Quest Diagnostics-San Jose RRL,
Violation Date:	05-26-2022
Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes:	Facility has 1x ~15-gallon container for waste flammable liquids, N.O.S. This container had an accumulation start date of 5/25/21, and manifest review indicated that was the last pickup for that container. This waste container has exceeded the accumulation time limit of one year. Ms. Lising indicated that the waste would be scheduled for pickup immediately.

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Facility reported 600 lbs of dry ice. Based on personnel interviews, the actual amount is closer to 1,400 lbs.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 02-22-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to perform a hazardous materials permit investigation. Facility is a drop-off site for various samples, such as blood and semen. No collection (i.e. blood draws) is done here, just testing. A walk-through of the lab was conducted with Lead CLS, Nora Lising. Observed the following hazardous materials: - 1 x ~5 gal container of waste methylene blue stain in the Flammable Cabinet - sodium hypochlorite used in a machine for cleaning tools (non-HMBP quantity) Further investigation is needed to determine hazardous waste criteria and whether or not this facility requires a Hazardous Waste permit from our office. Notes: - Facility is inaccessible until you call the number for Security posted on the window. - EPA ID: CAL000417580 is active - Business does not have a valid Medical Waste permit. Permit posted is from their previous location on Mabury Rd. - Contact email: kenneth.t.ilejay@questdiagnostics.com (Sr. Environmental Health & Safety Specialist) - [Truncated]

Eval General Type: Compliance Evaluation Inspection

BUSCH SEMICONDUCTOR EQUIP GRP (Continued) **S123619302**

Eval Date: 05-26-2022
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Onsite for a routine hazardous waste and Hazardous Materials Business Plan inspection. Facility is a clinical lab which conducts diagnostic testing on human samples (e.g. blood, semen). Wastes include flammable liquids and various reagents. California EPA ID CAL000417580 is active. Hazardous waste manifests were reviewed. Emergency information is posted. Emergency response equipment is maintained. Training appears to be sufficient. Manifests from 2020 and 2021 show that the facility now generates in excess of 100 kilograms of waste annually, which is a slight increase over previous years. Based on this trend, the facility's permit will be adjusted from 2202 (<100 kg per year) to 2205 (between 100 kg and 5 tons per year). Note: Per company policy, wastes can be accumulated for six months. This is more strict than regulations allow for. Laboratory waste which meets the definition and requirements laid out in HSC 25200.3.1 has an accumulation time limit of one [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-24-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site with Robin Ward, Hazardous Materials Specialist II, to conduct a Hazardous Waste Generator inspection of Quest Diagnostics. Facility conducts diagnostic tests on blood samples for the public. Facility walk-through was conducted with Nora Lising, Group Lead CLS. Facility uses Wright- Giemsa Hema-Quik II staining solution (95% methyl-alcohol) for staining. Waste gram staining and methanol used to clean staining cups is collected as hazardous waste. Paper towels contaminated with stain are disposed of into medical waste container. Facility has determined that lightly saturated paper towels are not hazardous waste. Facility alternates between hydrochloric acid and sodium hypochlorite to run maintenance/ cleaning cycles of diagnostic machines. Effluent from cleaning cycles is disposed of into POTW. Facility has determined that effluent does not meat hazardous waste criteria. Expired reagents and empty reagent vials are currently tossed into medical waste bin. Neutrad is [Truncated]
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-24-2019

BUSCH SEMICONDUCTOR EQUIP GRP (Continued) **S123619302**

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site with Robin Ward, Hazardous Materials Specialist II, to conduct a Hazardous Materials Business Plan inspection of Quest Diagnostics. Facility conducts diagnostic tests on blood samples for the public. Facility walk-through was conducted with Nora Lising, Group Lead CLS. CERS ID# 10350133 Facility handles a maximum of 600 lbs of dry ice on-site [1 lb of dry ice = 8.1 cubic feet of CO2] 600lbs = 4860 cubic feet of carbon dioxide on-site Facility will be permitted for handling 1-3 hazardous materials above state thresholds (BP01) based on today's observations.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	This site is occupied by the M.E. Fox beverage distribution facility and until recently has had an operating fuel dispensing facility with underground storage tanks (USTs). Most recently, one 8,000-gallon gasoline, one 2,000-gallon gasoline, and one 6,000-gallon diesel UST were present at the site. These USTs were installed in January 1990 and reportedly were removed on June 14, 2004. Previous tank complex at the site was located approximately 65 feet southeast of the current UST area. The former UST(one -5,000-gallon gasoline, one 2,000-gallon gasoline and one 2, 0000-gallon diesel) were removed in November 1989. Two ground water monitoring wellls were installed at the site in 1990 (OW-1 and OW-2), three additional monitoring wells were installed at the site in 1994 (MW-1, MW-2), and (MW-3). These five wells are located east and southeast (up-gradient) of the current UST area. Ground water monitoring continued at the site until at least April 1996; the case was closed in February 1997. Subsequently, based in a California Regional Water Quality Control Board (CRWQCB) letter dated December 20, 2002, a one time evaluation of shallow ground water beneath the site for the presence of MTBE was required. On April 8, 2003, three borings (EB-1, EB-2, and EB-3) were advanced in the down-gradient groundwater flow direction from the current and former tank locations. MTBE at concentrations up to 3, 100 parts per billion (ppb) and tertiary-butyl alcohol (TBA) at concentrations up to 2,000 ppb were detected in the ground water samples collected from the borings. 2003 In April, 3 soil borings (EB1 through EB3) were advanced downgradient of the existing USTs onsite to depths of 16-20 feet below the ground surface (ft bgs) for the collection of grab groundwater samples. Groundwater was encountered between 12-13 ft bgs. The groundwater samples were analyzed for fuel oxygenates and reported to contain maximum concentrations of 3,100 ppb MtBE and 2,600 ppb Tert Butyl Alcohol (TBA) in boring EB1. Boring EB1 was located adjacent to the existing USTs and dispenser. In October, 6 soil borings (EB4 through EB9) were installed onsite to approximately 15 ft bgs. Boring EB8 was only advanced to 8 ft bgs. Groundwater was encountered between 12-13 ft bgs, except in boring EB8 where it was encountered at 8 ft bgs. 6 soil samples were collected from borings EB7 through EB9 and reported to contain maximum concentrations of 61 ppm TPHd (at 12 feet in EB9), 0.12 ppm MtBE and 0.31 ppm TBA (at 12 feet in EB7). These borings were located around the existing USTs. Grab groundwater samples were collected from borings EB4 through EB6 reported to contain maximum concentrations of 100 ppb TPHg and 100 ppb MtBE in boring EB5 located downgradient of previous borings EB1 through EB3. The existing wells,

FOX, M E & CO INC (Continued) **S103880721**

except for well MW2, were sampled at this time and reported to contain maximum concentrations of 87 ppb TPHg and 1.4 ppb MtBE. All other constituents were not reported to be present above the laboratory reporting limits. Groundwater monitoring was not continued. 2004 In June, 4 soil borings (EB7 through EB10) were advanced to 15 ft bgs on the property north of the site. Three of the soil borings were named the same as previous borings advanced onsite (EB7 through EB9) Groundwater was encountered between 10.5-13 ft bgs. Grab groundwater samples were collected from each boring and reported to contain maximum concentrations of 37,000 ppb TPHg, 2,800 ppb Ethylbenzene, 550 ppb Xylenes, and 93 ppb MtBE in boring EB10 located downgradient of the former USTs. In July, the USTs, associated piping and dispensers were removed from the site. 6 soil samples (SS1 through SS6 were collected from 6-7 ft bgs at the soil/water interface in the UST excavation. Samples were analyzed for TPHg, TPH as Diesel (TPHd), Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX), MtBE, and Volatile Organic Compounds (VOCs) by EPA Method No. 8260B; and were reportedto have only one detection of 8.4 ppm MtBE in one soil sample. A grab groundwater sample was collected from the excavation and reported to contain 1,500 ppb TPHg, 250 ppb TPHd, 3,500 ppb Ethanol, 1 ppb Naphthalene, 82 ppb Benzene, 540 ppb Toluene, 49 ppb Ethylbenzene, 450 ppb Xylenes, and 41 ppb MtBE. 2005 The responsible party was requested to install additional wells on the properties to the north of the site. They were not able to secure access agreements to complete the work. 2011 A Site Conceptual Model was completed for the site. It states that the site is underlain by at least 21.5 feet of clay with thick discontinuous interbeds of silt, silty sand and gravel. Clay comprises the predominant water-bearing unit beneath the former UST areas. It also states that there is likely an upward vertical hydraulic gradient based on depth to initial groundwater (10-13 ft bgs) during drilling and the shallower depth to groundwater measured in onsite wells (average 6-7 ft bgs). 2012 In June, 3 soil vapor samples (SV1 through SVE) were collected from 5 ft bgs offsite and downgradient of the former UST locations. The samples were only reported to have detectable concentrations of MtBE in SV1 And SV2 at a maximum concentration of 470 g/m3. Benzene and TPHg were not reported to be present in any of the samples above the laboratory reporting limits. The sample collected at SV3 was not reported to have concentrations of the Constituents of Concern present above the laboratory reporting limits. The maximum MtBE concentration was used to calculate the incremental Risk from Vapor Intrusion to Indoor Air, Carcinogen (5.7E-08); and the Hazard Quotient from Vapor Intrusion to Indoor Air, Non-carcinogen (1.7E-04). Also at this time, the monitoring wells onsite were sampled and were not reported to have concentrations of TPHg, BTEX, MtBE and TBA present above the laboratory reporting limits. 2013 Between February and May, 5 Geoprobe borings (GP1 through GP5) and 1 hand auger boring were advanced on and offsite. Groundwater was encountered between 12-15 ft bgs and was reported to rapidly rise to 7-8 ft bgs. Grab groundwater samples were collected from each boring and reported to contain a maximum concentration of 33 ppb MtBE, which was the only constituent reported to be present above the laboratory reporting limits in the samples collected. 3 soil samples were collected from borings GP1 through GP3 located onsite at a depth of 8 ft bgs. These samples were analyzed for Naphthalene, which was not reported to be present above the laboratory reporting limit.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 413559
Site Name: Orchard Parkway 1
Violation Date: 06-19-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 07/31/2019. Site map does not include storage locations of compressed gas cylinders behind the building. Ensure map includes locations of all hazardous materials.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 413559
Site Name: Orchard Parkway 1
Violation Date: 06-19-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 07/31/2019. Emergency response plan has incorrect number listed for the local CUPA. The local CUPA is: Santa Clara County, Dept. of Environmental Health- 408-918-3400
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 413559
Site Name: Orchard Parkway 1
Violation Date: 06-19-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site

