Subject: Northern California Power Agency Geothermal Sulfur Processing Building

Dear Ms. Remy-Obad,

We have received the bids Sulfur Processing Project, and the bids came back significantly over the budgeted amount. Whereas we want to build this project, we currently do not have adequate financial resources at present, and there is also the unknown of more money next year. Therefore we would like to put this project into cold standby until further notice. Please stop work on this, and we will revisit the project in about a year. I hope that all of the effort is not wasted, and what has been accomplished thus far can be saved and revisited if/when we have authorization for additional funding. If you have any questions, please contact me at your earliest convenience.

Sincerely,

John Koos
Compliance Manager
Northern California Power Agency
