I oppose the Puente Power Project

Dear California Energy Commission,

I am writing to join the voices opposing the proposed Puente Power Plant project.

I am happy to see from your website the spotlight on reaching California's Energy Goals and grants and awards for clean transportation, renewable energy and energy efficiency. This is why our state is a leader in action on mitigating climate change!

In light of our urgent need to address and minimize the serious consequences of climate change, I don't understand why we would spend precious money on a new fossil fuel power plant instead of directly investing in clean, safe, renewable energy. In fact, Ventura County would be an ideal location for both solar and wind energy generation, creating local jobs and energy without the various environmental, health and safety risks of natural gas and the resulting exacerbation of greenhouse gases in our atmosphere.

Thank you very much for your careful consideration of our health, safety and environment in the present, and our energy and climate future.

Sincerely,
Polly Chu
