Docket Number: 15-AFC-01

We want jobs in renewable, sustainable energy development

We want jobs in renewable, sustainable energy development, not toxic power plants. We know we won't get NRG jobs anyway and they are limited, temporary and low-paying.

Most of the construction jobs will go to people from LA County and maybe Ventura County. The most high-paying and skilled managerial jobs will go to people out of state.

The #s: Construction jobs: 48 on average, up to 90 at peak; Demolition jobs: 54 avg, 74 at peak. Operation jobs: 0 (as in ZERO), once the construction is complete.
