) COMMISSION STAFF DATA REQUESTS
) SET 2
)

On October 14, 2015, Staff for the California Energy Commission issued its Data Request Set 2 (Nos. 48-77) for the Puente Power Project. On behalf of the Applicant, we hereby request a two-week extension of the deadline for responding to the Data Requests identified below.

Data Request Nos. 49, 51, 52, 57, 59, 60, 68, 69, 70 and 72

These Data Requests are all associated with air quality modeling for the project. As Applicant has previously indicated, it is in the process of updating the air quality modeling for the project to reflect updated emissions information recently received from the turbine vendor, as well as updates to modeling procedures that have been adopted since the initial air quality modeling was completed. Additional time is needed to complete the revised air quality modeling.

Data Request Nos. 63-67

These Data Requests are all associated with greenhouse gas emissions and specifically reference recently adopted federal regulations. Additional time is needed to evaluate the implications of the new federal regulations.

DATED: November 3, 2015

Respectfully submitted,

/s/ Michael J. Carroll
