## **Stop the PPP**

I urge you to stop the plans to build the Puente Power Plant! Californians do not need additional power plants - we Californians already pay billions of dollars for power that we do not need. Many recent laws have passed mandating alternative energy to reduce pollution, and these are already underway in California - we need to let these laws be developed instead of building unnecessary power plants. It's time to invest in growing the number of jobs in renewable, sustainable energy development instead of investing in power plants. It's time to listen to your constituents! Californians will be the ones living with the consequences of this power plant!