ORCHARD PARKWAY 1 (Continued) **S121778862**

at or above reportable quantities.

Violation Notes: Returned to compliance on 07/31/2019. Facility inventory reported on CERS does not match amounts observed during inspection. Nitrogen gas storage was observed to be greater than 200% of the amount reported in CERS. See comments list for a list of reportable inventory. (NOTE: Items denoted with a (*) are reported at lower amounts on CERS than amounts observed during the inspection.)
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-19-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: UNRESSOLVED ISSUES: Respond in writing within 7 business days. 1. Facility could not provide written records of annual emergency response training. Provide copies that demonstrate all employees have been trained annually. If no records can be obtained, respond in writing how this training will be conducted and logged, and provide the date that training is scheduled for all employees. 2. Observed that facility has HCFC-123 refrigerant connected to cooling tower system. It is currently unclear how much of this refrigerant is present. Provide more information on the capacity of this system in cf. 3. Facility CERS account and previous manifests show disposals of and reporting of 2800 pounds of waste liquid oil, glycol, and diesel. Respond with information if this waste is still on-site, contained within certain equipment, or if storage containers still remain on-site. No such wastes were observed at the time of inspection. (NOTE: If facility wishes to keep this on the [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-19-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility is a large commercial building that is partially occupied. All Apple labs are located on the first floor and other areas of the building are vacant. Facility conducts electrode creation and testing, and has labs that deal with lithium ion batteries. In the event of a fire, facility has the potential to generate waste contaminated water or solids due to battery storage on-site. The facility has large sprinkler water tanks available in the manufacturing area (1820) for use in the event that they are needed, but no such wastes have been generated to date. Facility began producing wastes in 2017 and has added additional machinery and labs since this time. Inspection included walk-through of the following areas: RAQ lab 1110: produces waste corrosives, waste acids, waste permanganates, and contaminated debris associated with electrode production and research Electrode testing area: produces waste lab debris contaminated with corrosives, solvent wipes, and some [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110002619015

UNITED SUPERTEK INC (Continued) **1000905369**

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: 1. Failure to prepare a SPCC plan that follows a sequence of rule and/or cross-reference. 2. Failure of the owner or operator of a facility subject to this part to prepare a SPCC plan in accordance with good engineering practices. 3. Failure to have the full approval of management at a level of authority to commit the necessary resources to fully implement the SPCC plan. 4. Failure to prepare the Plan in writing. AND 5. Failure to prepare a SPCC plan that addresses additional procedures/methods/equipment not yet fully operational.
Violation Notes: Returned to compliance on 04/08/2016. THE CURRENT SPCC PLAN REFLECT DOES NOT REFLECT THE CHANGE OF OWNERSHIP FROM EBAY TO PAYPAL. THE CHANGES CAN BE DOCUMENTED AT THE END OF THE PLAN UNDER DOCUEMNT "SPCC PLAN AMENDMENT LOG".

PAYPAL SAN JOSE (Continued) **S118585207**

	6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.
Violation Notes:	Returned to compliance on 04/10/2019. Facility SPCC plan states that all tanks with be inspected in accordance with STI SP001 in lieu of tank integrity non-destructive inspections. Plan includes a monthly form for employees to use, but employees do not currently fill out this form. Instead, facility employees currently fill out a checklist that lists the days of the week and dates that a visual inspection was completed. Annual maintenance on all tanks is conducted by contractors via Monitoring Certifications and Quarterly maintenance reports (by Electro-motion). Monitoring certs do not address tank structures or foundations, and quarterly maintenance reports do not appear to meet all annual requirements (such as testing the tank primary for water, or checking concrete foundations and grounding). Corrective actions needed: - Ensure that all monthly and annual requirements required by STI SP001 are covered in monthly and annual inspection forms. (Free copies of these inspection forms can be found online) [Truncated]

Eval Type: Routine done by local agency
Eval Notes: NOTES FOR REGULATORS: Facility is a campus with one SPCC plan that covers all buildings. Plan was last certified on April 7, 2016. Facility is a Qualified facility but has chosen to create a full SPCC plan that is certified by a professional engineer. Annual tank facility statement for this site was submitted via CERS on 3/28/18. (Inventory is spread across all 4 CERS accounts and was found to be complete). Observed aggregate storage capacity for petroleum: 5800 gallons Facility has 3 oil-handling employees that are trained annually in SPCC plan requirements and incident briefing. Logs were reviewed at the time of inspection for 2018. All tank access ports were observed to be locked and facility security measures matched those listed in the plan. All tanks were observed to be double-walled (except for concerns noted in the unresolved issues) or contained inside concrete rooms that served as sized secondary containment. Each tank is monitored for overfill by [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-04-2024
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site on 4/2/2024 to perform a routine above ground petroleum storage(APSA) act inspection. Inspection is concluded with issuance of this report. Facility is a large financial technology company campus which stores 5,800 gallons of above ground petroleum in 4 main buildings. Facility is a Tier I facility that has chosen to prepare and implement a single full engineer certified SPCC plan that covers the entire campus. The SPCC plan was last certified on 2/1/2024 and the annual tank statement was last completed as a CERS submittal dated 2/23/2024 under CERS ID# 10648441. Petroleum on site primarily consists of diesel for emergency generators present in each building as described below: - Building 14 features two above ground storage tanks(AST). The first tank is a 500 gallon, double wall, category 1 AST located in the parking lot area. This tank supplies diesel to the second AST at this address which is a 400 gallon, double wall, category 1 diesel generator tank [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS HAZ WASTE:
Name: TECAN SYSTEMS INC
Address: 2450 ZANKER RD
City,State,Zip: SAN JOSE, CA 95131
Site ID: 74129
CERS ID: 10350310
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 74129
Site Name: TECAN SYSTEMS INC
Violation Date: 05-02-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 06/17/2019. Observed that greater than 11x1 gallon yellow containers had federal labels that do not specify the hazardous characteristics or the physical state of the wastes. Observed 1x3 gallon container of hazardous waste on the production floor that was missing the contents, hazardous characteristics, and the physical state. Observed 1x0.5 gallon container of hazardous waste vegetable oil waste with a blank hazardous waste label. Observed 1x5 gallon step can of waste lab debris that that was missing the

SAN JOSE INDUSTRIAL BUSINESS (Continued) **S106235298**

accumulation start date, contents, hazardous characteristics, and the physical state. Observed 1x1 gallon container of silicon fluid waste with no label. Observed 1 bin of misc. hazardous wastes from the laboratories that had no hazardous waste labels on any of the contents. Ms. Matthieu said that these wastes were awaiting sorting. All wastes must be sorted and labeled at the point of generation. Observed 1 box of broken mercury bulbs and bottles with no label Observed [Truncated]

Site ID: 74129
Site Name: TECAN SYSTEMS INC
Violation Date: 05-02-2019
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Returned to compliance on 06/17/2019. Facility held the following wastes for greater than 1 year at the point of generation: 1x15 gallon container of waste lab debris with an accumulation start date of 1/2/18 1x2 gallon container of peroxide water with an accumulation start date of 8/29/17 1x5 gallon container of waste adhesives with an accumulation start date of 1/15/17

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-02-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility has a production floor, R&D lab, Chemistry lab, clean room, life test department, and warehouse. Facility produces laboratory instruments and generates hazardous waste flammable and corrosive liquids, solder sponges, contaminated lab wipes and lab debris, non-empty used aerosol cans, and occasional lab packs with various toxic and other laboratory chemicals. Wastes are inspected weekly and employees are trained via online training. Fire extinguishers are annually serviced, spill kit is adequate, emergency information is posted, and EPA ID CAL000237848 is currently active. Inspection included walk-through of all departments areas mentioned above and review of 3 years of hazardous waste manifests. UNRESOLVED ISSUE: 1. Observed 226 cf cylinder of oxygen gas that is subject to a Hazardous Materials Business Plan permit. Within 30 days, facility must either apply for a permit via CERS, of respond in writing to verify that oxygen inventory has been permanently [Truncated]

Environmental Interest/Information System:
The Toxic Release Inventory System (TRIS) is a publicly available EPA

KAITEK MEDIA INC (Continued) **1004443644**

database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Data collected at the site reports lead, arsenic, and organochlorine pesticides thought to be associated with previous agricultural land use. The site is currently vacant and there are no immediate plans to develop the property, therefore no remedial soil removal or movement is proposed or expected at this time. In order to minimize exposure pathways (direct contact and inhalation), a hydraulic mulch consisting of native grass mixtures will be implemented. Monthly visual assessment of the hydraulic mulch cover, as discussed in Section 4.1 of the Soil Management Plan, will be performed to ensure the exposure pathways are minimized.

