## **Opposed to Puente Power Project**

I attended the public meeting on August 27, 2015. I submitted my name to be able to comment but was not able to stay. It was after 9 pm and fewer than half the speakers had been called. I appreciated the presentations by the City of Oxnard and the Environmental Defense Center. I am concerned about sea level rise. It's unrealistic to expect the dunes to remain stable and protect the station. Storms are projected to magnify with climate change.

I don't believe that the Puente Power Project is a Bridge to California's Energy Future as the glossy brochures suggest. I challenge So Cal Edison to work harder to locate potential sites for alternate energy.

My husband and I own a small business in energy efficient lighting. I remind you...It is easier to save energy than it is to generate energy. I challenge Edison to increase the rebates that encourage businesses to install energy efficient lighting, insulation, heating, air conditioning, etc. We can avoid building power plants on beaches and create jobs.
