## **Fwd Energy Commissioners**

We depend on you to "take the high road" a philosophical approach (def: unflinching in the face of trouble, defeat, or loss) to mitigate global warming ... please give us hope by targeting innovative energy solutions for our future rather than delay with a polluting 4th power plant. Explore with a hike on our natural shoreline from Ventura to Oxnard pass the eyesore power plant and be convinced industry doesn't belong there. Note that the City of Oxnard shoreline is over built with beach front houses, a military base and industry limiting access -- the only undeveloped natural beach front available is at the end of 5th Street just south of the power plant. The idea of families spending the day at the shore is dampen due to limited access. Oxnard is projected to increase 40-50% in population by 2050, please preserve the Mandalay State Beach for public space.
