Comment opposing Puente Power Plant at Mandalay Beach

I am commenting here to voice my opposition to the Puente Power Plant at Mandalay Beach. A new natural gas fired power plant is not necessary and results in a social and environmental injustice.

I support projects that require renewable energy and energy storage. Santa Barbara's future energy plans are incorporating such technologies. Oxnard should be at the head of the curve like Santa Barbara, anything else is environmental injustice and environmental social injustice.

The future is renewable. Let's see Oxnard set an example for the nation.

Thank you for your consideration.

Sincerely,
Brett Levin
