Reject the Puente Power Project

Dear Submit your public comment,

Reject the Puente Power Project. Fossil fuels needs to stay in the ground. Our nation will not meet the goal of the Paris agreement in 2020 to save the planet from a non reversal-able environmental crisis. This is not a goal that we can not throw aside just because a group of businesses or individuals fear it. Climate change and its consequences is not a China plot or liberal hoax. It is real and we either work together to slow and hopefully reverse it or suffer the consequences of extreme droughts, storms and heat.

This project is uneconomical and unnecessary. Renewables would cost half as much, create local jobs and provide a healthier environment for the community.

Fossil fuel is old technology. One we need to move pass and if the fossil fuel industry is unable and unwilling to transition that should not be our problem. We are not here to guarantee the profits of any industry and certainly not one that is moving us closer to a massive environmental criss. Reject Puente Power Plant.

Sincerely, anne wolf
