No to Puente Power plant

The environmental injustice that takes place has been known for harming not only the environment but the people of Oxnard. The idea of replacing two power plants that don't meet the standards for a new power plant does not make any difference. As a person that used to live in Santa Paula and personally know the hardships in Oxnard, I believe that its completely unfair that people have to go through those harmful risks. I believe that we should consider the health of the people and not the profit.
