Puente Power Plants

Please do not ask the poorest communities of color in our county to support unneeded additional power plants that would serve the white wealthy areas of our county if ever needed- Please approve projects with RENEWABLE and SUSTAINABLE energy for our towns. Please reject the proposals for the Puente Power plant in Oxnard by NRG and the Calpine power plant in Santa Paula. It is often the communities struggling with poverty that are asked to carry the burdens of the larger area. This is not fair.
