The California Energy Commission (CEC) will conduct a staff workshop to discuss draft results from updates to the CEC Land Use Screens for Electric System Planning.

The public can participate in the workshop consistent with the attendance instructions below. The CEC aims to begin promptly at the start time posted and the end time is estimated based on the proposed agenda. The workshop may end sooner or later than the posted end time.

Agenda

The workshop will focus on updates to the CEC's Land Use Screens for Electric System Planning (Land Use Screens). Staff will describe how the Land Use Screens are used in various state planning processes and provide a history of how they were developed. Staff will present draft results from updating the screens based on new data and methods.

A detailed agenda will be posted prior to the workshop at Docket No. 26-LUEP-01 available at https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=26-LUEP-01, as well as on the CEC's Events Calendar available at https://www.energy.ca.gov/event/workshop/2026-11/land-use-screens-electric-system-planning-draft-results-workshop.

Background

Land-use screens are map-based footprints delineating important environmental and physical characteristics of the land. They are assembled from an integration of raw data into modeled results at the statewide scale and can show access limitations or competing land-use priorities.

Land-use screens are an input to several state electricity planning processes. Since 2008, the CEC, the California Public Utilities Commission, and the California Independent System Operator have used spatial environmental and land-use data, including land-use screens, to guide their relevant energy resource planning. In 2023, CEC staff released an online data viewer and associated report for the land-use screens, which can be found on the Land Use Screens webpage at: https://www.energy.ca.gov/data-reports/california-energy-planning-library/land-use-screens.

On June 11th, 2026, staff held a workshop to present proposed methodology and scope for updating the land use screens. Staff received written comments on that workshop through July 13, 2026.
