Oppose approval of Puente Power Plant

Dear CEC: Vote NO to the Puente Power Plant in Oxnard. As citizens and tax payers, we demand that CEC direct that a new RFO [Request for Offer] be conducted for companies to bid to develop and provide renewable energy and storage options. It is more important now than ever that California lead the country in renewable energy, not fossil fuel production. Additionally, building a new power plant on coastal land raises a host of environmental concerns not adequately addressed.

Thank you for your service.
