No More Power Plants in Oxnard!

Oxnard does not need another power plant!! Oxnard residents deserve clean air!! Oxnard is comprised of 85% people of color, one in four children in Oxnard live in poverty, one in five Oxnard residents do not have health insurance, and asthma rates in Oxnard are over 90% higher than the rest of California. With three power plants, a Superfund toxic waste site, landfills, and some of the highest levels of agricultural pesticide exposure in California, it is easy to see that the health and dignity of the people of Oxnard are being sacrificed for the benefit of the Ventura and Santa Barbara counties. Building the Puente Power Plant will continue the legacy of environmental racism that Oxnard has long suffered. The people oppose the Puente Power Plant, I hope the California Energy Commission will stop putting the wealth of fossil fuel industry over the health of California residents.
