Docket Number: 15-AFC-01

In Flint: the Water. In Oxnard: the AIR!

To the Commission:

I am more than concerned that you are still proposing to build another power plant in Oxnard/Ventura County, and to site it in such a way that, once again, the poorest and least powerful suffer the consequences. I am more than concerned that ENVIRONMENTAL RACISM is playing out in Ventura County. I am more than concerned that, in some neighborhoods of Oxnard, asthma rates among children are the highest in California, and that more polluting projects will put children more at risk. California is better than this. California's public officials are better than this.