AVAGO TECHNOLOGIES US INC (Continued) **1000281826**

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F008
Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F009
Waste Description: Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

AVAGO TECHNOLOGIES US INC (Continued) **1000281826**

Waste Code: U057
Waste Description: Cyclohexanone (I)

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site History:	Historical info: The Site consists of an 8.32-acre parcel currently

APPLE INC. (ORCHARD PARKWAY 2) (Continued) **S117348075**

under development as a commercial office building and associated parking and landscaped areas. Prior to development, the Site was in agricultural use from at least 1939 through 1998, with the immediate vicinity also in agricultural use through at least 1973. The developed Site will contain a six-story commercial office building (Building 2) and associated parking and landscaped areas. The southwest portion of the Site will be left as open space and landscaped with native grasses. Additional landscaped areas will be present around the building perimeter, along the northwest and southeast Site boundaries, and in landscape islands within the parking area. In July and August 2015, shallow soil samples were collected at the Site for chemical analysis. It is understood that no prior environmental investigations have been conducted at the Site. Due to the agricultural history of the Site and its proximity to the Guadalupe River and Highways 87 and 101, soil samples were analyzed for organochlorine pesticides (OCPs), arsenic, lead, and mercury. A Soil Management Plan was implemented during development to address soil contamination at the Site. Current status: At the RP's request, the case was re-opened on 7/31/2023 to update the SMP based upon new redevelopment plans.

Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Former automotive dealership with vehicle maintenance services from 1970 to 2008. It was used by a community college as an automotive training center from 2008-2010 and is currently vacant. There is a closed LUFT case for this site. The hydraulic lifts were removed from the site in June and July 2012. Soil and groundwater were found to be impacted by hydraulic oil. A clarifier remains that needs to be removed.

Hazardous Waste Summary:
Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D011
Waste Description: Silver

SANMINA - PLANT # 2 (Continued) **1000299775**

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

SANMINA CORP PLT 2 (Continued) **S100873235**

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Description:	Failure to determine if the waste generated is a hazardous waste.
Violation Notes:	Returned to compliance on 07/26/2017. Observed approximately 5 -10 gallons of liquid in a piping sump located contiguous to the Nickel

SANMINA CORP PLT 2 (Continued) **S100873235**

and Gold line. Waste treatment supervisor Gumaro Limon indicated that employees, in the past, have rinsed the container that is used to add cyanide and other chemicals to the baths in the piping sump area. Employees have been instructed not to rinse over that piping sump but evidence suggests that the 5-10 gallons in the trench is a result of this activity. The container was observed with the words "Gold" and a water hose was in the immediate area of the piping sump. PH was tested by Mr. Limon and was approximately 10-11 indicating it is likely from a rinse of a gold cyanide containing container. No other high PH baths are in this area. In the past this waste has been pumped through the treatment system. DETERMINE IF THIS IS CYANIDE CONTAINING WASTE AND IF SO, DO NOT PUMP THROUGH A TREATMENT SYSTEM THAT ISN't DESIGNED FOR OR PERMITTED TO TREAT CYANIDE WASTE.

Violation Date: 07-06-2022
Citation: 22 CCR 45 67450.3(c)(9)(A) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(A)
Violation Description: Failure of an owner or operator to obtain a detailed chemical and physical analysis of a representative sample of the waste, which includes all information necessary to manage waste in accordance with the requirements, and to meet LDR requirements; Failure to analyze wastes according to the frequency specified in the plan and to retain waste analysis documentation for three years.
Violation Notes: Returned to compliance on 08/05/2022. THE WASTE ANALYSIS PLAN FAILED TO DETAIL THE FREQUENCY WITH WHICH ANALYSIS WILL BE REVIEWED OR REPEATED. ***UPDATE THE WASTE ANALYSIS.

Eval General Type: Compliance Evaluation Inspection

SANMINA CORP PLT 2 (Continued) **S100873235**

Eval Date: 06-30-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility generates between 600-1000 tons per year of waste (excluding treated waste). Hazardous wastes generated on-site as a result of developing, etching, stripping, and plating of circuit boards include but are not limited to: Corrosives (low and high pH), metals (Copper, Nickel, Lead), Cyanide, filter cake. Copper, Nickel, and Lead is treated on-site while cyanide is containerized and sent for off-site management. Reviewed documentation that includes but is not limited to: Training Records Contingency Plan Biennial Report SB14 Tank Inspections Uniform Hazardous Waste Manifests Land Disposal Restrictions The following minor violations were corrected at time of inspection: 1x1 gal container of leaded dip solder waste - no hazardous waste marking. Marked. 1x1 gal container of unleaded dip solder waste - no hazardous waste marking. Marked. 2x5 gal resist stripper waste - marking not legible. Marked. Note 1: Facility recently had a carry-over copper [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-27-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility generates approximately 600-800 tons of hazardous waste per year excluding hazardous waste treated on-site (approximately 2400gal/mo). Observed the following minor violations that were corrected at time of inspection: 1x5 gal container of "stripper" waste and 1x5 gal container of "hydrochloric Acid" waste - no statement of hazard or accumulation start date on marking.
Eval Division: Santa Clara County Environmental Health
Eval Program: HWLQG
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 12-07-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Inspection performed in response to complaint referred to county on December 6, 2016. The facility was referred to the county due to concerns of hazardous waste running through an exposed trench. Structural design and layout of plating area leads to wet floor conditions in certain areas where plating solution or drag-out pools in flat areas of the secondary containment. Spilled material is periodically managed by a daily rinsing that directs the spilled material to the treatment system via an impervious epoxy-lined concrete trench/channel. Some secondary containment trays that are above the trench have been drilled through to help facilitate daily cleaning of spill and drag-out material; these areas include the two cleaning lines and the silver line. In order to prevent the facility from being regulated as a permitted hazardous waste storage facility, wet floors must be cleaned within "a reasonable time". The state of California has provided "wet-floor" guidance and [Truncated]

Eval Date: 07-06-2022
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: FTU #1, Concentrated corrosive drag out and rinses with heavy metal such copper and occasionally lead and nickel. Influent into FTU #1 come from ENEPIG Line, Oxide line, Gold line (no cyanide), Chemical clean line, AOI line, and BS Line rinses. These drag out and rinses are concentrated and required more treatment before discharging to the POTW. Rinses enter the Waste Treatment Holding Tank via piping from buildings A and B, waste initially receives pH adjustment in the Reaction Tank, followed by the addition of flocculant for metal ppm in the Flocculation Tank, the waste is placed in the Clarifier tank to allow further precipitation. The Clarifier decant liquid is sent to 2 sand filters for water wash, the wash rinse enters the Final Tank for a pH adjustment and finally discharged to the POTW. The sludge generated in the Clarifier Tank is sent to the Sludge Tank for de watering, the sludge is pumped to the filter press for further de watering and solid sludge [Truncated]

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Hazardous wastes generated on-site as a result of plating related activities include but are not limited to: Corrosives (low and high pH), metals (Copper, Nickel, Lead), Cyanide, filter cake. Copper, Nickel, and Lead is treated on-site while cyanide is containerized and sent for off-site management. Metal rinses are sent through piping to a sump where the waste water is then sent to reaction tank 1 where pH is adjusted and flocculation occurs using ferrous sulfate. After the reactor tank, waste is sent to a dedicated flocculation tank for further flocculation using a polymer. Waste is then sent to a clarifier with various stages with the sludges and solids being sent to the filter press and liquids in clarifier is sent through one of the two sand filters and then to final discharge. Facility has dual pH probes in reaction tank and final discharge and are set to alarm below 9.5 or above 11.5. System is manually placed in rejection mode if pH or metals are out of spec [Truncated]

Eval Notes: -FTU #2, treats less concentrated drag out and rinses with heavy metals such as copper and on occasion lead and nickel. Treatment unit receives drag out and rinses from Bulding A, rinses from the Deburr line and Pumice line from Building B. Influent enters the Ion Exchange Holding Tank; the contents are pumped to Reaction Tank #2 for pH adjustment, the tank is plumed to 2 pumps that are alternate. Each pump is plumed to 3 ion exchange columns, for example if pump #1 is open the rinse is sent to the first 3 ion exchange columns for metals

