## **No to the PPP**

I support the people of Oxnard in their opposition to the PPP, especially because of the environmental racism involved in its siting.

In addition, we should not be building any new natural-gas power plants, even to replace existing ones. A new natural-gas power plant locks us into fossil fuel usage for several more decades, making it difficult to meet California's climate goals. Instead, install battery storage and/or renewable energy to meet any projected shortfall in supply.

Thank you,  
Martin
