Opposition to Energy Planted

Like my neighbors, my city council and my other elected representatives, I oppose your decision to allow another energy facility that in our area. My opposition is rooted in both health and safety concerns, concerns you well know but have chosen to ignore. You also know that our area is disproportionately burdened with such plants. We are angry as you saw last night. I urge you to reconsider your decision out of respect for our wellbeing and in support of good community relations. We are not disposed to abandon our position on this as its affects us so strongly.