SANMINA CORP PLT 2 (Continued) **S100873235**

removal. Once the ion exchange bottles reach a certain metal saturation the bottles are washed from the top with sulfuric acid for metals removal and ion exchange regeneration. This process drops the metal to the bottom of the bottle to allow for metal sludge flushes, the metal sludge is plumed to the FTU #1 treatment system for further treatment. ***Holding Tank is not equipped with an overfill sensor, if waste were to [Truncated]

Eval Notes: The inspection commenced on June 29, 2022 and concluded today with the issuance of this report. The inspection walk through was conducted with Jaime Mendoza and Gumaro Limon. Facility produces boards for pcb components. The raw product are arrive as a fiberglass sandwiched with two pieces of copper. In building A, plates go through a series of plating and processing lines to create a design on the board, the board is then taken to building A for scrubbing and drilling. Facility generates the following hazardous waste that include but it's not limited: -Sludge -Waste Copper Chloride Solution -Waste Cyanide Solution (gold plating line) -Copper contaminated solids -Spent nitric acid -Solder waste -Propanol waste (lab A) -Wast Flux (Lab A) Fire extinguishers are current, March 2022. Eye Wash station were inspected monthly, the facility is in the process of changing vendors and has not inspected the current units since at least October of 2021. is [Truncated]

Hazardous Waste Summary:

Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	D004
Waste Description:	Arsenic
Waste Code:	D006
Waste Description:	Cadmium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead

J & B ENTERPRISES (Continued) **1000112713**

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F008
Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F009
Waste Description: Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

CA BOND EXP. PLAN:
Reponsible Party: RWQCB REFERRAL SITE
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: Van Waters and Rogers, Inc., the responsible party is conducting cleanup activities under the direction of the RWQCB. The RWQCB will continue to have lead responsibility for monitoring Van Waters and Roger's progress under an existing cooperative agreement between the RWQCB, EPA and DHS. The RWQCB is conducting the work with support from the EPA through a cooperative agreement. Until such time as the RWQCB refers the site to DHS for follow-up using Bond funds, no money will be budgeted from this fund for this site.
Site Description: Van Waters and Rogers is a division of Univar which operates a chemical

VOPAK USA INC (Continued) **S100833475**

blending, storage and distribution facility. The site encompasses about 12 acres in the City of San Jose. The facility contains about 36 underground tanks which store a variety of organic compounds.

Hazardous Waste Desc: In 1982, soil and ground water contamination was discovered at the site. This contamination was caused by spillage, inadequate handling practices and/or leakage from tanks and piping. The following contaminants have been detected: trichloroethane (TCA), perchloroethylene (PCE), dichloroethane (DCA), dichloroethylene (DCE), methylene chloride, vinyl chloride, toluene, ketones, xylene and alcohols.

Threat To Public Health & Env: Ground water contamination at the site represents a potential threat to public health and the environment. Domestic wells are located one-half mile downgradient of the site.

Site Activity Status: Van Waters and Rogers, Inc, has installed and is operating a ground water extraction system. The lead responsibility within DHS for oversight of remedial activities at this site has been transferred to the regional facilities permitting unit.

Hazardous Waste Summary:
Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: D016
Waste Description: 2,4-D (2,4-Dichlorophenoxyacetic Acid)

Waste Code: D018
Waste Description: Benzene

Waste Code: D022
Waste Description: Chloroform

Waste Code: D023
Waste Description: O-Cresol

Waste Code: D024
Waste Description: M-Cresol

UNIVAR CA SAN JOSE (Continued) **1000136188**

Waste Code: D025
Waste Description: P-Cresol

Waste Code: D026
Waste Description: Cresol

Waste Code: D027
Waste Description: 1,4-Dichlorobenzene

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D029
Waste Description: 1,1-Dichloroethylene

Waste Code: D030
Waste Description: 2,4-Dinitrotoluene

Waste Code: D032
Waste Description: Hexachlorobenzene

Waste Code: D033
Waste Description: Hexachlorobutadiene

Waste Code: D034
Waste Description: Hexachloroethane

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D036
Waste Description: Nitrobenzene

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: D043
Waste Description: Vinyl Chloride

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003

UNIVAR CA SAN JOSE (Continued) **1000136188**

Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	P075
Waste Description:	Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts
Waste Code:	U002
Waste Description:	2-Propanone (I) (Or) Acetone (I)
Waste Code:	U031
Waste Description:	1-Butanol (I) (Or) N-Butyl Alcohol (I)
Waste Code:	U043
Waste Description:	Ethene, Chloro- (Or) Vinyl Chloride
Waste Code:	U072
Waste Description:	Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene
Waste Code:	U076
Waste Description:	Ethane, 1,1-Dichloro- (Or) Ethylidene Dichloride
Waste Code:	U078
Waste Description:	1,1-Dichloroethylene (Or) Ethene, 1,1-Dichloro-
Waste Code:	U079
Waste Description:	1,2-Dichloroethylene (Or) Ethene, 1,2-Dichloro-,(E)-
Waste Code:	U080
Waste Description:	Methane, Dichloro- (Or) Methylene Chloride
Waste Code:	U122
Waste Description:	Formaldehyde
Waste Code:	U129
Waste Description:	Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane
Waste Code:	U134
Waste Description:	Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

UNIVAR CA SAN JOSE (Continued) **1000136188**

Waste Code: U140
Waste Description: 1-Propanol, 2-Methyl- (I,T) (Or) Isobutyl Alcohol (I,T)

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U188
Waste Description: Phenol

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U226
Waste Description: Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

Waste Code: U227
Waste Description: 1,1,2-Trichloroethane (Or) Ethane, 1,1,2-Trichloro-

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U240
Waste Description: 2,4-D, Salts & Esters (Or) Acetic Acid, (2,4-Dichlorophenoxy)-, Salts & Esters (Or) Dichlorophenoxyacetic Acid 2,4-D

Waste Code: U249
Waste Description: Zinc Phosphide Zn3p2, When Present At Concentrations Of 10% Or Less

Waste Code: U279
Waste Description: U279

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Site is under Water Board Order No. 91-138. PROJECT OVERVIEW On April 2, 2001, Van Waters & Rogers, Inc. became Vopak USA Inc. (Vopak), which eventually became Univar Solutions. The principal operations at the site, which began in 1976, include bulk chemical transfer between tank trucks, railroad tank cars, and chemical blending and packaging. In the past, 37 underground storage tanks (USTs) have been used to store chlorinated and petroleum hydrocarbons. All 37 USTs have since been removed and currently, chemicals are stored in aboveground storage tanks (ASTs). Releases were associated with underground storage tanks that were located adjacent to the covered dock and an above ground storage tank on the dock. All these tanks were removed, and above ground storage tanks were installed. The groundwater extraction treatment system (GWETS) operated from 1986 to 2020. In 2021, the Water Board concurred with curtailment of the GWETS. The effluent was discharged to a storm sewer inlet located near the northern site boundary. The treated water was eventually discharged to the Guadalupe River under an NPDES permit. In November 2007, Univar implemented an expanded soil vapor extraction system (SVE) which was shut down in 2016/2017. The SVE operated from 1993 to 2016. In 2017, the Water Board concurred with curtailment of the SVE. In 2021, Univar removed the above ground storage tanks under jurisdiction of the San Jose Fire Department, as part of the facility closure. Univar sold the property to Duke Realty in 2020. Since, the property transfer, Univar has implemented a new groundwater treatment remedy (2020), and soil remedy (2021). These are outlined in the 9/21/2021 Interim Remedial Action Plan (IRA) and 3/23/2021 Remedial Action Plan (RAP). Duke Realty will implement an active vapor intrusion mitigation system, sub-slab depressurization system (SSDS), and hot spot soil removal in the warehouse. Prior to Duke Realty's tenant occupation, monitoring of the vapor intrusion mitigation system and testing of indoor air will be conducted. Duke Realty will lease the property to a new commercial tenant and will remodel the existing warehouse and attached office. Univar will continue to monitor and sample groundwater monitoring wells and soil vapor probes to evaluate the effectiveness of the new remedies implemented in 2020 and 2021. Duke Realty will perform long-term monitoring of the SSDS. Historical Site Characterization Subsurface investigations began at the site in late 1982 at the request of the RWQCB. Site characterizations have identified two water-bearing zones, referred to as the "A-" and "B-" aquifers. The A-aquifer, which is present between depths of 10 and 45 feet below ground surface (bgs), has been further subdivided into the A-1 and A-2 zones. The A-1 zone is characterized by silty clays and clays. The underlying A-2 zone

UNIVAR CA SAN JOSE (Continued) **1000136188**

consists of sandy clays and clayey sands. The B-aquifer, which extends to about 90 feet below grade and consists of permeable sands and gravels, has been subdivided into the B-1 and B-2 zones. The B-1 and B-2 zones are similar but are separated by a thin stratum of silty clay and clayey silt. By February 2002, 43 wells and 2 deep exploratory borings have been installed at the site, 36 of which remain active. Historical ground water monitoring data have shown the past and/or continued presence of a number of dissolved organic compounds in soil and in the A- and B-aquifer wells. These compounds may be categorized as either volatile organic compounds (VOCs) or soluble oxygenated compounds, such as alcohols, glycols, and ketones. After several phases of subsurface characterization, a remedial investigation/feasibility study (RI/FS) report was submitted by Geosystem Consultants, Inc. (Geosystem, February 13, 1991) to the U.S. Environmental Protection Agency (EPA) and the RWQCB. In the RI/FS, seven compounds were selected as chemicals of concern (COCs) based on frequency of detection, maximum concentration, and health risk potential. The list of COCs included: Acetone 1,1-Dichloroethene (1,1-DCE) cis-1,2-Dichloethene (cis-1,2-DCE) Methylene chloride Tetrachloroethene (PCE) Trichloroethene (TCE) Vinyl chloride An eighth chemical, 1,1,1-trichloroethane (1,1,1-TCA), was added in the final list for target cleanup because of its designation as an indicator chemical. Other indicator chemicals were PCE and cis-1,2-DCE. These indicator chemicals have been used to simplify data evaluation and interpretation. Recent data, however, have demonstrated that 1,1,1-TCA concentrations have been reduced to levels which are no longer of concern.

