## **Please reject the Puente power project**

Clearly Ca has more than enough power generation capacity (see LA times). We need

1) better connectivity between power stations and consumers within the state

2) more incentives for solar power. This is southern Ca!!! We have lots of potential for generating power from the sun

3) more storage capacity for peak power needs using batteries as is being tried by SCE and SDG&E

We have plenty of power plants running at far less than full capacity in the state already!!
