Support Puente

Hello, my name is Cory Leorna i am a local 433 ironworker. I support this project because as a local ironworker apprenticeship this job will provide me with a job that is close to home so I will be able to come home to my family at night. It will also provide the surrounding community with more jobs to bring employment to the area surrounding the power plant. It will also prove to provide more safe and reliable power for our community. In an age engulfed in technology having reliable power is crucial to both the general population and the brave people who work to provide emergency services to them. This job will also keep the money produced in California in California by employing those who reside in this state therefore resulting in a raise in economy.
