Power Plant in Oxnard

Please take the proposed power plant in Oxnard seriously. Why Oxnard?

If Oxnard were populated by majority middle-class or upper-class residents would a power plant have been proposed? Would a power plant be approved? Likely not. As time and time again wealthy communities successfully put a stop to harmful projects like these. If your children, your family, lived in proximity to the proposed power plant would you approve?

Over and over again our region's most polluting projects have been placed in this working-class, 85% people of color community instead. We refuse to accept one more project making Oxnard the sacrifice zone.

The burden to meet our energy needs should be carried by all members of our society not just the most disadvantaged.

This is your chance to stand up for what is right. There are consequences to your decisions that affect children's health. The future of our communities.