Completed Date: 02/24/2016
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require DTSC to pursue corrective actions. Schlage Lock Company - ADF was a tenant and operated a light manufacturing facility at the site from 1983 to 2001. Schlage Lock operated three hazardous waste treatment units under the Conditionally Authorized permitting tier, a primary treatment unit, filter press, and evaporator. Schlage Lock ceased operation and closed the facility in 2001. The company submitted a Post Closure Report to the Santa Clara County Department of Environmental Health, Hazardous Materials Division, who acknowledged closure of the treatment operation in a July 2, 2001 letter. A Facility Closure Report - Request for No Further Action Determination, dated July 6, 2001, was submitted to the Regional Water Quality Control Board (RWQCB) that summarized sampling and removal of petroleum hydrocarbon-impacted soil as part of the closure. RWQCB issued a no further action letter on February 8, 2002. DTSC concluded in the site screening that based on RWQCB's issuance of the no further action letter the site status in Envirostor should be "Refer: RWQCB".

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 12/06/1991
Comments: Completed Site Screening. Soil samples detected dichloroethylene in the soil beneath the floor. Over 8 cubic yards of soil was excavated and disposed off-site. Analyses of soil samples taken from the bottom of the excavation indicated levels less than 100 ppb. Based on this information, the SF Regional Water Quality Control Board (RWQCB), the lead agency, decided that the remaining contaminant no longer posed a threat to groundwater and no further action was required. The soil level is below residential standards.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

QUEBECOR PRINTING SAN JOSE INC (Continued) **S105644506**

Comments:	Completed Site Screening. On December 13, 1989, the SF Regional Water Quality Control Board (RWQCB) issued Order No. 89-182 addressing site investigation cleanup of the soil and groundwater pollution. From 1993 to 1999, a combined soil vapor and groundwater extraction operated on the site. The cleanup plan did not meet expectations. Removal efficiency was low and there were a number of operational difficulties due to site soil conditions. The RWQCB issued an amended order, requiring excavation of vadose zone soil that exceeds the risk based cleanup goals; and monitored natural attenuation for impacted groundwater.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	01/29/1990
Comments:	Completed Site Screening. During the investigation of groundwater, free product containing toluene and hexane was discovered in one monitoring well. The free product is believed to be the result of an overflow from an underground sump connected to the solvent recovery system.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D005
Waste Description:	Barium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	F006
Waste Description:	Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon

AMEX PLATING INC (Continued) **1000819171**

Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California

AMEX PLATING INC (Continued) **1000819171**

Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Name: APCT INC
Address: 3495 DE LA CRUZ BLVD
City,State,Zip: SANTA CLARA, CA 95054
Site ID: 6157
CERS ID: 804696
CERS Description: Industrial Facility Storm Water

Violations:
Site ID: 6157
Site Name: APCT INC
Violation Date: 03-13-2018
Citation: 22 CCR 45 67450.3(c)(7) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(7)
Violation Description: Failure to permanently mark the exterior of each Fixed TU with the name of the person which owns or operates the FTU, facility identification number and an individual serial number.
Violation Notes: EPA ID missing on treatment tank
Violation Division: Santa Clara City Fire Department
Violation Program: PBR
Violation Source: CERS,

Site ID: 6157
Site Name: APCT INC
Violation Date: 06-03-2014
Citation: 22 CCR 45 67450.2(b)(2) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.2(b)(2)
Violation Description: Failure of the owner or operator of a FTU that treats hazardous waste to submit, in person or by certified mail with return receipt requested, the Onsite Hazardous Waste Treatment Notification-Facility page, the Business Activities Page, and the Business Owner/Operator Page of the Unified Program Consolidated Form (x/99)), an alternative version or a computer generated facsimile to the CUPA or authorized agency before sixty (60) days prior to beginning the first treatment of waste pursuant to a permit-by-rule.
Violation Notes: Returned to compliance on 09/16/2014.
Violation Division: Santa Clara City Fire Department
Violation Program: PBR
Violation Source: CERS,

Site ID: 6157
Site Name: APCT INC
Violation Date: 03-13-2018
Citation: 22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation. The tank assessment shall be valid for five (5) years.

Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 12/04/2023. OBSERVATION: The business failed to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material including familiarity with the emergency response plan or failure to document and maintain training records for a minimum of three years. CORRECTIVE ACTION: Establish and electronically submit an employee training program containing provisions to ensure initial and annual training for all employees in safety procedures in the event of a release or threatened release of a hazardous material and document and maintain training records for a minimum of three years.

Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at

APCT INC (Continued) **S103654547**

least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 12/04/2023. OBSERVATION: As demonstrated by the number and type of hazardous waste violations observed at the time of inspection, personnel are not adequately trained to perform their duties in a way that ensures the facility's compliance with hazardous waste laws and regulations, and/or employee training records have not been kept or do not contain all required information, or employees were not trained within 180 days after their hire date or assignment to a new facility or position, and annually thereafter. CORRECTIVE ACTION: Conduct training with applicable personnel and document it according to the requirements of 22 CCR 15 66265.16(d). Submit a copy of the documentation to the CUPA.

Citation:	22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation. The tank assessment shall be valid for five (5) years.

Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 12/04/2023. OBSERVATION: The business failed to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material including familiarity with the emergency response plan or failure to document and maintain training records for a minimum of three years. CORRECTIVE ACTION: Establish and electronically submit an employee training program containing provisions to ensure initial and annual training for all employees in safety procedures in the event of a release or threatened release of a hazardous material and document and maintain training records for a minimum of three years.

Violation Date: 08-16-2023
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 12/04/2023. OBSERVATION: As demonstrated by the number and type of hazardous waste violations observed at the time of inspection, personnel are not adequately trained to perform their duties in a way that ensures the facility's compliance with hazardous waste laws and regulations, and/or employee training records have not been kept or do not contain all required information, or employees were not trained within 180 days after their hire date or assignment to a new facility or position, and annually thereafter. CORRECTIVE ACTION: Conduct training with applicable personnel and document it according to the requirements of 22 CCR 15 66265.16(d). Submit a copy of the documentation to the CUPA.

Violation Date: 03-13-2018
Citation: 22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation. The tank assessment shall be valid for five (5) years.
Violation Notes: Corrections required for treatment tank names

Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 12/04/2023. OBSERVATION: The business failed to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material including familiarity with the emergency response plan or failure to document and maintain training records for a minimum of three years. CORRECTIVE ACTION: Establish and electronically submit an employee training program containing provisions to ensure initial and annual training for all employees in safety procedures in the event of a release or threatened release of a hazardous material and document and maintain training records for a minimum of three years.

Violation Date: 08-16-2023
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 12/04/2023. OBSERVATION: As demonstrated by the number and type of hazardous waste violations observed at the time of inspection, personnel are not adequately trained to perform their duties in a way that ensures the facility's compliance with hazardous waste laws and regulations, and/or employee training records have not been kept or do not contain all required information, or employees were not trained within 180 days after their hire date or assignment to a new facility or position, and annually thereafter. CORRECTIVE ACTION: Conduct training with applicable personnel and document it according to the requirements of 22 CCR 15 66265.16(d). Submit a copy of the documentation to the CUPA.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 398178
Site Name: NeoPhotonics Corporation
Violation Date: 02-16-2018
Citation: 22 CCR 45 67450.7 - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.7
Violation Description: Failure of the owner or operator of a facility who operates a transportable treatment unit (TTU) or fixed treatment unit (FTU) under a permit by rule to complete a corrective action program at the facility. The corrective action shall consist of a phase 1 environmental assessment, which shall be submitted within one year of the initial notification of permit by rule treatment, and a subsequent corrective action conducted as necessary to protect human health and the environment for all releases of hazardous waste or constituents from any solid or hazardous waste management unit at the facility, regardless of the time at which waste was placed in the unit.
Violation Notes: Returned to compliance on 04/09/2018. FACILITY FAILED TO PROVIDE CHECKLIST AND CORRECTIVE ACTIONS.
Violation Division: Santa Clara County Environmental Health
Violation Program: PBR
Violation Source: CERS,

Site ID: 398178
Site Name: NeoPhotonics Corporation
Violation Date: 11-19-2014
Citation: 22 CCR 15 66265.195(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(a)
Violation Description: Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment: 1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order; 2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste; 3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design; 4) The construction materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and 5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).
Violation Notes: Returned to compliance on 12/19/2014. _____ The daily tank inspection form does not contain the required information.

