Opposition to Puente Power Plant

Good afternoon,

I am a former student of UCSB and a proud resident of California. I am opposed to the construction of this power plant because I do not believe there has been enough compelling evidence that its construction will not adversely affect communities of color and the ecosystem. This lack of consideration is disgraceful and the affected communities should have the power to decide what large scale construction projects get installed in their towns. In addition, there needs to be more renewable energy sources and sustainable jobs in California.

Best,

Earl
