No NRG power plant in oxnard

Please do not permit NRG to place a power plant in oxnard. The people are against it. We don't want it here. It isn't fair, since we already have existing power plants here. If it is approved, we will protest, like they did at Standing Rock and show the power of the people. We will be on the news and the dirty facts will come out about Oxnard being dumped on because we are mostly poor and non-white. It is obvious why Oxnard is always chosen to make the greedy power companies and others rich, while we deal with the negative impacts and our children get sick. Please do the right thing and deny this disgusting project.