NEOPHOTONICS CORPORATION (Continued) **S108214624**

Update the form and document the daily tank inspections.

Violation Division: Santa Clara County Environmental Health
Violation Program: PBR
Violation Source: CERS,

Site ID: 398178
Site Name: NeoPhotonics Corporation
Violation Date: 02-16-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 03/22/2018. THE FOLLOWING MATERIALS WERE OBSERVED IN REPORTABLE QUANTITIES BUT WERE NOT DISCLOSED IN THE MOST CURRENT HMBP: -ARGON-1000 FT2, LOCATED IN CHASE #4 -OXYGEN- 200FT3, LOCATED IN CHASE #2 -CO2-200 FT3, CHASE #2 -OCTA FLUOROPROPANE 200FT3, GAS BUNKER
Violation Division: Santa Clara County Environmental Health

Violation Date:	02-16-2018
Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes:	Returned to compliance on 04/09/2018. TRAINING RECORDS ARE TITLED AS SAFETY AND IT'S DIFFICULT TO DECIPHER THE TYPE OF TRAINING. THE FACILITY PROVIDES A VARIOUS TYPES OF TRAINING COURSES BUT ARE ALL RECORDED AS SAFETY RATHER THAN THE COURSE NAME.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/26/2026

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 04/04/2025

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

Next Scheduled EDR Contact: 07/13/2026
Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

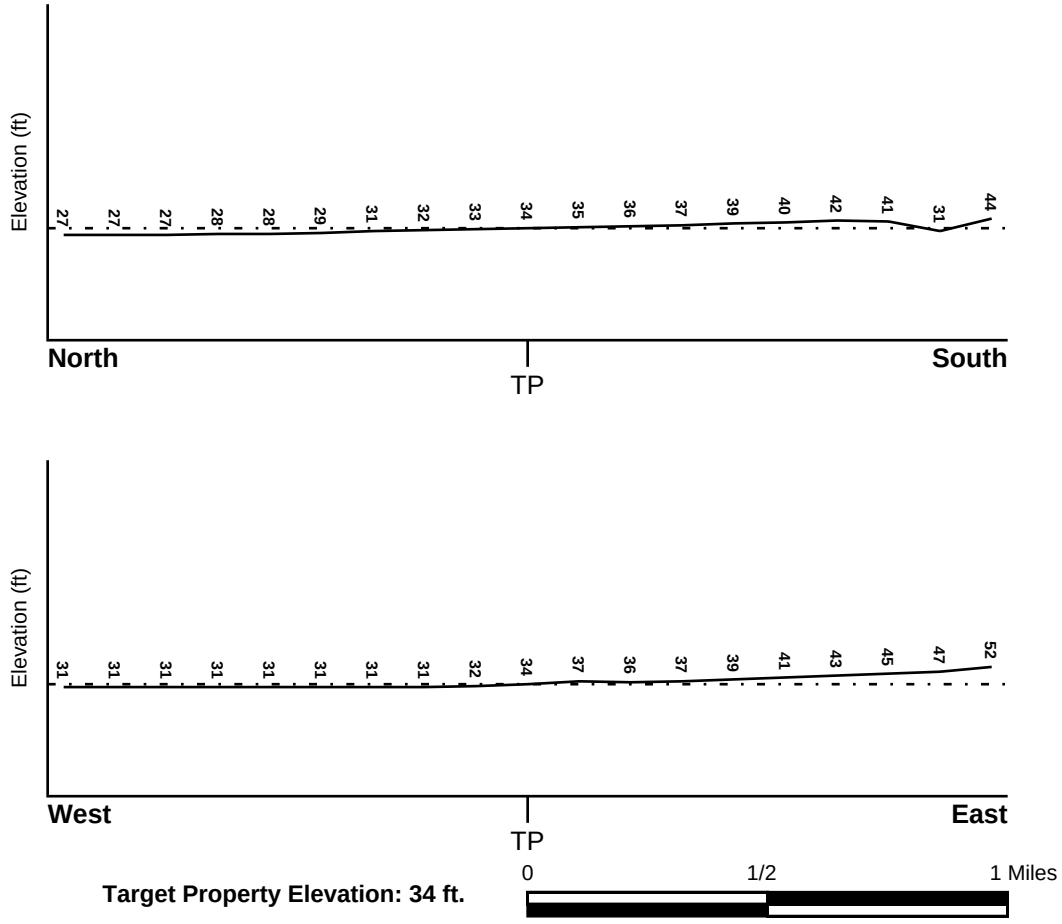

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 34 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0068J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06085C0064H	FEMA FIRM Flood data

06085C0231H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
MILPITAS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SE
Site Name:	Sanmina Ii
Site EPA ID Number:	CAD031546393
Groundwater Flow Direction:	APPROXIMATELY NW.
Measured Depth to Water:	not available.
Hydraulic Connection:	Information is not available about the hydraulic connection between aquifer(s) underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

Orphan Well Prioritization Listing
California Department of Conservation
Telephone: 916-445-9686
Includes locations of wells included in the California State Well Plugging and Sealing Project, managed by CalGEM (California Geologic Energy Management Division).

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APPENDIX E PROFESSIONAL PROFILES

Deborah S. Lind, P.G., E.I.T.

Partner

Deborah is a Partner with ERM based in Walnut Creek, California. She has over 25 years of professional experience related to environmental programs, site investigation and remediation, environmental compliance, legal services, environmental due diligence, sustainability, and strategic consulting for various private and public sectors. Her work has involved potentially responsible party (PRP) projects, operationally sensitive work environments, and positive working relationships with regulators at the federal, state, and local levels. She has a diverse, hands-on background in geology and engineering, and significant experience in a range of disciplines.

EXPERIENCE:

27 years' experience in manufacturing, power, transportation, metals, chemical and oil and gas sectors

FIELDS OF COMPETENCE

- Environmental program management
- Remedial investigation/feasibility study (RI/FS) programs
- Regulatory negotiations and communication
- Multi-PRP Group negotiations
- Air quality and water monitoring programs
- Geologic and hydrogeologic site investigations
- Human health and ecological risk assessments
- Remedial action programs
- Environmental liability cost evaluations
- General environmental, health & safety compliance
- Due diligence
- Program and project management
- Litigation support
- Property redevelopment
- Safety services

KEY INDUSTRY SECTORS

- Manufacturing
- Transportation
- Power
- Mining and Metals
- Technology, media, and telecommunications
- Oil and Gas

KEY PROJECTS

Airline Environmental Safety Program

Oversaw scoping, budgeting, and implementation of compliance auditing and consulting, initial site assessments, site investigations, remedial action program development and implementations, air quality assessment and reporting, and corporate sustainability reporting. Primary responsibility was to ensure that project objectives were met. Monitored schedule, budget progress, and compliance with all health and safety requirements, and served as primary contact with client's program managers. Projects included:

- Development of environmental compliance documents, including hazardous waste business plans, spill prevention control and countermeasure plans, storm water pollution prevention plans, storm water management plans, and environmental compliance manuals.
- Phase I/II environmental site assessments;
- In-depth comprehensive site investigations;

- Evaluation of emerging contaminants including 1,4-dioxane and PFAS;
- Investigations of fuel hydrant lines and underground storage tanks;
- Soil gas, geophysical, and asbestos surveys;
- Equipment data inventories for greenhouse gas assessments;
- Remedial action option evaluations and cost estimation;
- Remedial design and implementation;
- Asbestos containing material (ACM) characterization and abatement;
- Environmental compliance management system development and implementation;
- Third-party environmental audits;
- Aircraft potable water supply compliance sampling; and
- Air compliance reporting.

RCRA Environmental Services Program Manager

Responsible for the overall strategy and execution of investigations, remediation and compliance for a large-scale working steel mill impacted with chlorinated solvents, metals (particularly arsenic), and petroleum hydrocarbons. Regulatory oversight provided by California Department of Toxic Substances Control (DTSC) under the RCRA program. Site characterization utilized high-resolution investigation tools including cone penetrometer testing and membrane interface probes, and detailed studies of regional water conditions given site's proximity to the San Francisco Bay. Remediation technologies implemented include excavation, zero valent iron injections, and soil vapor extraction. Compliance program included site-wide ground water monitoring, landfill monitoring and reporting, and wastewater treatment system risk review.

Utility Due Diligence / Transaction Program

Directed due diligence projects for acquisition and divestiture at over 100 sites across client's footprint, including surplus properties. Work often performed on an expedited schedule and at sites, many of which were operationally sensitive, throughout Northern California. Work performed for multiple Lines of Business and includes Phase I and II evaluations, associated remedial action implementation, and strategic support for the individual transactions.

RCRA Site Assessment and Remediation

Responsible for the overall strategy and execution of investigations, risk assessments, and remediation of a 72-acre former wastewater treatment unit impacted with heavy metals, petroleum, and polycyclic aromatic hydrocarbons. Challenges included water and vegetation management, wetland environment with Special Species, sea level rise, and permitting with various resource agencies including DTSC, U.S. Army Corps of Engineers, San Fracisco Bay Conservation and Development (BCDC), Regional Water Quality Control Board (RWQCB), California Department of Fish and Wildlife, and U.S. Fish and Wildlife Service. Implementing various technologies and a National Pollutant Discharge Elimination System (NPDES) discharge permit in support of Corrective Measures Study including phytoremediation and mechanical aeration studies.

