Down with power plants!!

Oxnard has more than their fill of powerplants. We cannot continue destroying beaches at Oxnard with polluting activities. Power plants should not be taking up valuable space on the beaches. Beaches are prime locations and provide habitat for precious animals and Flora. In addition there is that huge pile of toxic waste dumped into that Beach where the Halaco site is. Companies like that should clean up their own mess. That's it also was on prime real estate. Enough is enough. Stop building more power plants on this prime location.
