Re: Workshop Agenda, Informational Proceeding, July 2, 2014
Nonresidential Building Energy Use Disclosure Program (AB 1103)

Dear Commissioners:

Thank you for the opportunity for continued participation in the evolving implementation of California Assembly Bill 1103. Attached to this correspondence are three documents I wish to submit for your review and further consideration as your process moves forward

- Letter to the Editor, San Diego Daily Transcript, Printed December 2, 2013: California AB 1103: Too Little, Too Late
- Letter to the Editor, San Diego Daily Transcript, Printed May 14, 2014: Rethinking Energy Efficiency in Commercial Real Estate
- Correspondence to California Energy Commission, dated June 18, 2014 regarding comments submitted to the California Energy Commission, June 18, 2014 Business Meeting, Item #8: Order Instituting Informational Proceeding

Through these documents, I have attempted to weave together an expanded narrative to that being reworked in Sacramento and throughout the State by our elected officials and the utility companies and my hope is that some of these ideas will take hold as AB 1103 implementation is refined.

I look forward to participating in the July 2 Informational Proceeding and when possible providing any additional input, suggestions or encouragement I can to help build wide-spread support for and state-wide participation with California Assembly Bill 1103.

Thank you again for your time.

Sincerely,

Randy J. Walsh, CCIM, LEED AP
Chief Efficiency Optimizer
