Sacramento, CA 95814-5504

Dear Mr. Adams:

We are pleased to hear the Sutter Energy center may be upgrading its facilities in the near future. I am writing to confirm that within the jurisdiction of the Mid Valley building trades dept and within Yuba and Sutter counties we have the resources of more than enough skilled tradesmen within our local area to accommodate the needs of the Sutter energy center in its proposed build out as we did with local Tradesmen at the Maxwell generating site and the original build of the Sutter energy center.

The Mid Valley Building Trades and its affiliates have assured me that within the time frame 2014 thru 2015 there are no other projects of size and scope that would create a shortage of local tradesmen to man at peak employment 120 workers and an average of 47 from various trades. We should add to that, the vast majority of these Tradesmen would be from the local workforce and commuting from home to work and the local economic benefits would be well received within this community.

Please at any time feel free to contact me.

Sincerely,

Edward Ritchie
