NOTICE OF RECEIPT

PETITION FOR PROJECT MODIFICATIONS FOR
NORTHERN CALIFORNIA POWER AGENCY PLANT 1 (79-AFC-2C) AND
PLANT 2 (81-AFC-3C)

On September 15, 2015, California Energy Commission (Energy Commission) staff
docketed the Northern California Power Agency’s (NCPA) petition to replace an existing
hydrogen peroxide storage tank at each of NCPAs geothermal power plants. The Energy
Commission certified NCPA Plant 1 on March 12, 1980. NCPA Plant 2 was certified on
December 29, 1982. Each geothermal power plant is certified with a 110-megawatt (MW)
capacity, NCPA Plant 1 began commercial operation on February 1, 1982, and NCPA
Plant 2 began commercial operation on October 1, 1985. Both facilities are located near
the town of Anderson Springs, in Sonoma County, California.

DESCRIPTION OF PROPOSED MODIFICATION

NCPA is proposing to replace an existing 6,000-gallon hydrogen peroxide tank at NCPA
Plant 1, and an existing 13,000-gallon hydrogen peroxide tank at NCPA Plant 2, with
similarly sized carbon steel tanks. The new tanks will be located within the existing
secondary containment basins, and will allow for the storage and application of liquid
cautic soda instead of the dry caustic soda application process presently used for
hydrogen sulfide abatement. Liquid caustic application will allow for system optimization of
the Stretford abatement systems for each plant. Therefore, NCPA is proposing to replace a
6,000-gallon tank at NCPA Plant 1 (formerly NCPA 2) and a 13,000-gallon tank at NCPA
Plant 2 (formerly NCPA 3) with carbon steel tanks designed to hold liquid caustic soda for
hydrogen sulfide abatement. Both new tanks will be nine feet in diameter, the NCPA Plant
1 tank will be 16 feet long and the NCPA Plant 2 tank will be 29 feet long. The new tanks
will be connected to the abatement systems with above-ground piping. No excavation is
required for installation, and tank replacement construction is expected to last
approximately four weeks, to be completed by the end of December 2015.

ENERGY COMMISSION AMENDMENT REVIEW PROCEDURES

The Energy Commission’s webpages for these facilities are located at
212dsasjd5598fhajkhs and
199dsasjd5598fhajkhs. Each webpage has a link to the amendment petition on the right
side in the box labeled “Compliance Proceeding.” Click on the “Documents for this
Proceeding (Docket Log)” option.

Energy Commission staff is currently reviewing the petition. The purpose of the Energy
Commission’s review process is to assess the impacts of this proposal on environmental
quality and on public health and safety. The review process includes an evaluation of the
consistency of the proposed changes with the Energy Commission’s Decision and a
determination on whether the facility, as modified, would remain in compliance with
applicable laws, ordinances, regulations, and standards (20 Cal. Code of Regs., § 1769). Upon completion of its review, the staff will provide written notice of its intent to either process the proposed changes as a Staff Approved Project Modification or schedule it for consideration by the Energy Commission at a regularly scheduled Business Meeting.

This Notice of Receipt has been mailed to the Commission’s facility mail list of interested parties and property owners adjacent to the facility site. It has also been e-mailed to the facility listserv. The listserv is an automated Energy Commission e-mail system by which information about this facility is e-mailed to parties who have subscribed. To subscribe, go to the Commission’s webpage for this facility, cited above, scroll down the right side of the project’s webpage to the box labeled “Subscribe,” and provide the requested contact information.

Any person may comment on the petition. To use the Energy Commission’s electronic commenting feature, go to the Energy Commission’s webpage for this facility, cited above, click on the “Submit e-Comment” link, and follow the instructions in the on-line form. Be sure to include the facility name in your comments. Once submitted, the Energy Commission Dockets Unit reviews and approves your comments, and you will receive an e-mail with a link to them.

Written comments may also be mailed or hand-delivered to:

California Energy Commission
Dockets Unit, MS-4
Docket Numbers 79-AFC-2C & 81-AFC-3C
1516 Ninth Street
Sacramento, CA 95814-5512

All comments and materials filed with and approved by the Dockets Unit will be added to the facility Docket Log and become publicly accessible on the Energy Commission’s webpage for the facility.

If you have questions about this notice, please contact Camille Remy Obad, Compliance Project Manager, at (916) 654-3940, or by fax to (916) 654-3882, or via e-mail at Camille.Remy-Obad@energy.ca.gov.

For information on participating in the Energy Commission's review of the petition, call the Public Adviser at (800) 822-6228 (toll-free in California) or send your e-mail to publicadviser@energy.ca.gov. News media inquiries should be directed to the Energy Commission Media Office at (916) 654-4989, or by e-mail to mediaoffice@energy.ca.gov.