Divestiture-Driven Remedial Program

Oversaw scoping, budgeting, implementation and stakeholder communications for investigation and remedial action implementation of a former electronics manufacturing facility in San Jose California. Assessment included in situ hi-resolution characterization, soil vapor studies and chemical injectant pilot testing. Remedial actions included permeable reactive barrier injections, in-situ bio-remediation injections, a trenched hydraulic barrier wall (33 feet depth), and multiple soil vapor extraction systems. Remedial actions implemented concurrently with redevelopment of 8-acre site and construction of new warehouse.

Work also included assessment and management of environmental impacts to the adjacent industrial and residential community from historical site activities. Project team delineated impacts, managed public relations, interfaced with commercial property owners and tenants, and safely performed drilling investigations in crowded public rights-of-way.

Environmental Services Program Manager

Negotiation of a Voluntary Cleanup Agreement with DTSC to facilitate Removal Action Workplan (RAW) development and implementation for arsenic in soil along BART Warm Springs Extension in Fremont, CA. Other example BART projects included hazardous waste disposal, tank integrity assessments, storm water sampling, MS4 program development and support, emergency response, and soil management plan development, and encompassed the entirety of the BART system footprint in the San Francisco Bay Area.

Refinery Fenceline Monitoring

Oversaw benzene fenceline monitoring programs required under 40 CFR 63, Subpart CC, National Emission Standards for Hazardous Air Pollutants from Petroleum Refineries (NESHAPS). The projects require the deployment and collection of passive sampling tubes every 14 days. The sampling tubes are then sent to an environmental laboratory for analysis. ERM provides the refineries with the measured benzene concentrations for each sampling location, both graphically and spatially on georeferenced maps.

PCB Assessment and Remediation Program

Directed ongoing investigation, risk assessment, and remediation project for management of TSCA-regulated PCBs at an airline maintenance station. Project included strategic negotiations with EPA regarding management of PCBs in building materials, potential accumulation in the facility drainage system, and risk-based decision making for remediation. Remediation work included interior cleaning of more than 500 feet of industrial waste lines, surface decontamination of accumulated interior dust, and management of project waste. Received regulatory closure of interior TSCA matters.

Environmental Service Program Manager

Directed ERM's portfolio of services for a major airline at Los Angeles International Airport. Chemicals of concern included petroleum hydrocarbons, chlorinated solvents, asbestos, lead-based paint, and metals. Work included investigation, risk assessment, feasibility study, design, MNA, indoor air evaluation, and remediation, hazardous materials abatement, air quality and

general environmental compliance services, and site redevelopment support. Projects completed for the full range of airport facilities including large aircraft maintenance facilities, cargo and ground service equipment facilities, and active terminals with RWQCB oversight.

Construction Safety Oversight for Data Center Development

Managed delivery of safety oversight during construction of a data center at a 2-acre site contaminated with volatile organic compounds (VOCs). Developed monitoring procedures for excavation through soils impacted with TCE, PCE, and VC, supported soil sampling and disposal/re-use evaluation, waste disposal, and quality assurance/quality control (QA/QC) of vapor mitigation system installation.

Multiphase RI/FS/RAP

Managed multiphase RI/FS/RAP of alluvium-fractured bedrock aquifer impacted with Dense nonaqueous phase liquids and dissolved-phase chlorinated VOCs, emanating from beneath airline maintenance station at San Francisco International Airport. Performed multilevel well installations, geophysical logging, aquifer testing, and assessments of complex groundwater flow conditions including use of a seismic reflection survey, groundwater modeling, and extensive groundwater data collection. Site involved transient groundwater flow influences related to nearby water supply wells, tides, and seasonal effects. Evaluated VOC plume and natural attenuation for RI/FS/RAP program. Successfully negotiated RWQCB approval of RAP consisting of mobile high vacuum extraction of free product and monitored natural attenuation for the dissolved plume.

Contaminated Site Investigation

Managed investigation of gasoline and MTBE contamination in a fractured granitic aquifer at Caltrans maintenance station in Sierra Nevada, CA. Conducted extensive drilling, downhole geophysical surveys, aquifer testing, and groundwater monitoring. Performed exploratory borings and geophysics on borings to evaluate lithography, and sampled groundwater from four fracture zones using dual-packer sampling system. Evaluated geology, groundwater flow, and contaminant transport to assess potential threats to nearby water supply wells and a stream. Negotiated with RWQCB on behalf of facility owner.

Fuel Hydrant Site Investigation and Remediation

Project Manager for investigation and remediation of a former fuel hydrant system at San Francisco International Airport. Developed sampling and analysis plan based on previous investigation results, facility records, and historical aerial photographs. Used geophysical surveys to identify former hydrant system features to accurately determine sampling locations. Used air vacuum excavation methods to provide clearance of subsurface utilities and successfully place a number of wells within the backfill of the storm drain system. Evaluated and reported on the potential for the storm drain system to be a preferential pathway for the migration of product and impacted groundwater, as well as the potential for a passive subgrade drainage system to influence groundwater flow. Interfaced with representatives of other potentially responsible parties to coordinate oversight of field activities for litigation support. Maintained high QA/QC standards to ensure that data collected was technically defensible to support potential litigation. Assisted in management and implementation of an interim remedial action plan (IRAP) consisting of passive

skimming, vacuum enhanced recovery, dual-pump drawdown, and high vacuum extraction for free product recovery. Implemented mobile high vacuum extraction remediation program under RWQCB-oversight.

RI/FS/RAP Task Manager

Task Manager and Senior Technical Reviewer for RI/FS/RAP program at Sacramento Rail Yard. Key team member for 12 years, during which responsibilities included the following:

- Investigated extent of VOCs, polynuclear aromatic compounds, TPH, and metals in soil and groundwater at 240-acre state. Evaluated site stratigraphy, hydrogeologic conditions, and chemical migration. Managed and reported on RI/FS, Risk Assessment, and Remedial Action Plan programs.
- Managed remediation program to address VOCs in soil and groundwater. Program consisted of soil vapor extraction (SVE), air sparging, and groundwater extraction.
- Project geologist for design and implementation of pilot study to mobilize light nonaqueous phase liquids (LNAPL) trapped beneath clay layer in subsurface of portion of the site. Performed cone penetrometer testing, installed small diameter wells, conducted air injection events, and prepared technical memorandum evaluating effectiveness of pilot study.
- Managed, planned, and implemented well abandonment project in preparation for extensive soil remediation project.
- Managed, planned, implemented, and reported on pilot study to evaluate applicability of low-flow sampling.
- Provided technical oversight for groundwater monitoring program with 200+ wells screened in four separate aquifers over an 800-acre area. Included negotiations with RWQCB for development and revision of Monitoring and Reporting Plan. Negotiated reductions in groundwater monitoring and reporting frequency, and of required analytes.
- Managed development and implementation of RAW for portion of site to facilitate site redevelopment, including realignment of main rail line. Interfaced with DTSC and RWQCB to expedite document-approval to meet client's development schedule and to coordinate the public review process.
- Evaluated effectiveness of groundwater extraction system designed to limit downgradient movement of VOC-impacted groundwater plume as part of interim remedial measure at California Superfund rail yard site in Sacramento. Prepared groundwater monitoring reports evaluating groundwater data to assess system effectiveness and adverse impacts of dewatering system.

Superfund Site Impact Assessment

Assessed potential impacts associated with wastewater discharge into unlined evaporation ponds at a Nevada Superfund site. Compiled and evaluated historical groundwater data, generated data tables and figures summarizing environmental conditions, and highlighted detections higher than applicable action levels for constituents of concern (metals, pesticides, SVOCs, and radionuclides). Oversaw quality assurance/quality control of data presentation. Co-authored environmental

conditions investigation report, interim data deliverables, and documents associated with groundwater quality evaluation program.

Litigation Support

Provided expert evaluations for lawsuit involving citizens group and aggregate mining operation and potential impacts to Yuba River in California. Represented mining entity by assessing complaints, evaluating hydrology of integrated groundwater-surface water system, and water quality sampling. Successfully addressed concerns to extent that lawsuit was dropped.

Shannon Martin, PG

Managing Consultant, Geologist

Shannon is a Licensed California Professional Geologist with 12 years' professional experience managing environmental programs. Shannon has a diverse hands-on background in geology, site investigation and characterization, drilling and monitoring wells, subcontractor management, construction management, due diligence, and strategic regulatory and client communications. She manages projects for a variety of clients, including transportation, power, manufacturing, and industrial clients. Shannon is well versed in managing programs involving multiple stakeholders and subcontractors and safely leading teams to success.

