No More Power Plants in Oxnard!

Listen to what the community, elected officials, and other agencies are saying!

The project is opposed by Oxnard City Council, Oxnard's elected county, state, and federal representatives, California Coastal Commission. But most importantly it is opposed by the community!

No more power plants in Oxnard!

Would you want your family, your children, growing up near a power plant? Would you move there? Why can they be sacrificed and you cannot? Why is your health valuable and theirs is not?

Maintaining the status quo is not acceptable. It is about time we do something different.

If it is necessary to have a power plant, then we must all share the burden.

Leave Oxnard alone! Listen to what opponents to this project are overwhelmingly saying. Stand up for health! Stand up for our children and our youth! Find a way to deny the project!
