REQUEST FOR PUBLIC ACCESS TO THE ENCLOSED PRELIMINARY STAFF ASSESSMENT FOR THE PROPOSED PUENTE POWER PLANT (15-AFC-01)

Dear Librarian:

We request that the enclosed copy of the Preliminary Staff Assessment (PSA) for the Puente Power Project be made publicly available in your library for those who may wish to be informed about this energy project under review by the California Energy Commission (Energy Commission) and that it, along with the Notice of Availability, be placed in a conspicuous and accessible location.

We request that you not allow the Notice of Availability, the PSA, or any of its contents to be removed from the library for a period of one year. To increase accessibility of the document, we ask, if possible, that you cross reference it as a general reference work under the title and author categories, as well as under such subjects as "Energy Commission," "electricity energy/generation," "power plant siting," or any other relevant subject.

The enclosed PSA contains Energy Commission staff's preliminary engineering and environmental evaluation of the proposed project. The 262-megawatt (MW) electric power project would be located on a 3-acre portion of the 36-acre Mandalay Generating Station at 393 North Harbor Boulevard, Oxnard, Ventura County.

The Energy Commission's siting process encourages input from the public as well as local, state and federal agencies and tribes. To facilitate public participation in our review process, the Energy Commission distributes copies of staff documents such as the PSA to public libraries in communities near the proposed project, and in major cities throughout the state.

Thank you for your cooperation. If you have any questions, please contact Shawn Pittard, Energy Commission Project Manager, at (916) 654-4026 or e-mail at shawn.pittard@energy.ca.gov.

Sincerely,

Date: June 20, 2016
