Power plant in Oxnard

Hello I have lived my entire life in Ventura County. I am also studying Political Science in UCLA. I completely oppose the building of another power plant in Oxnard. Oxnard is well known to have residents who are lower income and many Latinx. I believe that building this plant will disproportionately affect lower income people of color and is a classic example of NIMBY or "not in my back yard". I do not believe that this power plant would be built close to Beverly Hills or Bel-Air and they would have the resources to protest it. Please do not build this power plant. Think of the health risks for the people.

Sincerely,

A concerned citizen.
