Dear Submit your public comment,

I am writing to urge you to reject the Puente Power Project.

This project would be damaging to California communities. The city of Oxnard already has some of the highest asthma rates in the state. We should be working to clean the air, not endanger California communities with more pollution.

Additionally, this project is uneconomical and unnecessary. Puente would cost more than twice as much as it would cost to meet the same electricity needs with renewables. Clean energy solutions can create more good, local jobs in the Oxnard area for a fraction of the cost.

This is a project whose time has passed. Now more than ever, Californias leadership is essential to lead our nation toward a clean energy economy we aren't going to get there by building uneconomical projects that lock in more pollution and dependence on fossil fuels.

a proposed gas-fired power plant in Southern California would take us in the opposite direction.

The Puente Power Plant site is proposed for the coastal dunes and wetlands near the city of Oxnard, next to working-class immigrant communities that already suffer some of the highest asthma rates in the state. This new source of pollution would be obsolete from the day it opened: Puentes outdated technology is no match for cheaper clean energy solutions that are available today.

I urge you to reject the Puente Power Project.

Sincerely, Lee Miller
