opposition to Puente Power Plant

As a long-time resident of Santa Barbara County, I am saddened and concerned about the proposal to saddle Oxnard with another power plant. As they have repeatedly asserted, you would not be proposing that this plant be built in Santa Barbara or Ventura. It is of critical importance to move away from fossil fuels and to put our financial resources into transitioning to renewable, clean and already available sources of energy. Please support the community of Oxnard by denying this unneeded plant.
