Oppose the Puente Power Project, Take a stand for people not polluters

As a Southern California resident, I am deeply concerned about the levels of polluted air, contaminated water, and greenhouse gas emissions that will come from NRG's proposed Puente Power Plant. Oxnard does not need another polluting power plant. This is an environmental justice issue. Local communities, especially children in the area, have the right to learn and play in an environment free from toxic power plants. Polluting natural gas plants are a bridge to nowhere; renewable energy infrastructure, including battery and storage technology, is rapidly increasing and the only solution to justly power communities. The claims from NRG that this plant is necessary is ignoring the advancements that renewable energy has made and continues to make every year. Please reject this power plant and do not strap current and future generations into a toxic energy future, when cleaner, safer and more affordable energy options of renewables are available.
