Support this job

I am Steven Ramos and I am for this job because it helps keep us that are local working and closer to home and closer to our families. The more jobs we have here in state will help our state grow. This power house will bring more jobs by taking down two power plants and putting up one. So there will be two jobs combined in one that will bring in even more stable jobs. This will also help give us clean and sufficient energy and will also provide less black outs.
