FOCUS ON FUTURE GENERATIONS OXNARD

i HAVELIVED in Oxnard for 37 years. Raised two sons & now have two grandsons, all who live in Oxnard. We cherish where we live & spend almost every day at the beach walking, running, visiting & picking up trash. We have had solar panels since 2005 & use only enough energy supplied by them. We are vegan's. We have not flown in an airplane since 2005 & we rarely travel for any reason. Quit dumping on our area & I will pledge to conserve individually as well as encourage others to do so. We have been fighting this project all along & feel very frustrated by the lack of respect that our city DOES NOT WANT THIS PROJECT & you refuse to listen.
