Subject: Additional Information Submittal - Application for Authority to Construct No. 00013-370
Install New Gas Turbine - Puente Power Project

Dear Mr. Di Ciolli:

The Ventura County Air Pollution Control District (VCAPCD) received your application for Authority to Construct No. 00013-370 on March 26, 2015, which was deemed complete on May 28, 2015. This permit application is for a new GE H-Class natural gas fired simple cycle gas turbine engine and a new emergency diesel generator engine at the existing Mandalay Generating Station at 393 North Harbor Blvd. in Oxnard, California.

On December 10, 2015, NRG Energy Center Oxnard LLC submitted a modification to the initial application that included significant revisions to the air emission calculations and a completely revised set of ambient air quality impact and public health risk modeling analyses.

The purpose of this letter is to inform you that the VCAPCD is currently reviewing this revision to the application. Pursuant to Section E of Rule 26.9, "New Source Review - Power Plants", the VCAPCD may request additional information necessary for the completion of the Authority to Construct and Determination of Compliance review. The review of this additional information will delay the issuance of the Preliminary Determination of Compliance for the Puente Power Project.

If you have any questions regarding your Authority to Construct application, please call me at 805/645-1421.

Sincerely,

Kerby E. Zozula, Manager
Engineering Division
