Regarding Puente Power project

As a concerned citizen of Oxnard I am compelled to state my objection to the unnecessary and detrimental Puente Power Project proposed for the Mandaly beach area. The LA Times has reported that their investigation of the states power plants shows that it is estimated that California will be able to produce 21% more electricity than is needed by 2020. Meanwhile, tax payers are paying more for energy each year unnecessarily. Furthermore, the plant would be placed in an environmentally sensitive area. There are cleaner alternatives that we need to consider.
