Sacramento, California 95814-5504

Subject: Colusa Generation Station (06-AFC-09C), Condition TRANS-2, Traffic Control Plan, Back-up Water Supply Pipeline

Dear Mr. Veerkamp:

Condition of Certification TRANS-2 for the Colusa Generation Station required that a traffic control plan be prepared for the construction of the project. The plan was submitted to the California Energy Commission and approved in June 2008. The CGS traffic control plan (the "2008 plan") identified roads to be affected by CGS construction and ways to minimize the impacts to these roads. Dirks Road, in which the back-up water supply pipeline will be built, is one of the roads identified in the plan.

The applicable provision of the 2008 plan will be implemented for construction of the back-up water supply pipeline. However, traffic control measures will comply with the 2012 California Manual on Uniform Traffic Control Devices (CMUTCD). This plan is an update of the 2003 CMUTCD and 2004 supplement referenced in the 2008 plan.

Should you have any questions regarding this information, please contact Charles Price at 530-934-9007 or Susan Strachan at 530-757-7038. Thank you.

Sincerely,

A handwritten signature in blue ink that reads "Ed Warner" with the date "3/14" written above it.

Ed Warner
Plant Manager
Colusa Generating Station