EXPERIENCE: 12 years' experience in power, transportation, oil & gas, and manufacturing sectors

FIELDS OF COMPETENCE

- Environmental program management
- Project management
- Subcontractor management
- Construction health and safety management
- Hydrogeology
- Drilling and monitoring well installation
- Subsurface soil and groundwater investigation
- Remediation
- Groundwater monitoring and sampling
- Soil sampling and analysis
- Remedial excavation oversight
- Air monitoring
- Duel diligence

KEY INDUSTRY SECTORS

- Power
- Manufacturing
- Oil and Gas
- Mining
- Transportation

KEY PROJECTS

Former Railway Site

Task manager for multiple field investigations and remedial activities at a former railroad facility. Investigations included sonic drilling and soil sampling within gas holders associated with a former MGP and sonic drilling for monitoring well installation in groundwater impacted by NAPL. Oversaw remedial activities including installing vertical and horizontal soil vapor extraction wells. Delivered technical direction and field logistic support for an off-site investigation to delineate a 1,4-dioxane plume within the right-of-way of a densely populated urban area. Responsibilities included subcontractor management, contracting, budgeting, scheduling, and overall project implementation from planning phase through reporting.

Former Power Plant Site

Task manager and field lead for multiple data gap investigations at a former power plant facility. Investigations included direct-push drilling and soil sampling within three former OUs at the Site. Complex sampling program included different analytical suites based upon location and Site history/COCs. COCs included TPH, VOCs, PAHs, metals, and PFAS. Managed field team and subcontractors for month-long investigation. Responsibilities included subcontractor management, contracting, budgeting, scheduling, and overall project implementation from planning phase through reporting.

Groundwater/Soil Investigation

Project manager for a former steel strapping manufacturing site. Implemented both on and off-site groundwater investigations in a residential neighborhood. COC included VOCs, and TPH compounds in soil, groundwater, and soil vapor. Investigation techniques included soil and groundwater sampling, monitoring well installation and development, and soil vapor prove installation and sampling. Facilitated county and city permits for drilling in the right-of-way. Managed a field team with multiple subcontractors and stakeholders involved. Managed regulatory and client communications.

Utility Due Diligence/Transaction Program

Directed due diligence projects for acquisition and divestiture at over 100 sites across a power client's footprint, including surplus properties. Work often performed on an expedited schedule and at sites, many of which were operationally sensitive, throughout Northern California. Work performed for multiple PG&E Lines of Business and includes Phase I and II evaluations, associated remedial action implementation, and strategic support for the individual transactions.

Groundwater/Soil Investigation

Deputy project manager for on and offsite groundwater and soil investigation at a former electrical manufacturing facility. Implemented and managed multiple phases of field investigations that included high-resolution site characterization techniques, drilling, sample collection, and well installation. Field lead for a 2-month long in-situ bioremediation injection program. Managed multiple subcontractors and overlapping operations on a daily basis in the field. Remedial actions implemented concurrently with redevelopment of 8-acre site and construction of new warehouse.

Work also included assessment and management of environmental impacts to the adjacent industrial and residential community from historical site activities. Project team delineated impacts, managed public relations, interfaced with commercial property owners and tenants, and safely performed drilling investigations in crowded public rights-of-way.

In Situ Chemical Treatment and Groundwater Remediation

Implemented and managed field operations for a 3-month-long in-situ chemical treatment and groundwater remediation project. Implemented and managed multiple field investigations including well installation and abandonment, drilling, and sample collection. Use of advanced PPE including Level B supplied air respirators. Work included managing and multiple subcontractors and stakeholders.

Chemical Injection and Performance Monitoring

Performed oversight as Field Safety Officer for three phases of chemical injections. Managed the site H&S and subcontractors onsite. Methods included hydraulic fracturing techniques and pressure-pulse injections. Oversaw direct-push confirmation soil boring installations and performed analysis of soil cores in the field to detect injection material migration. Following chemical injections, assisted with the groundwater performance monitoring program. Assisted in oversight of multiple monitoring well installations including sonic and hollow-stem auger drilling techniques. Performed oversight of soil vapor probe installation and soil vapor sampling. Assisted with groundwater treatment system operations and maintenance. Assisted with completion of investigation summaries, briefing memos, and work plans, as well as data processing and presentation.

Groundwater Monitoring

Managed site's two ongoing groundwater monitoring programs for extensive monitoring well network. The monitoring programs consisted of wells situated within multiple solid waste management units (SWMUs) with multiple contaminants of concern (COCs) including arsenic; polycyclic aromatic hydrocarbons (PAHs); metals; benzene, toluene, ethylbenzene, and xylenes; and volatile organic compounds. Site wells were sampled for various constituents based on location and COC-impacts. Coordinated sampling with subcontractors for the site's 90 monitoring wells sampled via traditional and passive techniques. Additional management tasks included data management, semiannual and annual reporting, communicating with regulators, budgeting, and proposal writing.

Remedial Work and Site Investigation

Managed ongoing remedial work and site investigations. Responsibilities included overseeing hollow-stem auger well installations, utility clearance via air knife and hand auger, waste characterization, well abandonments, and CPT. Responsible for managing the H&S of all activities and the subcontractors. Assisted in HVE pilot test and installed soil vapor pins for remedial investigation. Facilitated communication among project manager, subcontractors, and client contact in the field. Completed work plans and site investigation summaries and helped with data presentation and processing.

RCRA Class I and II Waste Characterization

Provided field support for RCRA Class I and Class II waste characterization for a construction project located at a former MGP site. The site had been redeveloped with a 46-story office building that required caisson installation and large-scale excavation in shallow lead, hydrocarbon, and PAH-impacted soils. Provided oversight, logging, and sampling of initial direct-push soil borings for waste characterization. Daily field activities during caisson drilling and excavation work included profiling waste via soil sampling and ambient air sampling, manifesting hazardous and non-hazardous waste, overseeing soil export, and coordinating with the general contractor and their subcontractors. Site contained heavy equipment, active drilling, and excavation activities. Used construction management skills in managing H&S protocol and coordinating field tasks in conjunction with overlapping activities.

Facility Emergency Response

Provided emergency response field support for a jet fuel leak at a tank farm. Assisted in early stages of contaminant delineation and transport during spill response activities. Provided daily field support for gauging groundwater levels. Oversaw monitoring well installation via air knife and direct-push drilling techniques. Oversaw well development activities, vacuum extraction, and treatment system installation activities. Completed follow-up documentation, data processing, and additional work plans.

Excavation and Confirmation Sampling

Field Safety Officer for the project and provided field support overseeing excavation activities and performed extensive confirmation sampling during a large-scale excavation. Daily field tasks included post-confirmation sampling and air monitoring. Pre-excavation work included well abandonment oversight, direct-push soil boring completion, baseline groundwater monitoring, and hollow-stem well installations.

Health and Safety Oversight

Acted as site Field Safety Officer managing the H&S oversight of subcontractors onsite. Provided oversight of excavation activities, worked extensively to meet client requests, and adhered to all safety and compliance standards on a very high profile and community-focused project. Daily tasks included pre-excavation confirmation sampling, air monitoring, follow-up confirmation soil sampling, and marking GPS locations in excavation area. Tasks in the post-excavation phase included well installation and development, taking water levels with data logging equipment, participation in remedial injection activities, and general field support.

Nadja Quiroz

Consultant Scientist & Designer

Nadja Quiroz works in Capital Projects Delivery and provides landscape architectural, visualization, and biological services. She co-leads for the Ecological Restoration Focus Group, a part of the Nature Positive Technical Community. Specifically, she provides technical landscape site plans for conditional use permits, conceptual plans (maps) and illustrative renders for mitigation and remediation projects, desktop reviews and biological field surveys for two key energy clients, and visual impact assessment aid.

EXPERIENCE: 7 years' experience in landscape and construction industries and 5 years' experience in ecological and vegetation management fieldwork.

PUBLICATIONS

- Study of Climate Change Impacts on Cultural Landscapes in the Pacific West Region, National Park Service Phase II: Preliminary Vulnerability Assessments

KEY PROJECTS

Transmission and Distribution Construction Support

Ongoing quality assurance reviews of biological and cultural field reports for a power client.

Vegetation Management Support

Ongoing quality assurance audits of biological field reports for a power client.

Vegetation Management Field Support

Ongoing biological field surveys and compliance monitoring of vegetation management activities for a power client.

Erwin Ranch Solar Farm

Consulted landscape ordinances and drafted a landscape site plan for a small-scale solar farm. Focused on specifying locally native plant species.

MI 1, 2, and 4: BESS Sites

Consulted landscape ordinances and drafted landscape site plans for three small-scale BESS sites and authored a narrative vegetation management plan for one site. Focused on specifying and sourcing locally native plant species.

Laurel Hill (R-147)

Created an illustrative render of proposed site remediation efforts. Included updates and additions, for stakeholder engagement purposes.

Key Projects Prior to Joining ERM

Botanical Garden Welcome Center Landscape Design (2023), contracted with April Owens

Collaboratively designed and drafted a low-water, native plant interpretive garden with new pathways, retaining wall seating, meadows-cape, and vegetated stormwater swale.

Buckner Homestead Cultural Landscape Report (2022), Cultural Landscape Research Group

Compiled and coordinated creation of the Cultural Landscape Report for Buckner Homestead Historic District in Stehekin, WA. Included photographic field documentation, landscape feature conditions updates, analysed historic imagery to develop Period Plans (maps), conducted stakeholder engagement, and developed adaptive management recommendations and illustrations.

Battle Creek Park Master Plan (2019), Greenworks PC

Co-designed park master plan and authored document for the City of Salem, OR. Included site analysis, stakeholder engagement, development of two concepts, public engagement process, refinement of preferred alternative, and documentation of process.
