Docket Number: 15-AFC-01

A better Oxnard means no new coastal plants

Another power plant on the coast makes Oxnard a less desirable place to live and raise a family for environmental and health reasons.

So, what do Oxnard residents have to do to be heard?

What do mothers raising children in Oxnard have to do to be listened to?

What is it going to take for this majority Latino community to stop being targeted for undesirable projects like this one?

What is it going to take for this coastal town to get its beach back?

Our voice unequivocally says NO to this project and YES to making Oxnard a better place to live.
