Subject: Public Comments for Puente and Use of Adl_U*

Hi Gerry,

As [you] know, the Ventura County APCD has been finalizing our preparation of the Rule 26.9 PDOC for the Puente Power Project. On April 11, 2016, I received comments and concerns from the Sierra Club and the Environmental Defense Center regarding the air quality modeling that is being conducted as a part of the PDOC.

We have contracted with the San Joaquin Valley APCD to conduct all the modeling for the Puente Power Project. I have discussed these modeling concerns with the San Joaquin Valley APCD and we have decided to do the modeling with, and without, the "ADJ_U*.

These additional modeling runs will require additional time. Therefore, the issuance of the PDOC will be delayed be delayed by 2 to 3 weeks beyond my current estimate of late April to early May.

Regards,

Kerby
